Global Capital and Peripheral Labour Ravi Raman, 2010-01-21 This book presents a historical account of plantations in India in the context of the modern world economy It brings history up to the present thereby showing how history can assist in explaining contemporary conditions and trends The author focuses on labour and economic development problems and uses the World Systems theory so as to demonstrate the practical utility of the theory and its limitations as a guide to historical research Based on extensive archival research the book interprets the dynamics of plantation capitalism by focusing on the work life and struggle of the dalits on plantations in colonial and post colonial South India as they evolved from the mid 19th century It argues that these elements of the plantation life world were fashioned by the specific characteristics of the workers location within the capitalist world economy the then prevailing local social structure and the scheme of disciplining to which the workers were subjected to Treating the relations among various social forces the planting communities the oppressed communities dalits in India the regional and national state and the Imperial regime this book fills a gap in academic literature on capitalism economic development and globalization

The Restructuring of Capitalism in Our Time William K. Tabb, 2012

Actions taken by the United States and other countries during the Great Recession focused on restoring the viability of major financial institutions while guaranteeing debt and stimulating growth. Once the markets stabilized, the United States enacted regulatory reforms that ultimately left basic economic structures unchanged. At the same time, the political class pursued austerity measures to curb the growing national debt. Drawing on the economic theories of Keynes and Minsky and applying them to the modern evolution of American banking and finance, William K. Tabb offers a chilling prediction about future crises and the structural factors inhibiting true reform. Tabb follows the rise of banking practices and financial motives in America over the past thirty years and the simultaneous growth of a shadow industry of hedge funds, private equity firms, and financial innovations such as derivatives. He marks the shift from an American economy based primarily on the production of goods and nonfinancial services to one characterized by financialization, then shows how these developments, perspectives, and approaches not only contributed to the recent financial crisis but also prevented the enactment of effective regulatory reform. He incisively analyzes the damage that increasing unsustainable debt and excessive risk taking has done to our financial system and expands his critique to a discussion of world systems and globalization. Revealing the willful blind spots of mainstream finance theory, Tabb moves beyond an economic model reliant on debt expansion and dangerous levels of leverage, proposing instead a social structure of accumulation that places economic justice over profit and more practically institutes an inclusive, sustainable model for growth.

Leviathans Alfred D. Chandler, Bruce Mazlish, 2005-01-17 A ground-breaking 2005 exploration of multinational corporations that differs from other books on the subject by offering the reader a totally global perspective of multinationals without portraying them simply as economic entities. Written by experts on various aspects of the history, development, cultural, and social implications of the multinational corporation, the book paints a compelling and coherent picture of the way these businesses affect almost all areas of our existence. As we might expect, the multinational company is shown to play a major role in the globalization that is reshaping so much of our lives.

Rethinking Marxism David F. Ruccio, 2021-09-08 In this issue, class revolution is discovered in a perhaps unlikely context: the paid domestic labor of African American women. Analyzing the changing economic relationship between African American women and white households from the end of slavery to the late 1970s, Cecilia Rio uses the concepts of Marxian class analysis and a wealth of empirical evidence to demonstrate that African American women were historical agents of fundamental class transformation. Also in this edition: articles on Humanities, Surplus, Communism to Capitalism, Categories of Class Analysis, Contingent Commodification, Labor Power, and more.

The China Handbook Christopher Hudson, 2014-06-03 The Regional Handbooks of Economic Development series provides accessible overviews of countries within their larger domestic and international contexts, focusing on the relations among regions as they meet the challenges of the twenty-first century. Like the other titles in the series, the China Handbook explores a wide range of complex factors, including overviews of the region's economic conditions within an historical and political context, as well as 20 or more chapter-length essays written by

recognized experts which analyze the key issues affecting a region's economy, its population, natural resources, foreign trade, labor problems and economic inequalities and other vital factors. In addition, this resource offers a detailed chronology of events in the region, a glossary of terms, biographical entries on key personalities, an annotated bibliography of further reading and a comprehensive analytical index.

Development and Distribution Andy Sumner, 2018-07-03. Since the Second World War, surprisingly few developing countries have experienced a truly sustained episode of economic and social convergence towards the structural characteristics of the advanced nations. East Asia has exceeded most regions in its achievement of convergence, and much has been written on comparative industrialization and development in North East Asia. Less discussed is South East Asia and the surprising and inclusive transformation several of its countries have undergone. Development and Distribution focuses on South East Asia and more specifically on Malaysia, Indonesia and Thailand. These three nations have all undergone a major transformation in a way never anticipated, from being poor agrarian countries to middle income countries with developed industrial and manufacturing bases. How did Malaysia, Indonesia and Thailand achieve such a transformation, and how did they achieve the transformation with a form of economic growth that was driven by structural transformation but that was inclusive? Given that historically it has been thought that structural transformation tends to push up inequality, whilst inclusive growth necessitates static or even falling inequality, this last point is particularly salient to developing countries. Understanding how the transformation was possible in a relatively small space of time, the extent to which it was inclusive, and the caveats and prospects for South East Asia, is thus an area of enquiry significant to all developing countries as they seek economic and social transformation.

Handbook on Growth and Sustainability Peter A. Victor, Brett Dolter, 2017-06-30. This Handbook assembles original contributions from influential authors such as Herman Daly, Paul Ekins, Marina Fischer-Kowalski, Jeroen van den Bergh, William E. Rees and Tim Jackson, who have helped to define our understanding of growth and sustainability. The Handbook also presents new contributions on topics such as degrowth, the debt-based financial system, cultural change, energy return on investment, shorter working hours and employment, and innovation and technology. Explorations of these issues can deepen our understanding of whether growth is sustainable and, in turn, whether a move away from growth can be sustained. With issues such as climate change looming large, our understanding of growth and sustainability is critical. This Handbook offers a broad

range of perspectives that can help the reader to decide Growth Sustainability Both Or neither

Female Voices from the Worksite Marquita R. Walker, 2020-11-24 This collection analyzes women's narratives on the workplace These narratives speak to the daily struggles women face in the workforce such as inflexible and long work hours masculine workplace cultures employers stereotypical attitudes and the absence of work life balance initiatives Viewed from a sociological perspective the authors emphasize the reoccurring themes of devaluation exploitation and dehumanization of female workers resulting from unconscious or implicit bias and which directly impacts women's quality of life

Economics Broadly Considered Jeff E. Constructing Leadership 4.0 Richard Kelly, 2018-11-27 The Fourth Industrial Revolution signals a sea change in the way we lead our organisations Moving away from relational leadership and horizontal organisationally led development it is imperative that business leaders are able to adapt to more networked organisations and shift away from dated assumptions of positional power Constructing Leadership 4.0 breaks new ground by explaining the urgent challenges facing managers and business leaders It will teach you how to Approach leadership development as a system rather than a programme Develop an organisational ecosystem to support leadership 4.0 Build collaborative networks Cultivate a responsive mindset through sensemaking Use non classroom based learning methodologies for educating leaders Rooted in leadership development methodology and underpinned by cutting edge research this book calls for businesses to cultivate responsive leaders through a theory of connectivism and swarm intelligence that reflects the coming cybernetic revolution

Marginality and Exclusion in Egypt Ray Bush, Habib Ayeub, 2012-06-14 What does it mean to be marginalized Is it a passive condition that the disadvantaged simply have to endure Or is it a manufactured label reproduced and by its nature transitory In the wake of the new uprising in Egypt this insightful collection explores issues of power politics and inequality in Egypt and the Middle East It argues that the notion of marginality tends to mask the true power relations that perpetuate poverty and exclusion It is these dynamic processes of political and economic transformation that need explanation The book provides a revealing analysis of key areas of Egyptian political economy such as labour urbanization and the creation of slums disability refugees street children and agrarian livelihoods reaching the impactful

conclusion that marginalization does not mean total exclusion What is marginalized can be called upon to play a dynamic part in the future as is the case with the revolution that toppled President Mubarak

Humans Versus Nature Daniel R. Headrick, 2020 Since the appearance of Homo sapiens on the planet hundreds of thousands of years ago human beings have sought to exploit their environments extracting as many resources as their technological ingenuity has allowed As technologies have advanced in recent centuries that impulse has remained largely unchecked exponentially accelerating the human impact on the environment Humans versus Nature tells a history of the global environment from the Stone Age to the present emphasizing the adversarial relationship between the human and natural worlds Nature is cast as an active protagonist rather than a mere backdrop or victim of human malfeasance Daniel R Headrick shows how environmental changes epidemics climate shocks and volcanic eruptions have molded human societies and cultures sometimes overwhelming them At the same time he traces the history of anthropogenic changes in the environment species extinctions global warming deforestation and resource depletion back to the age of hunters and gatherers and the first farmers and herders He shows how human interventions such as irrigation systems over fishing and the Industrial Revolution have in turn harmed the very societies that initiated them Throughout Headrick examines how human driven environmental changes are interwoven with larger global systems dramatically reshaping the complex relationship between people and the natural world In doing so he roots the current environmental crisis in the deep past

An Introduction to Critical Criminology Pamela Ugwu-dike, 2015-02-27 Critical criminological theories and perspectives are typically major components of Criminology degree courses An Introduction to Critical Criminology is the first accessible text on these topics for students of criminology sociology and social policy Written by an experienced lecturer who specialises in the topic it offers an in depth but accessible introduction to foundational and contemporary theories and perspectives in critical criminology In doing so it introduces students to theories and perspectives that challenge mainstream criminological theories about the causes of crime and the operation of the criminal justice system With the inclusion of boxed examples key points and sample essay questions An Introduction to Critical Criminology is ideal for students of Criminology because it explores in detail a vast array of critical criminological theories and perspectives
