Nursing In The 70s:

Handbook of Gerontological Services Abraham Monk,1990-06-29 Social Work **A Nurse's Handbook of Spiritual Care** Mary Elizabeth O'Brien,2004 Provides guidance for the spiritual care of all patients with varying ailments **A History of The Male Nurse** Kevin Hargreaves,2019 Nursing until the 1960s and 1970s was seen as a female profession it is only in recent years that men in any number have entered this perceived female bastion It is generally thought or assumed that it has always been women who have been the only nurses through the centuries However with even the most cursory glance at the literature available or even on the Internet it is soon realised that this is not the case It is impossible to talk about or discuss trained nurses per se when there was no actual recognised training available in any shape or form Again it is a general assumption that historically the only trained nurses were female This certainly was not the case but nursing was seen up to quite recently as a job for women mainly because of the social and cultural norms *Arnold and Boggs's Interpersonal Relationships - E-Book* Claire Mallette,Olive Yonge,Elizabeth C. Arnold,Kathleen Underman Boggs,2021-11-15 Now more than ever effective communication skills are key for successful patient care and positive outcomes Arnold and Boggs s *Interpersonal Relationships Professional Communication Skills for Canadian Nurses* helps you develop essential skills for communicating effectively with patients families and colleagues in order to achieve treatment goals in health care Using clear practical guidelines it shows how to enhance the nurse patient relationship through proven communication strategies as well as principles drawn from nursing psychology and related theoretical frameworks With a uniquely Canadian approach and a variety of case studies interactive exercises and evidence informed practice studies this text ensures you learn how to apply theory to real life practice **Nursing in the Seventies** Anne K. Gender at Work Rosemary Pringle, 2020-07-29 Three themes are drawn together in this book: gender and sexuality, the organisation of work and the impact of technological change. Their inter relationship is explored in six area studies: manufacturing, banking, retailing, computing, nursing and housework. *Gender at Work* presents an account of how each area has changed since the Second World War, sets out ways in which the notion of what constitutes proper work for men and women changes with new work processes and analyses the prospects for and limits of sexual equality in the workplace. Based on the first hand observations of workers reflecting on their work experience, this book allows workers to speak for themselves; they reveal the centrality of gender to the way capitalism is organised. A notable contribution both to feminist and labour studies in Australia and further afield. Every woman, whether at home or in the paid workforce, should read this book. It will help her assess exactly what she is and should be worth to the community and how she can help to ensure her true evaluation. *Newcastle Herald*. A very readable book which makes a major theoretical and descriptive contribution to the analysis of gender in Australian Society. *Journal of Industrial Relations*. A convincing demonstration of the central place of gender in the work relationships between men and women. The insights it provides into the underlying causes of the sex division of tasks and the way in which new jobs in any individual setting quickly become sex typed are important for any manager of a mixed workplace. *Practising Manager*

Health Manpower: Adapting in the Seventies Harry Milt, 1971

The Care of Health in Communities Nancy Milio, 1975 Abstract Various aspects of the prospects, activities and limitations of health care programs nationally and internationally are addressed for students and practitioners of health care as they relate various disadvantaged elements of the world population including nations, minorities, the elderly, women, the poor or those geographically isolated from health care opportunities. Ten principal themes are discussed in detail under 4 general sections of the text: 1 health and health care vs environmental factors, the growing disparity and similarities between rich and poor nations; 2 access to and quality and cost of health care services in the US; 3 access to health occupations in the US and 4 access to health care decision making mechanisms for making, implementing and evaluating health care decisions. How alternatives for health care can be modified, legislative provisions, removal of barriers and constraints. The last 3 sections include discussions of international comparisons.
