*Respectable Radical* F. M. Leventhal, 1971      *The Dynamics of Working-class Politics* Michael Savage, 1987 In an important contribution to a perennial debate Dr Savage argues that over concentration on national labour movements has ignored the variety of local political strategies developed by working class movements these variations show that working class politics develops on the basis of different types of solidarity rooted in various forms of local social structure Such mutations are not a recent development testifying to the decline of class politics but have been an enduring feature of capitalist societies In a detailed case study of Preston Lancashire Dr Savage shows how the strategies and strengths of the various political parties changed between 1880 and 1940 as workplace solidarities gave way to neighbourhood based ones and as changing gender relations in the textile industry facilitated the organisation of women Its sophisticated use of sociological theory and detailed empirical analysis distinguish *The Dynamics of Working Class Politics* as one of the more important essays in historical sociology published in past years

#### **Social Inequality and Class Radicalism in France and Britain** Duncan

Gallie, 1984-01-26 This book first published in 1983 examines in depth the nature and sources of class radicalism in France and Britain and takes issue with some of the major theories of class consciousness and class action Drawing on data both from detailed case studies and from wider national surveys it shows that the conflict of class interests within capitalist societies can lead to sharply diverging attitudes to class inequality It argues that the explanation of such differences cannot be found in some general law of the evolution of social conflict in capitalist society It must be sought in the profound institutional differences that exist between the two societies In particular the study argues for a reassessment of the importance of the experience of war and of the way in which the business and political elite handled the social crises generated by war in accounting for the long term structural divergence of capitalist societies

#### **Currents of Radicalism**

Eugenio F. Biagini, Alastair J. Reid, 1991-06-28 Those who were originally called radicals and afterwards reformers are called Chartists declared Thomas Duncombe before Parliament in 1842 a comment which can be adapted for a later period and as a description of this collection of papers those who were originally called Chartists were afterwards called Liberal and Labour activists In other words the central argument of this book is that there was a substantial continuity in popular radicalism throughout the nineteenth and into the twentieth century The papers stress both the popular elements in Gladstonian Liberalism and the radical liberal elements in the early Labour party The first part of the book focuses on the continuity of popular attitudes across the commonly assumed mid century divide with studies of significant personalities and movements as well as a local case study The second part examines the strong links between Gladstonian Liberalism and the working classes looking in particular at labour law taxation and the Irish crisis The final part assesses the impact of radical traditions on early Labour politics in Parliament the unions and local government The same attitudes towards liberty the rule of law and local democracy are highlighted throughout and new questions are therefore posed about the major transitions in the

popular politics of the period      Politics and the Irish Working Class, 1830–1945 Donal Ó Drisceoil, F. Lane, 2005-09-30 This book is the first ever collection of scholarly essays on the history of the Irish working class It provides a comprehensive introduction to the involvement of Irish workers in political life and movements between 1830 and 1945 Fourteen leading Irish and international historians and political scientists trace the politicization of Irish workers during a period of considerable social and political turmoil The contributions include both surveys covering the entire period and case studies that provide new perspectives on crucial historical movements and moments This volume is a milestone in Irish labour and political historiography and an important contribution to the international literature on politics and the working class      The Origins of Collective Decision Making Andy Blunden, 2016-04-08 In *The Origins of Collective Decision Making* Andy Blunden identifies three paradigms of collective decision making Counsel Majority and Consensus discovers their origins in traditional medieval and modern times and traces their evolution over centuries up to the present The study reveals that these three paradigms have an ethical foundation deeply rooted in historical experiences The narrative takes the reader into the very moments when individual leaders and organisers made the crucial developments in white heat of critical moments in history such as the English Revolution of the 1640s the Chartist Movement of the 1840s and the early Civil Rights Movement of the 1960s This history provides a valuable resource for resolving current social movement conflict over decision making

*Nationalism and the State* John Breuilly, 1994-02 Since its publication this important study has become established as a central work on the vast and contested subject of modern nationalism Placing historical evidence within a general theoretical framework John Breuilly argues that nationalism should be understood as a form of politics that arises in opposition to the modern state In this updated and revised edition he extends his analysis to the most recent developments in central Europe and the former Soviet Union He also addresses the current debates over the meaning of nationalism and their implications for his position Breuilly challenges the conventional view that nationalism emerges from a sense of cultural identity Rather he shows how elites social groups and foreign governments use nationalist appeals to mobilize popular support against the state Nationalism then is a means of creating a sense of identity This provocative argument is supported with a wide ranging analysis of pertinent examples national opposition in early modern Europe the unification movement in Germany Italy and Poland separatism under the Hapsburg and Ottoman empires fascism in Germany Italy and Romania post war anti colonialism and the nationalist resurgence following the breakdown of Soviet power Still the most comprehensive and systematic historical comparison of nationalist politics *Nationalism and the State* is an indispensable book for anyone seeking to understand modern politics      Ballots and Barricades Ronald Aminzade, 1993-09-12 Using class analysis to understand the dynamics of political conflict in mid nineteenth century France Ronald Aminzade explores political activity among workers in three industrialized French cities Toulouse Saint tienne and Rouen A comparative case study design enables the author to analyze how the complex interaction between industrialization class relations and party development fostered

revolutionary communes in some cities but not others Challenging traditional theories of industrialization and revolution Aminzade innovatively uses narratives to provide a historically grounded analysis of the failed municipal revolutions of 1871 and the triumph of liberal democratic institutions in France In each of these cities distinctive patterns of capitalist industrialization and class restructuring intersected with shifting political opportunities at the national level to produce local republican parties with different ideologies strategies and alliances Focusing on changing relations between republican parties and male workers whose identities and economic standing were in transition Aminzade examines struggles within local parties among liberal radical and socialist republicans The outcome of these struggles he argues shaped the willingness of workers to embrace the ballot box or take to the barricades
