German Capital Ships and Raiders in World War II: From Scharnhorst to Tirpitz, 1942-1944 ,2002 **Air Power and the Evacuation of Dunkirk** Harry Raffal,2021-07-15 The evacuation of Dunkirk has been immortalised in books prints and films narrated as a story of an outnumbered inexperienced RAF defeating the battle hardened Luftwaffe and protecting the evacuation This book revives the historiography by analysing the air operations during the evacuation Raffal draws from German and English sources many for the first time in the context of Operation DYNAMO to argue that both sides suffered a defeat over Dunkirk This work examines the resources and tactics of both sides during DYNAMO and challenges the traditional view that the Luftwaffe held the advantage The success that the Luftwaffe achieved during DYNAMO including halting daylight evacuations on 1 June is evaluated and the supporting role of RAF Bomber and Coastal Command is explored in detail for the first time Concluding that the RAF was not responsible for the Luftwaffe s failure to prevent the evacuation Raffal demonstrates that the reasons lay elsewhere **Fiat CR.42 Aces of World War 2** Håkan Gustavsson,Ludovico Slongo,2013-02-20 A study of the exploits of the Fiat CR 42 Aces in World War II The Fiat CR 42 a logical development of the Fiat CR 32 was the last single seat fighter biplane to be produced It entered service with the Italian Regia Aeronautica in May 1939 before being exported to Belgium Hungary and Sweden Its combat debut came when the Belgian air force threw its fleet into action during the German invasion of the Low Countries on 10th May 1940 Despite being quickly overwhelmed the Belgian pilots managed to make a number of aerial claims The CR 42 became heavily involved in the fighting in North Africa and although it was gradually replaced by more modern fighters it continued in a point defence and ground support role until the end of the war Drawing on research from a range of sources this book examines the extensive employment of the Italian fighter plane during the course of World War II **Air Force Magazine** ,2006-07 **Strategic Bombing by the United States in World War II** Stewart Halsey Ross,2015-10-03 The United States relied heavily on bombing to defeat the Germans and the Japanese in World War II and air raids were touted as precision bombing in American propaganda But was precision possible over cloud covered Europe or a darkened Japanese countryside Could the vaunted Norden optical bombsight in fact drop bombs into pickle barrels as advertised Were the American aircrews well trained and well protected How good were their airplanes What were the results of the costly raids This work sets suppositions against facts surrounding the United States use of strategic bombing in World War II Chapters cover the events leading up to World War II the start of the war the seers and the planners the airplanes bombs bombsights and aircrews the planes Germany used to defend itself against American planes the five cities Hamburg Dresden Tokyo Hiroshima and Nagasaki that experienced the most destruction and the U S Strategic Bombing Survey of the damage done by aerial bombing The book also probes the government s myth building statements that supported America s view of itself as a uniquely humanitarian nation and analyzes the role played by interservice rivalry battleship admirals against bomber

generals **Air Force Journal of Logistics** ,1993 Dornier Do 217 Units of World War 2 Chris Goss,2021-09-16 The Do 217 had a much larger bomb load capacity and had considerably greater range than the Do 17 which it replaced in frontline service from mid to late 1941 Although initially used simply as a bomber later variants were developed to allow the Do 217 to undertake the precision maritime strike role In order to perform the latter mission the Do 217 was modified to launch glide bombs units employing these pioneering weapons enjoyed some success in the Mediterranean from the autumn of 1943 During the course of these operations the Do 217 became the first aircraft in military aviation history to deploy a precision guided bomb in combat in the form of the Fritz X radio guided free fall weapon which sank the Italian battleship Roma shortly after Italy capitulated in September 1943 The Do 217 served on all fronts and was often used on anti shipping strikes during the Battle of the Atlantic and against the Allied invasion fleet at Normandy This versatile aircraft was also converted into a nightfighter seeing action in the Defense of the Reich through to war s end This highly illustrated study explores the design and development of the Do 217 and chronicles its use in the frontline as a strategic bomber launch platform for first generation precision weapons reconnaissance aircraft and nightfighter among others **Royal Air Force Quarterly and Commonwealth Air Forces Journal** ,1966 *British Books in Print* ,1980 1943 John Grigg,2013-05-14 On June 6 1944 D Day Allied troops landed in France opening a way to eventual victory In this provocative reappraisal of the Second World War John Grigg suggests that the Allied invasion could have been launched successfully in the previous year reducing considerably the scale of the war s human tragedy By 1943 Grigg notes we already had air supremacy in the ETO and more than enough trained troops to launch a cross Channel invasion besides with the Wehrmacht still deep in Russia German supply lines would have been stretched to the breaking point Had the Western Allies liberated only France and Belgium in 1943 speculates Grigg they could have negotiated with Stalin from a position of strength Kirkus Review A forceful argumentative disputatious book intended to make people think over old prejudices and discard them Economist *The Beginnings of Strategic Air Power* Neville Jones,2012-11-12 Using official records the author traces the origins and early development of strategic bombing and examines its organs in the operations and staff planning of the First World War The experiences of the First World War should have been a valuable legacy to those who devised the counter offensive strategy in the years between the war Unfortunately the lessons learnt were soon forgotten and many of the operational and technical problems which the planners had begun to tackle in 1918 were not even seen to exist by the Air Staff during the 1920s and early 1930s **Operation Barbarossa: the Complete Organisational and Statistical Analysis, and Military Simulation Volume IIA** Nigel Askey,2013-11-01 Operation Barbarossa Volume IIA concerns the Wehrmacht All the significant German weapon systems and combat squads used in the campaign are analysed using the quantitative methodology detailed in Volume I along with the contextual history An assessment of each weapon system s inherent combat power is provided as well as attributes such as the relative anti tank anti personnel and anti aircraft values Volume IIA then

focuses on the detailed Kriegstarkenachweisungen KStN or TOE for German land units including those in the West as well as the unit's actual organisation and equipment. All significant units in the German Army Heer Waffen SS Luftwaffe and security forces are included ranging from the largest panzer divisions down to small anti aircraft companies military police units Landesschutzen battalions and rail road and construction companies. In all cases the data is presented in detailed tables using the weapon systems and combat squads previously analysed.

Among The Dead Cities A. C. Grayling, 2009-05-26. In *Among the Dead Cities* the acclaimed philosopher A. C. Grayling asks the provocative question: how would the Allies have fared if judged by the standards of the Nuremberg Trials? Arguing persuasively that the victor nations have never had to consider the morality of their policies during World War II, he offers a powerful moral re-examination of the Allied bombing campaigns against civilians in Germany and Japan in the light of principles enshrined in the post-war conventions on human rights and the laws of war. Grayling begins by narrating the Royal Air Force's and U.S. Army Air Force's dramatic and dangerous missions over Germany and Japan between 1942 and 1945. Through the eyes of survivors he describes the terrifying experience on the ground as bombs created inferno and devastation among often unprepared men, women and children. He examines the mindset and thought process of those who planned the campaigns in the heat and pressure of war and faced with a ruthless enemy. Grayling chronicles the voices that though in the minority loudly opposed attacks on civilians, exploring in detail whether the bombings ever achieved their goal of denting the will to wage war. Based on the facts and evidence, he makes a meticulous case for and one against civilian bombing and only then offers his own judgment. Acknowledging that they in no way equated to the death and destruction for which Nazi and Japanese aggression was responsible, he nonetheless concludes that the bombing campaigns were morally indefensible and more that accepting responsibility even six decades later is both a historical necessity and a moral imperative.

Spitfire

Aces of Burma and the Pacific Andrew Thomas, 2013-02-20. The history of the 54 aces who flew Spitfires over Burma, India and Australia with first-hand accounts and full-colour artwork revealing how this much-loved plane changed the fortunes of the Allied forces against the Japanese Army Air Force. The arrival of the Spitfire in Burma came at a crucial time as the RAF struggled against the Japanese to support the Chindit operation on the ground. Proving a huge boost to morale, the Spitfire played a large part in defeating the enemy and covering the subsequent Allied advance through Burma, protecting the ground.
