Philosophical Explorations:

On the Edge of Certainty Raymond Tallis, 1999-08-02 Raymond Tallis's *The Explicit Animal* 1991 was a passionate attack on attempts to explain human consciousness in purely biological terms. This ground-breaking book defended the distinctive nature of human consciousness against the misrepresentations of those many philosophers and cognitive scientists who aimed to reduce it to a set of functions understood in evolutionary neurobiological and computational terms. In his laudatory review in *The Times Literary Supplement* Stephen Clark expressed the hope that Tallis would continue his explorations. *On the Edge of Certainty* does precisely that: investigating and clarifying the implications of the highly original view of human nature discussed in his earlier book in order to understand the nature of truth of language of the mind and of the self.

Philosophical Explorations Nicholas Rescher, 2013-05-02 This book continues Rescher's longstanding practice of publishing groups of philosophical essays that originated in occasional lecture and conference presentations. Notwithstanding their topical diversity, they exhibit a uniformity of method in a common attempt to view historically significant philosophical issues in the light of modern perspectives, opened up through thorough conceptual clarification.

Toward New Philosophical Explorations of the Epistemic Desire to Know Marianna Papastephanou, 2019-03-25 This collection of essays explores curiosity from many philosophical perspectives of relevance to various fields and disciplines such as educational studies, epistemology, political philosophy, and history of thought. It advances and enriches scholarly research on curiosity while critiquing current approaches to the epistemic desire to know. Its interest in contemporary accounts of curiosity does not entail neglect of the conceptual history of this notion from antiquity to the present. Its focus on cultural and scientific appreciations of curiosity is global rather than local and inclusive of standpoints beyond established divisions such as the modern versus postmodern or the analytic versus continental. The book offers fresh and unique engagements with what motivates us to ask questions and how this motivation operates from an ethical, cultural, and political point of view.

Disjunctivism Marcus Willaschek, 2013-09-13 Does perception provide us with direct and unmediated access to the world around us? The so-called argument from illusion has traditionally been supposed to show otherwise: from the subject's point of view, perceptual illusions are often indistinguishable from veridical perceptions; hence, perceptual experience as such cannot provide us with knowledge of the world but only with knowledge of how things appear to us. Disjunctive accounts of perceptual experience, first proposed by John McDowell and Paul Snowdon in the early 1980s and at the centre of current debates in the philosophy of perception, have been proposed to block this argument. According to the traditional view, a case of perception and a subjectively indistinguishable illusion or hallucination can exemplify what is fundamentally the same kind of mental state, even though they differ in how they relate to the non-mental environment. In contrast, according to the disjunctive account, the concept of perceptual experience should be seen as essentially disjunctive, encompassing at least two distinct kinds of mental states.

namely genuinely world involving perceptions and mere appearances This book presents seven recent essays on disjunctivism first published in two special issues of Philosophical Explorations An International Journal for the Philosophy of Mind and Action *Feminist Explorations of Paul Ricoeur's Philosophy* Annemie Halsema, Fernanda Henriques, 2016-05-19 This book for the first time brings together considerations upon the feminine in relation to Paul Ricoeur's thinking The collection of renowned scholars who have published extensively on Ricoeur and promising younger scholars together shows the rich potential of his thought for feminist theory without failing to critically scrutinize it and to show its limitations with respect to thinking gender differences In the first part Ricoeur Women and Gender Ricoeur's work is taken as the starting point for the reflection upon the position of women and the feminine and for rethinking the notion of universalism In the second part Ricoeur in Dialogue his work is related to feminist thinkers such as Simone de Beauvoir Judith Butler and Nancy Fraser and to the work of artist Kara Walker These dialogues aim at thinking through socially relevant notions such as discourse recognition and justice In the third part Ricoeur and Feminist Theology Ricoeurian notions and ideas are the starting point for new perspectives upon feminist theology The insights developed in this book will be of particular value to students and scholars of Ricoeur feminist theory and the limits of hermeneutics and phenomenology *A Musician's Paradox: The Ups, Downs, and Ebb and Flow of Being a Pensive Musician* Ty Kiernan, 2016-06-17 In *A Musician's Paradox* author and lifelong working musician Ty Kiernan explores the intersection of music and philosophy with a series of philosophical discussions on life human behavior music faith relationships and the connection between musician and instrument Being torn between two worlds with the frustration the insecurity and the dearth of understanding about why musicians play music all the while loving and not being able to give up an obsession with music itself he focuses on the particular psyche of the musician but appeals to all who contemplate this almost inherent duality of their own existence Music is life and life is music and music can ultimately transmute into wisdom that is it can raise our consciousness to help wisdom flow within us For the musician and perhaps for everyone thinking about these connections and the relationship between cause and effect in general may offer us a clue into the possibility of something more in our lives **Power and Ethics** Waleed Mahmud Tariq, 2024-04-20 Dive into the philosophical journey that shaped the Western world from the ancient Greeks to the digital age *Power* it invites to understand the profound debates and the philosophical foundations that have influenced modern ideologies and our understanding of a just society Through the pages readers familiarize themselves with the likes of Socrates Plato Aristotle and move through the transformative periods of the Renaissance the Enlightenment and into the throes of modern and postmodern challenges As our world grapples with issues of democracy ethics in technology and global justice this book connects past wisdom with present dilemmas providing a critical perspective that is both enlightening and necessary It's not just a book for philosophers or academics it's crafted for anyone who seeks to understand the deep moral and political currents that continue to shape our world *Power Ethics* is your guide through the ages as it illuminates the ongoing discourse

The Ethics of Belief Jonathan Matheson, Rico Vitz, 2014-08-14 How do people form beliefs and how should they do so This book presents seventeen new essays on these questions drawing together perspectives from philosophy and psychology The first section explores the ethics of belief from an individualistic framework It begins by examining the question of doxastic voluntarism i.e the extent to which people have control over their beliefs It then shifts to focusing on the kinds of character that epistemic agents should cultivate what their

epistemic ends ought to be and the way in which these issues are related to other traditional questions in epistemology The section concludes by examining questions of epistemic value of whether knowledge is in some sense primary and of whether the ethics of belief falls within the domain of epistemology or ethics The second section extends this traditional debate to issues concerning the social dimensions of belief formation It begins with essays by social psychologists discussing the past three decades of research in lay epistemics It continues by examining Humean Kantian and feminist insights into the social aspects of belief formation as well as questions concerning the ethics of assertion The section concludes with a series of essays examining a topic that is currently of great interest to epistemologists namely the significance of peer disagreement

Experimental Philosophy and its Critics Joachim Horvath, Thomas Grundmann, 2013-09-13 Experimental philosophy is one of the most recent and controversial developments in philosophy Its basic idea is rather simple to test philosophical thought experiments and philosophers intuitions about them with scientific methods mostly taken from psychology and the social sciences The ensuing experimental results such as the cultural relativity of certain philosophical intuitions has engaged and at times infuriated many more traditionally minded armchair philosophers since then In this volume the metaphilosophical reflection on experimental philosophy is brought yet another step forward by engaging some of its most renowned proponents and critics in a lively and controversial debate In addition to that the volume also contains original experimental research on personal identity and philosophical temperament as well as state of the art essays on central metaphilosophical issues like thought experiments the nature of intuitions or the status of philosophical expertise This book was originally published as a special issue of Philosophical Psychology

Basic Desert, Reactive Attitudes and Free Will Maureen Sie, Derk Pereboom, 2017-10-02 Basic Desert Reactive Attitudes and Free Will addresses the issue of whether we can make sense of the widespread conviction that we are morally responsible beings It focuses on the claim that we deserve to be blamed and punished for our immoral actions and how this claim can be justified given the philosophical and scientific reasons to believe that we lack the sort of free will required for this sort of desert Contributions to the book distinguish between and explore two clusters of questions The first asks what it is to deserve to be harmed or benefitted What are the bases for desert actions good character bad character the omission of good character traits The second cluster explores the disagreement between compatibilists and incompatibilists surrounding the nature of desert Do we deserve to be harmed benefitted or judged even if we lack the ability to act differently and if we do not what effect does this have on our everyday actions Taken in full this book sheds light on the notion of desert implicated in our practice of holding each other morally responsible This book was originally published as a special issue of Philosophical Explorations

The Nature of Moral Responsibility Randolph Clarke, Michael McKenna, Angela M. Smith, 2015-04-01 What is it to be morally responsible for something Recent philosophical work reveals considerable disagreement on the question Indeed some theorists claim to distinguish several varieties of moral responsibility with different conditions that must be satisfied if one is to bear

responsibility of one or another of these kinds Debate on this point turns partly on disagreement about the kinds of responses made appropriate when one is blameworthy or praiseworthy It is generally agreed that these include reactive attitudes such as resentment and gratitude but theorists disagree about the nature of these attitudes They dispute the connections between moral responsibility desert and the justification of punishment as well Many theorists take it that whatever the appropriate responses are they are responses to an agent's quality of will but there is no consensus on what this comes to Are the agent's beliefs about the moral status of her behavior what matter or is it what she cares about or what she judges important This volume presents twelve original essays from participants in these debates The contributors include prominent established figures as well as influential younger philosophers A substantive introduction by the editors surveys recent debates and situates the contributions within it
