Managing Global Communication in Science and Technology Peter J. Hager, H. J. Scheiber, 1999-11-05 In compiling articles from eighteen professionals in the field of science and technical communication this unique collection updates readers on the evolving theory teaching and practice within the field A framework is provided on the direction practitioners and academicians can focus their research or application on Extensive discussions are provided on the management of the dynamic growth in international and intercultural communication in technical and scientific disciplines Emphasis is also placed on understanding the issues and training for effectiveness **Strategic Management - New Rules for Old Europe** Christian Scholz, Joachim Zentes, 2007-11-05 Perhaps it was not really meant the way it was said but when Donald Rumsfeld used the term Old Europe in his famous speech of January 22 2003 he coined a phrase to depict not the birthplace of modern society but a graveyard of old and outdated ideas Even though it is legitimate for many of us in Europe to oppose the underlying message of going to war in Iraq it makes absolute sense to examine the rules of the game which Europe is currently playing and which it will play in the future In doing so it becomes obvious that important changes are taking place Strategic Management New Rules for Old Europe makes the hidden rules governing strategic management in Europe transparent The book follows a from to logic and takes the reader along the course of changing conditions and contingencies Europe has not only witnessed major transformations such as the dramatic fall of the Iron Curtain economic and monetary integration and the incorporation of new member states Fundamental change can also be perceived with respect to the corporate responses to these ongoing dynamic changes Strategic Management New Rules for Old Europe is divided into four parts Each of these consists of several contributions starting with the focus on people then on culture then on systems
