Railways V 2 Studies In Transport History:

An Historical Geography of Railways in Great Britain and Ireland David Turnock, 2016-12-05 Although a great deal has been published on the economic social and engineering history of nineteenth century railways the work of historical geographers has been much less conspicuous This overview by David Turnock goes a long way towards restoring the balance It details every important aspect of the railway s influence on spatial distribution of economic and social change providing a full account of the nineteenth century geography of the British Isles seen in the context of the railway The book reviews and explains the shape of the developing railway network beginning with the pre steam railways and connections between existing road and water communications and the new rail lines The author also discusses the impact of the railways on the patterns of industrial urban and rural change throughout the century Throughout the historical geography of Ireland is treated in equal detail to that of Great Britain

Railways and the Victorian Imagination Michael J. Freeman, 1999-01-01 Discusses the cultural and social effect that the railway had on nineteenth century society in Great Britain

The Civil Engineering of Canals and Railways before 1850 Michael M. Chrimes, 2017-09-08 Between 1750 and 1850 the British landscape was transformed by a transport revolution which involved engineering works on a scale not seen in Europe since Roman times While the economic background of the canal and railway ages are relatively well known and many histories have been written about the locomotives which ran on the railways relatively little has been published on how the engineering works themselves were made possible This book brings together a series of papers which seek to answer the questions of how canals and railways were built how the engineers responsible organised the works how they were designed and what the role of the contractors was in the process

Handbook of Railway Vehicle Dynamics, Second Edition Simon Iwnicki, Maksym Spiryagin, Colin Cole, Tim McSweeney, 2019-11-14 Handbook of Railway Vehicle Dynamics Second Edition provides expanded fully updated coverage of railway vehicle dynamics With chapters by international experts this work surveys the main areas of rolling stock and locomotive dynamics Through mathematical analysis and numerous practical examples it builds a deep understanding of the wheel rail interface suspension and suspension component design simulation and testing of electrical and mechanical systems and interaction with the surrounding infrastructure and noise and vibration Topics added in the Second Edition include magnetic levitation rail vehicle aerodynamics and advances in traction and braking for full trains and individual vehicles

Temple Tracks Vineeta Sinha, 2023-08-11 The notions of labour mobility and piety have a complex and intertwined relationship Using ethnographic methods and a historical perspective Temple Tracks critically outlines the interlink of railway construction in colonial and post colonial Asia as well as the anthropology of infrastructure and transnational mobilities with religion In Malaysia and Singapore evidence of religion making and railway building from a colonial past is visible in multiple modes and media as memories recollections and traces

Communications in Africa, 1880-1939, Volume 4 David Sunderland, 2017-07-05 This collection presents rare

documents relating to the development of various forms of communication across Africa by the British as part of their economic investment in Africa Railways and waterways are examined Bibliography of European Economic and Social History Derek Howard Aldcroft, Richard Rodger, 1993 This bibliographical guide contains 10 000 references to the economic and social history of 30 European countries during the period 1700 1939 More than 3000 periodicals have been consulted to obtain references as well as books edited collections and conference proceedings The information is listed in categories such as industry agriculture finance migration labour conditions urban communities and organizations Full publication details are included so that references may be located easily Australian national bibliography, 1961 *Communications in Africa, 1880-1939 (set)* David Sunderland, 2018-10-24 This collection presents rare documents relating to the development of various forms of communication across Africa by the British as part of their economic investment in Africa Railways and waterways are examined *Transporting Moments: Mobility, Australian Railways and the Trained Society* Colin Symes, 2015-04-06 Sociologists have suggested that being on the move entails a complex choreography comprised of passenger comportment signage announcements and posters Employing insights from mobility theory *Transporting moments* provides an account of railway culture from a passenger's perspective The book uses the context of commuting in Sydney at a time when elements of its intra urban rail network were being upgraded as its principal case study This upgrade covers its rolling stock infrastructure and linguistic landscape It is argued that understanding the rationale behind these changes requires an understanding of the historical and policy context in which the railways of Sydney's New South Wales and Australia are embedded This is also the case with the nation's long distance trains whose operators have fought hard to stave off competition from airliners and cars *Transporting moments* therefore presents strong case for preserving public transport as a more equitable and sustainable form of mobility Governments Australian or otherwise can use these insights for productive investment in their rail networks and public transportation service in general and for reducing the nation's addiction to the automobile With its invaluable insights into travelling on trains *Transporting moments* is a fascinating addition to the growing corpus of literature on day to day mobility **Communications in Africa, 1880-1939, Volume 3** David Sunderland, 2017-07-05 This collection presents rare documents relating to the development of various forms of communication across Africa by the British as part of their economic investment in Africa Railways and waterways are examined **APAIS 1991: Australian public affairs information service**, Bulletin, 1917 **The Development of Transportation in Modern England** William T. Jackman, 2019-04-24 Published in 1962 In offering this work as a modest contribution to our knowledge of the economic development of England from the standpoint of transportation the author must say in the first place that he has endeavoured to adhere rigidly to the subject in hand without making deviations into collateral fields *Slow Train to Arcadia* Duncan Gager, 2024-11-12 Railway commuting is today a mundane and routine necessity yet for the Victorians it was a novel experience It opened up new possibilities of living at a remove from the

crowded urban centre while staying connected to its places of work Commuting helped transform London's urban landscape as the compact city of Dickens's London gave way to the suburban sprawl of the British capital in the early twentieth century

Slow Train to Arcadia is a history of London's suburban railway network from the 1830s to 1921 and its impact on urban mobility The book charts the relationship between the three main actors in the formation of the suburban railway the state the railway companies and the travelling public While the railway age came quickly to Victorian Britain commuting took a slower journey to commonplace status In the 1840s William Gladstone sought to make railway travel accessible to all but commuting was experienced differently according to class and gender *Slow Train to Arcadia* explains why the democratization of commuting proved to be an elusive goal Today's workers are living through a fundamental reversal in the relationship between home and the workplace For many a daily commute is being consigned to history a shift that will have long term social and economic consequences *Slow Train to Arcadia* is a timely exploration of the origins of mass commuting a similarly transformative period for the daily patterns of working life

The Train Journey Simone Gigliotti, 2009-07-01 Deportations by train were critical in the Nazis genocidal vision of the Final Solution of the Jewish Question Historians have estimated that between 1941 and 1944 up to three million Jews were transported to their deaths in concentration and extermination camps In his writings on the Final Solution Raul Hilberg pondered the role of trains How can railways be regarded as anything more than physical equipment that was used when the time came to transport the Jews from various cities to shooting grounds and gas chambers in Eastern Europe This book explores the question by analyzing the victims experiences at each stage of forced relocation the round ups and departures from the ghettos the captivity in trains and finally the arrival at the camps Utilizing a variety of published memoirs and unpublished testimonies the book argues that victims experienced the train journeys as mobile chambers comparable in importance to the more studied fixed locations of persecution such as ghettos and camps

The World's First Railway System Mark Casson, 2009-09-10 The British railway network was a monument to Victorian private enterprise Its masterpieces of civil engineering were emulated around the world But its performance was controversial praised for promoting a high density of lines it was also criticised for wasteful duplication of routes This is the first history of the British railway system written from a modern economic perspective It uses counterfactual analysis to construct an alternative network to represent the most efficient alternative rail network that could have been constructed given what was known at the time the first time this has been done It reveals how weaknesses in regulation and defects in government policy resulted in enormous inefficiency in the Victorian system that Britain lives with today British railway companies developed into powerful regional monopolies which then contested each other's territories When denied access to existing lines in rival territories they built duplicate lines instead Plans for an integrated national system sponsored

by William Gladstone were blocked by Members of Parliament because of a perceived conflict with the local interests they represented Each town wanted more railways than its neighbours and so too many lines were built The costs of these surplus lines led ultimately to higher fares and freight charges which impaired the performance of the economy The book will be the definitive source of reference for those interested in the economic history of the British railway system It makes use of a major new historical source deposited railway plans integrates transport and local history through its regional analysis of the railway system and provides a comprehensive classified bibliography

Railway Photographic Advertising in Britain, 1900-1939 Alexander Medcalf, 2018-03-06 This book explores the phenomenal resources dedicated to understanding and encouraging passengers to consume travel from 1900 to 1939 analysing how place and travel were presented for sale Using the Great Western Railway as a chief case study as well as a range of its competitors both on and off the rails Alexander Medcalf unravels the complex and ever changing processes behind corporate sales communications This volume analyses exactly how the company pictured passengers in the countryside at the seaside in the urban landscape and in the company's vehicles This thematic approach brings transport and business history thoroughly in line with tourism and leisure history as well as studies in visual culture
