Grasshoppers & Locusts John Rowley, Olivia Bennett, 1993 **Theoretical Approaches to Biological Control** Bradford A. Hawkins, Howard V. Cornell, 2008-10-14 Biological control is the suppression of pest populations using predators parasitoids and pathogens Historically biological control has largely been on a trial and error basis and has failed more often than it has succeeded However by developing theories based upon fundamental population principles and the biological characteristics of the pest and agent we can gain a much better understanding of when and how to use biological control This book gathers together recent theoretical developments and provides a balanced guide to the important issues that need to be considered in applying ecological theory to biological control It will be a source of

productive and stimulating thought for all those interested in pest management theoretical ecology and population biology
