political leaders and military commanders responsible for the conduct of the Allied operations realised that after a string of disastrous setbacks national morale could only be restored by taking offensive action against the enemy. With the limited resources available Churchill's stirring call to set Europe ablaze called for unconventional solutions and action. From these uncertain beginnings was born a plethora of Allied Special Force units. Inevitably some are household names but others are little known, having had brief and covert existences in far flung parts of the world. All however had distinctive identities and their proudly worn insignia represent a fascinating and often elusive challenge for militaria collectors. This is due not just to the scarcity of items in many cases but to the mystery of their origin. A number of these units were established on an ad hoc and spontaneous basis. Peter Taylor's aim in compiling *Allied Special Forces Insignia 1939-1948* is to fill a gap in the growing bibliography of militaria collecting. At the same time Brigadier Bryan Watkins' introduction sets in context the growth and development of Allied Special Forces during the global conflict 1939-45. Lavishly illustrated, this work will prove an essential reference work and companion guide for the expert collector and all interested in military history.

Churchill, Master and Commander Anthony Tucker-Jones, 2021-11-25. Masterful research, impeccable detail with a beautifully flowing narrative of which Churchill himself would have been proud. Professor Peter Caddick Adams: From his earliest days Winston Churchill was an extreme risk taker and he carried this into adulthood. Today he is widely hailed as Britain's greatest wartime leader and politician. Deep down though he was foremost a warlord. Just like his ally Stalin and his arch enemies Hitler and Mussolini, Churchill could not help himself and insisted on personally directing the strategic conduct of World War II. For better or worse he insisted on being political master and military commander. Again like his wartime contemporaries he had a habit of not heeding the advice of his generals. The results of this were disasters in Norway, North Africa, Greece and Crete during 1940-41. His fruitless Dodecanese campaign in 1943 also ended in defeat. Churchill's pig-headedness over supporting the Italian campaign in defiance of the Riviera landings culminated in him threatening to resign and bring down the British Government. Yet on occasions he got it just right: his refusal to surrender in 1940, the British miracle at Dunkirk and victory in the Battle of Britain showed that he was a much needed decisive leader. Nor did he shy away from difficult decisions such as the destruction of the French Fleet to prevent it falling into German hands and his subsequent war against Vichy France. In this

Darwin and International Relations Bradley A. Thayer, 2021-03-17 Shows a mastery of research and theory in both biology and international relations and weaves the two fields together in a compelling fashion Dr Steven A Peterson Director School of Public Affairs Penn State Pathbreaking and controversial *Darwin and International Relations* offers the first comprehensive analysis of international affairs of state through the lens of evolutionary theory Using ethnological and statistical studies of warfare among tribal societies Bradley A Thayer argues that humans wage war for reasons predicted by evolutionary theory to gain and protect vital resources but also for the physically and emotionally stimulating effects of combat Thayer demonstrates that an evolutionary understanding of disease will become a more important part of the study of international relations as new strains of diseases emerge and advances in genetics make biological warfare a more effective weapon for states and terrorists He also explains the deep causes of ethnic conflict by illuminating how xenophobia and ethnocentrism evolved in humans He notes that these behaviors once contributed to our ancestors success in radically different environments but they remain a part of us *Darwin and International Relations* makes a major contribution to our understanding of human history and the future of international relations Obligatory reading for social and life scientists alike and deserves to become a standard work in political science *International History Review* A thoughtful book that can challenge some of our comfortable assumptions *Journal of Military History* Outstanding This book will become a standard work in political science Roger D Masters Dartmouth College
