Rage, Power, and Aggression Robert A. Glick, Steven P. Roose, Steven T. Roose, 1993-01-01 Rage aggression and the will to power are significant human characteristics that have been relatively neglected in psychoanalytic literature In the past rage has been viewed as a response to threat or frustration aggression as an instinctual drive and the will to power as causing destructive and maladaptive behavior In this volume the authors probe these dimensions of human experience to show how they serve adaptive needs assuage anxiety protect against threat and foster maturation Florence 98.

Destruction and Creation Personal and Cultural Transformation Mary Ann Mattoon, 1999 The Fourteenth Congress for Analytical Psychology was held August 23-28 1998 in the ancient city of Florence Italy The theme Destruction and Creation Personal and Cultural Transformations is especially appropriate to the Italian setting with that nation's history of destruction both from nature and from human activity and its tradition especially in Florence of creative individuals and institutions The theme is fitting also to the context of Jungian psychology with its emphasis on these and other pairs of opposites with their integral role in psychic wholeness Acknowledging also that destruction is indispensable to creation some Jungians prefer the term creative unconscious to the traditional collective unconscious Understanding Anger Disorders Raymond DiGiuseppe, Raymond Chip Tafrate, 2006-09-07 Since classical times philosophers and physicians have identified anger as a human frailty that can lead to violence and human suffering but with the development of a modern science of abnormal psychology and mental disorders it has been written off as merely an emotional symptom and excluded from most accepted systems of psychiatric diagnosis Yet despite the lack of scientific recognition anger related violence is often in the news and courts are increasingly mandating anger management treatment It is time for a fresh scientific examination of one of the most fundamental human emotions and what happens when it becomes pathological and this thorough persuasive book offers precisely such a probing analysis Using both clinical data and a variety of case studies esteemed anger researchers Raymond DiGiuseppe and Raymond Chip Tafrate argue for a new diagnostic classification Anger Regulation and Expression Disorder that will help bring about clinical improvements and increased scientific understanding of anger After situating anger in both historical and emotional contexts they report research that supports the existence of several subtypes of the disorder and review treatment outcome studies and new interventions to improve treatment The first book that fully explores anger as a clinical phenomenon and provides a reliable set of assessment criteria it represents a major step toward establishing the clear definitions and scientific basis necessary for assessing diagnosing and treating anger disorders **International Handbook of Anger** Michael Potegal, Gerhard Stemmler, Charles Spielberger, 2010-02-04 From the individual rage driven violence of domestic abuse to the destructive causes and lasting consequences of large scale ethnic and political conflict anger and its effects are ubiquitous in human life and are the focus of intense study across many scientific disciplines fields as varied as affective neuroscience health science psychology psychophysiology and sociology have all contributed to recent
