Food and Culture in Contemporary American Fiction Lorna Piatti-Farnell, 2011-07-13 Establishing an interdisciplinary connection between Food Studies and American literary scholarship Piatti Farnell investigates the significances of food and eating in American fiction from 1980 to the present day She argues that culturally coded representations of the culinary illuminate contemporary American anxieties about class gender race tradition immigration nationhood and history As she offers a critical analysis of major works of contemporary fiction Piatti Farnell unveils contrasting modes of culinary nostalgia disillusionment and progress that pervasively address the cultural disintegration of local and familiar culinary values in favor of globalized economies of consumption In identifying different incarnations of the American culinary Piatti Farnell covers the depiction of food in specific categories of American

fiction and explores how the cultural separation that molds food preferences inevitably challenges the existence of a homogenous American identity. The study treads on new grounds since it not only provides the first comprehensive study of food and consumption in contemporary American fiction but also aims to expose interrelated politics of consumption in a variety of authors from different ethnic cultural racial and social backgrounds within the United States.

Food in the Arts Harlan Walker, 1999. A further volume in this series this year discussing not so much food or its preparation as its portrayal in any number of art forms such as popular music crime novels film theatre literature and fine art. There are also some papers which concentrate on the art of food or art relating to food; an instance is the art of tissue paper orange wrappers, a recondite but riveting item. My impression when this subject was first mooted was that all contributions would revolve around paintings and high arts. I was mistaken: there is a remarkable spread: the arrangement of 18th century desserts, cookery and the Cuban Santería religion, drink in 19th century English fiction, food in film noir, the cook as artist in 18th century England, architectural food design in France and Italy, popcorn poetry, food and eating in Brontë novels and much more. These volumes are sometimes indigestible fricassees if swallowed at once but think of them as platters of oysters: each may contain a pearl. By the finish, a bracelet at least, perhaps a necklace is the consequence.

Food Crime Matthew Robinson, 2023-08-11. This book addresses the various forms of deviance and criminality found within the conventional food system. This system, made up of numerous producers, processors, distributors and retailers of food, has significant far-reaching consequences bearing upon the environment and society. *Food Crime* broadly outlines the processes and impacts of this food system, most relevant for the academic discipline of criminology, with a focus on the negative health outcomes of the US diet (e.g. obesity and diabetes) and negative outcomes associated with the system itself (e.g. environmental degradation). The author introduces the concept of food criminology, a new branch of criminology dedicated to the study of deviance in the food industry. Demonstrating the deviance and criminality involved in many parts of the conventional food system, this book is the first to provide exhaustive coverage of the major issues related to what can be considered food crime. Embedded in the context of state corporate criminality, the concepts and practices exposed in this book bring attention to harms associated with the conventional food system and illustrate the degree of culpability of food companies and government agencies for these harms. This book is of interest to students, scholars and practitioners seeking a more just and healthy food system and encourages further future research into food crimes in the disciplines of criminology, criminal justice and sociology.

Dining Room Detectives Silvia Baucekova, 2015-09-04. In the structuralist understanding as proposed by John G. Cawelti, a classical detective novel is defined as a formula which contains prescribed elements and develops in a predefined ritualistic manner. When described in this way, the crime fiction formula very closely resembles a recipe: when one cooks, they also add prescribed ingredients in a predefined way in order to produce the final dish. This surprising parallel serves as the starting point for this book's analysis of classical detective novels by Agatha Christie. Here, a structuralist approach to Golden Age crime fiction is complemented by

methodology developed in the field of food studies in order to demonstrate the twofold role that food plays in Christie's novels namely its function as an element of the formula a literary device but also as a cultural sign Christie employed food on various different levels of her stories in order to portray characters construct plots and depict settings What is more incorporating domesticity and food in her novels helped her fundamentally alter the rigid conventions of the crime fiction genre as it developed in the nineteenth century and enabled her to successfully introduce the character of the female detective and to feminise the detective novel as such
