**The Many Paths of Change in International Law** Nico Krisch,Ezgi Yildiz,2024-01-22 How does international law change How does it adapt to meet global challenges in a volatile social and political context The Many Paths of Change in International

Law offers fresh theoretically informed and empirically rich answers to these questions. It traces drivers, conditions and consequences of change across the different fields of international law and paints a complex and varied picture very much in contrast with the relatively static imagery prevalent in many accounts today. Drawing on inspirations from international law, international relations, sociology and legal theory, this book explores how international law changes through means other than treaty making. Highlighting the social dynamics through which different areas and institutional contexts have generated their own pathways, it presents a theoretical framework for tracing change processes and the conditions that affect their success. Based on this framework, each contribution illuminates the paths of change we observe in contemporary international law. The explorations centre on strategies, forms, forces and social contexts and draw on primary source material and in-depth case studies. Overall, the volume offers a fascinating account of an international legal order in flux with a dynamic not captured through traditional doctrinal lenses and helps situate change processes and their varied implications in international law and politics. A relevant book for everyone wanting to understand change and its consequences in international law. This is an open access title. It is made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 International licence. It is available to read and download as a PDF version on the Oxford Academic platform.

**Developing New Products and Services** Lawrence Sanders, 2011-10-14. This book will focus on the up-front activities required for product and service differentiation: the learning methodologies that contribute to arriving at that differentiation and the role that technology plays in implementing the process. The book will show how technology factors into such entrepreneurial activities as engaging in business planning and utilizing creativity and innovation and how creative innovation in turn is achieved and enhanced through an understanding of two different modes of learning: learning about and learning by doing. A successful product introduction depends on an efficient supply chain, a strong brand and the ability of a manufacturer or provider to differentiate it successfully in the marketplace. New Product and Services.

Development demonstrates how differentiation this last critical component can be secured by the strategic use of technology and by engaging in two key learning methodologies
