Meaning Of Reminiscence And Life Review:

The Meaning of Reminiscence and Life Review Jon Hendricks, 2019-04-04 Robert Butler's call for life reviews has exerted a key influence on the way gerontologists have looked at reminiscence and remembering. Widely thought to be a helpful mechanism for integrating past and future, the process of life review needs better specification and evaluation based on sound research. The Meaning of Reminiscence and Life Review brings together both research and application pieces covering the range of possibilities. It examines important controversies and asks: Does it work? and What is the evidence? Given their own voice, what do old people say about looking back? International Perspectives on Reminiscence, Life Review and Life Story Work

Faith Gibson, 2018-11-21 This book collates the latest research developments and evidence base for reminiscence, life review and life story work in a single volume. Charting the wide applications for narrative therapeutic methods, the book emphasises the effectiveness of these approaches with varied people from different cultural backgrounds.

Meaning Pninit Russo-Netzer, Stefan E. Schulenberg, Alexander Batthyany, 2016-12-30 Clinical Perspectives on Meaning Positive and Existential Psychotherapy is an outstanding collection of new contributions that build thoughtfully on the past while at the same time take the uniquely human capacity for meaning making to important new places. From the preface by Carol D. Ryff and Chiara Ruini This unique theory to practice volume presents far reaching advances in positive and existential therapy with emphasis on meaning making as central to coping and resilience, growth and positive change. Innovative meaning based strategies are presented with clients facing medical and mental health challenges such as spinal cord injury, depression and cancer. Diverse populations and settings are considered including substance abuse, disasters, group therapy and at risk youth. Contributors demonstrate the versatility and effectiveness of meaning making interventions by addressing novel findings in this rapidly growing and promising area. By providing broad international and interdisciplinary perspectives, it enhances empirical findings and offers valuable practical insights. Such a diverse and varied examination of meaning encourages the reader to integrate his or her thoughts from both existential and positive psychology perspectives as well as from clinical and empirical approaches and guides the theoretical convergence to a unique point of understanding and appreciation for the value of meaning and its pursuit. Included in the coverage: The proper aim of therapy: Subjective well-being, objective goodness or a meaningful life? Character strengths and mindfulness as core pathways to meaning in life. The significance of meaning to conceptualizations of resilience and posttraumatic growth. Practices of meaning making interventions. A comprehensive matrix: Working with meaning in life in chronic or life threatening disease.

Robinson, Michael Eid, 2017-06-28 This edited volume focuses on different views of happiness and well being considering constructs like meaning and spirituality in addition to the more standard constructs of positive emotion and life satisfaction A premise of the volume is that being happy consists of more than having the right things happen to us it also depends on how we interpret those events as well as what we are trying to achieve Such considerations suggest that cognitive emotional factors should play a fairly pronounced role in how happy we are The present volume pursues these themes in the context of 25 chapters organized into 5 sections The first section centers on cognitive variables such as attention and executive function in addition to mindfulness The second section considers important sources of positive cognition such as savoring and optimism and the third section focuses on self regulatory contributions to well being Finally social processes are covered in a fourth section and meaning related processes are covered in the fifth What results is a rich and diverse volume centering on the ways in which our minds can help or hinder our aspirations for happiness **Advanced Practice Palliative Nursing** Constance Dahlin, Patrick Coyne, Betty

The SAGE Encyclopedia of Abnormal and Clinical Psychology Amy Wenzel, 2017-03-16 Abnormal and clinical psychology courses are offered in

psychology programs at universities worldwide but the most recent major encyclopedia on the topic was published many years ago. Although general psychology handbooks and encyclopedias include essays on abnormal and clinical psychology, such works do not provide students with an accessible reference for understanding the full scope of the field. The SAGE Encyclopedia of Abnormal and Clinical Psychology, a 7-volume A-Z work in print and electronic formats, is such an authoritative work. Its more than 1,400 entries provide information on fundamental approaches and theories, various mental health disorders, assessment tools, and psychotherapeutic interventions, and the social, legal, and cultural frameworks that have contributed to debates in abnormal and clinical psychology. Key features include 1,400 signed articles contained in 7 volumes and available in choice of print and/or electronic formats. Although organized A to Z, the front matter includes a Reader's Guide grouping related entries thematically. Back matter includes a Chronology, Resource Guide, Bibliography, and detailed Index. Entries conclude with References, Further Readings, and Cross References to related entries. The Index, Reader's Guide, themes, and Cross References between and among entries all combine to provide robust search and browse features in the electronic version.

The Spiritual Dimension of Ageing Elizabeth MacKinlay, 2001. Drawing on in-depth interviews with older people, Elizabeth MacKinlay develops an understanding of spirituality that enables the reader to explore the spiritual dimension of ageing and to learn how it contributes to well-being and health in later life. This book will be a useful text for students, trainers, and academics, policy makers, and practitioners in health and social care, as well as religious professionals in hospital, residential, and other caring settings.

Counseling Older Adults John Blando, 2014-04-08. Counseling Older Adults provides an introduction to gerontological counseling, covering theories of aging and their practical application in counseling work with older adults.

Counseling the Contemporary Woman Suzanne Degges-White, Marcela Kopic, Wendy Killam, 2020-05-22. This book provides a comprehensive exploration of the challenges women may face as they navigate the multiple roles that they carry. Attention is given to the unique cultural identities that women embody, and suggestions are provided to help counselors acknowledge the various aspects of each client's intersectional identity. In addition to theory, we provide suggestions for practical application of relevant interventions and strategies for helping women achieve their goals. A foundation is provided that explores the multiple layers of development that occur during adolescence, adulthood, midlife, and older adulthood. Women face numerous challenges related to identity development and relationships. These challenges can generate psychological and emotional distress that lead women to seek professional assistance in finding solutions to their issues. With more choices than in generations past, women can face unexpected and unanticipated challenges and barriers to their individual and relational development. This book is organized around contemporary developmental and relational rites of passage women experience in adulthood. Traditional rites of passage include birth, menarche, marriage, and death. These events still hold significance, but women's lives today follow expanded and complex trajectories. Numerous transitions, such as attending college, navigating

employment opportunities and the relational challenges that women face in various areas of life are presented and addressed in this book from a clinician's perspective providing practitioners with insight and practical knowledge. In this book we cover choices related to such topics as career relationships, parenthood and support networks. We also explore the struggles that women face including abuse, depression, anxiety, feelings of low self-worth, loss, and addictions. Best practices in counseling women are highlighted and utilized in case study examples. The relationships created by women impact their lives and this book helps the reader to gain insight into how women can take ownership for their relationships and choices. **Inpatient**

Geriatric Psychiatry Howard H. Fenn, Ana Hategan, James A. Bourgeois, 2019-06-07. This book offers mental health guidelines for all medical professionals facing the emerging challenges presented by an aging population worldwide. The text acknowledges that as the geriatric demographic grows, limited resources and infrastructures demand quality protocols to deliver inpatient geriatric psychiatric care and that many physicians may not be trained to address these specific needs. This text fills this gap with guidelines assessing, diagnosing, and treating aging patients as they present in the emergency room and other settings. Unlike any other text, this book focuses on how to optimize the use of the inpatient setting by recommending evaluations and treatments and offering flow charts and figures of key points to guide both general workup and continued evaluation and treatment. This approach aims to minimize instances of premature release or readmissions and to improve outcomes. Chapters cover the various issues that clinicians face when working with an older patient, including legal topics, limitations to treatment, prescription-related complications, patients struggling with substance abuse, and various behavioral concerns. Written by experts in the field, the text takes a multidisciplinary approach to deliver high-quality care as needs of the aging population evolve. **Inpatient Geriatric Psychiatry** is a vital resource for all clinicians working with an aging population, including geriatricians, psychiatrists, neurologists, primary care providers, hospitalists, psychologists, neuropsychologists, emergency room and geriatric nurses, social workers, and trainees.
