Rail City Chicago Usa:

Rail City, Chicago, USA George H. Douglas, 1981 *Chicago's North Michigan Avenue* John W. Stamper, 1991-08-27

Since its opening in the 1920s Chicago's North Michigan Avenue has been one of the city's most prestigious commercial corridors lined by some of its most architecturally distinctive business residential and hotel buildings Planned by Daniel Burnham in 1909 the avenue became the principal connecting link between downtown and the wealthy residential Gold Coast north of the Loop Some thirty buildings were constructed along its path in the ten year period before the Depression an urban expansion comparable in significance to that of Pennsylvania and Park Avenues John W Stamper traces the complex development of North Michigan Avenue from the 1880s to the 1920s building boom that solidified its character and economic base describing the initiation of the planning process by private interests to its execution aided by the city's powerful condemnation and taxation proceedings He focuses on individual buildings constructed on the avenue including the Renaissance and Gothic inspired Wrigley Building Tribune Tower and Drake Hotel and places them within the context of factors governing their construction property ownership financing zoning laws design theory and advertising Stamper compares this stylistically diverse mixture of low and high rise structures with earlier rejected planning proposals all of which had prescribed a uniformly designed European like avenue of continuous cornice heights consistent facade widths and complementary stylistic features He analyzes the drastically different character the avenue took by 1930 with high rise towers reaching thirty stories and beyond in terms of the clash among economic political and architectural interests His argument that the discrepancies between the rejected plans and reality illustrate the developers choice of economic return on their investment over aesthetic community is extended through to the present avenue and the virtual disregard of the urban qualities proposed at its inception Generously illustrated with an epilogue condensing the avenue's history between the end of World War II and the present this is an exhaustive account of an important topic in the history of modern architecture and city planning *The Official Railway Guide* , 1909 *Skyscrapers* George H. Douglas, 2004-08-19 This history of skyscrapers examines how these tall buildings affected the cityscape and the people who worked in lived in and visited them Much of the focus is rightly on the architects who had the vision to design and build America's skyscrapers but attention is also given to the steelworkers who built them the financiers who put up the money and the daredevils who attempt to conquer them in some inexplicable pursuit of fame The impact of the skyscraper on popular culture particularly film and literature is also explored *An American Urban Residential Landscape, 1890-1920* , *Plagued by Fire* Paul Hendrickson, 2019 From the award winning and nationally best selling author of Hemingway's Boat and Sons of Mississippi an illuminating pathbreaking biography that will change the way we understand the life mind and work of the premier American architect Frank Lloyd Wright has long been known as a rank egotist who held in contempt almost everything aside from his own genius Harder to detect but no less real is a Wright who fully understood and suffered from the choices he

made This is the Wright whom Paul Hendrickson reveals in this masterful biography the Wright who was haunted by his father about whom he told the greatest lie of his life And this we see is the Wright of many other neglected aspects of his story his close and perhaps romantic relationship with friend and early mentor Cecil Corwin the eerie unmistakable role of fires in his life the connection between the Tulsa Race Riot of 1921 and the murder of his mistress her two children and four others at his beloved Wisconsin home by a black servant gone mad In showing us Wright s facades along with their cracks Hendrickson helps us form a fresh deep and more human understanding of the man With prodigious research unique vision and his ability to make sense of a life in ways at once unexpected poetic and undeniably brilliant he has given us the defining book on Wright

Challenging Chicago Perry Duis,1998 *Challenging Chicago* reveals the survival strategies to which the many people who flocked to the city resorted especially those of the lower and middle classes for whom urban life was a new experience

Network revolutions of the past have shaped the present and set the stage for the revolution we are experiencing today In an era of seemingly instant change it s easy to think that today s revolutions in communications business and many areas of daily life are unprecedented Today s changes may be new and may be happening faster than ever before But our ancestors at times were just as bewildered by rapid upheavals in what we now call networks the physical links that bind any society together In this fascinating book former FCC chairman Tom Wheeler brings to life the two great network revolutions of the past and uses them to help put in perspective the confusion uncertainty and even excitement most people face today The first big network revolution was the invention of movable type printing in the fifteenth century This book its millions of predecessors and even such broad trends as the Reformation the Renaissance and the multiple scientific revolutions of the past 500 years would not have been possible without that one invention The second revolution came with the invention of the telegraph early in the nineteenth century Never before had people been able to communicate over long distances faster than a horse could travel Along with the development of the world s first high speed network the railroad the telegraph upended centuries of stability and literally redrew the map of the world Wheeler puts these past revolutions into the perspective of today when rapid fire changes in networking are upending the nature of work personal privacy education the media and nearly every other aspect of modern life But he doesn t leave it there Outlining What s Next he describes how artificial intelligence virtual reality blockchain and the need for cybersecurity are laying the foundation for a third network revolution
