Dosani, Peter Cross, 2018-08-08 Gone are the days when you present to colleagues with hand drawn overheads *Presenting Health with PowerPoint* shows how you can work through PowerPoint to create effective presentations In an easy to use step by step format it takes you through the components of the European Computer Driving Licence the basic IT qualification and guides you through the text by showing what actually appears on the computer using screenshots toolbar icons mouse and keyboard actions The accompanying CD ROM provides downloadable resources and useful website links *Presenting Health with PowerPoint* is designed for doctors nurses and managers at all levels throughout primary and secondary care who need not have prior knowledge of Microsoft PowerPoint **Handbook of Renal Biopsy Pathology** Alec J. Howie, 2012-12-06 1

This book is meant to be a practical guide to interpretation of renal biopsy specimens Two things follow First the book has much less text than most on renal pathology because only a little is said about pathogenesis and other matters not directly relevant to interpretation nor are diseases mentioned that are not investigated by biopsy such as many developmental disorders nor is there much on rare conditions Large and comprehensive textbooks can be consulted where necessary The second thing is that this book has a different approach from standard texts in pathology These consider each disease separately as identified known defined entities This is excellent if a pathologist knows what to call the disease in a particular specimen and wishes to confirm the diagnosis or find out more about it but is little use if the pathologist has no idea about the diagnosis Most pathologists have experience of the search through many descriptions of diseases in textbooks to try to find the name that seems the most appropriate for the abnormalities in a specimen This book should be seen as a guide into the standard texts that may be used as references for further information once a diagnosis has been made This book tries to help the pathologist by the use of two rules common things are common and diseases present in characteristic clinical ways The book is arranged by clinical presentation rather than by diseases and concentrates on common conditions *New Trends in Cancer for the 21st Century* Antonio Llombart-Bosch, José A. López-Guerrero, Vicente Felipo, 2006-09-28 It is

difficult to imagine anyone who has not heard of cancer This disease can affect families friends or any one of us at any time in our lives Every year nearly 3 million Europeans are diagnosed with cancer leading to around 800 000 deaths per year These deaths occur not only in aging populations but also in children and adults who are in the most active period of their lives This represents a tremendous problem that cannot be ignored by politicians or citizens Fortunately there is a constantly growing awareness that although cancer is a problem to be dealt with by clinicians it should also be the concern of everyone This volume contains the lectures held at the International Symposium on Cancer New Trends in Cancer for the 21st Century Fundamental researchers politicians and representatives from patient coalitions share here their knowledge and interests as well as their concerns and experiences Not only do these papers provide state of the art information on cancer they are also an opportunity to look at the problem from different points of view It can be encouraging to realise that we are not alone in this fight
