Robert R. Redfield

Roman Suhrkamp Taschenbuch Pb 1996:

Imprisoned by History Martin L. Davies, 2009-12-04 This book analyzes what history does in contemporary culture. It argues that contemporary society is in historical terms already historicized, shaped by history and thus history loses sight of the world, seeing it only as a reflection of its own self-image. By illustrating the ways in which history enforces socially coercive attitudes and forms of behavior, the author argues that history is in itself ideological and exists as an instrument of political power. Contending that this ideological function is the normal function of professional academic history, he repudiates the conventional view that only biased or bad history is ideological. By finding history projecting onto the world and getting reflected back at it, the exacting history-focused thinking and behavior on which the discipline and the subject rely, he concludes that history's very normality and objectivity are inherently compromised and that history works only in terms of its own self-interest.

Urban Religion Jörg Rüpke, 2020-02-24 So far, religion has been seen as a cause for dramatic developments in the history of cities; it has contributed to the monumentalisation of centres and/or has given importance to ex-centric places. Very recently, anthropologists have been discovering religion in the contemporary global city. But still awaiting historical investigation is the specific urban character of religious ideas, practices, and institutions, and the role of urban space in shaping this very religion in the course of history. The time span from the Hellenistic age to Late Antiquity was crucial in the establishment of concepts and institutions of religion and witnessed extended waves of urbanisation, Rome being central to this. In addressing this problem, this book fills a significant gap in the scholarship on urban religion across time. Taking seriously the proposition that space is a condition, medium, and outcome of social relations, the development of urban religion in lived urban space and urban culture or urbanity offers a lens onto processes of religious change that have been neglected for the history of religion and for the study of urbanism. The key thesis is that city space engineered the major changes that revolutionised religions. This stimulating book makes use of archaeology and history to address religion as an essential component of urban life in both the past and the present. With a strong basis in the ancient Mediterranean as well as an insightful view of modern urban life, Rüpke emphasizes that the practice and performance of religion at the everyday level is as essential in the creation of an urban ethos as the grand temples and institutions promulgated by the elite. Monica L. Smith, author of *Cities: The First 6,000 Years*. Jörg Rüpke offers a characteristically original and learned series of reflections on some of the many ways in which the history of religions and the history of cities might be entangled. *Urban Religion* offers no single overarching thesis, but it is consistently thought-provoking and suggests many intriguing lines of investigation for the future.
