

How Solar Works

Solar electric systems, also called PV systems, use sunlight to produce electricity. Here's how:

- 1 Sunlight activates the panels, producing electricity.
- 2 Electricity passes through an inverter and is converted to usable power.
- 3 The inverter sends power to your house. Anything you don't use is transferred to the power grid.
- 4 The meter runs backwards and you save up to 90% on your electric bill.
