Men, Medicine & Water Raymond G. Taylor, 1982-01-01 **William Mulholland and the Rise of Los Angeles**

Catherine Mulholland, 2002-05-06 Mulholland presided over the creation of a water system that forever changed the course of Southern California's history. In the first full-length biography of the water and civil engineer, his granddaughter provides insights into the triumphant completion of the Owens Valley Aqueduct and the San Francisquito Dam tragedy that ended his career. Archival photos, 7 maps. The Mirage Factory Gary Krist, 2019-05-14 From bestselling author Gary Krist, the story of the metropolis that never should have been and the visionaries who dreamed it into reality. Little more than a century ago, the southern coast of California, bone-dry harbor, less isolated by deserts and mountain ranges, seemed destined to remain scrappy farmland. Then, as if overnight, one of the world's iconic cities emerged. At the heart of Los Angeles' meteoric rise were three flawed visionaries: William Mulholland, an immigrant ditch digger turned self-taught engineer, designed the massive aqueduct that would make urban life here possible; D.W. Griffith, who transformed the motion picture from a vaudeville house novelty into a cornerstone of American culture, gave L.A. its signature industry; and Aimee Semple McPherson, a charismatic evangelist who founded a religion, cemented the city's identity as a center for spiritual exploration. All were masters of their craft, but also illusionists of a kind. The images they conjured up of a blossoming city in the desert, of a factory of celluloid dreamworks, of a community of seekers finding personal salvation under the California sun, were like mirages liable to evaporate on closer inspection. All three would pay a steep price to realize these dreams: in a crescendo of hubris, scandal, and catastrophic failure of design that threatened to topple each of their personal empires. Yet when the dust settled, the mirage that was L.A. remained. Spanning the years from 1900 to 1930, *The Mirage Factory* is the enthralling tale of an improbable city and the people who willed it into existence by pushing the limits of human engineering and imagination. **Bibliography of**

Material Dreams Kevin Starr, 1990-04-12 Kevin Starr is the foremost chronicler of the California dream, and indeed one of the finest narrative historians writing today on any subject. The first two installments of his monumental cultural history, *Americans and the California Dream*, have been hailed as mature, well-proportioned, and marvelously diverse and diverting. The *New York Times Book Review* and rich in details and alive with interesting and sometimes incredible people. Los Angeles Times Now in *Material Dreams*, Starr turns to one of the most vibrant decades in the Golden State's history: the 1920s, when some two million Americans migrated to California, the vast majority settling in or around Los Angeles. In a lively and eminently readable narrative, Starr reveals how Los Angeles arose almost defiantly on a site lacking many of the advantages required for urban development, creating itself out of sheer will. The Great Gatsby of American cities. He describes how William Ellsworth Smyth, the Peter the Hermit of the Irrigation Crusade, the self-educated Irish engineer William Mulholland, who built the main aqueducts to Los Angeles, and George Chaffey, who diverted the Colorado River, transforming desert into

the lush Imperial Valley brought life supporting water to the arid South He examines the discovery of oil the boosters and land developers the evangelists such as Bob Shuler the Methodist Savanarola of Los Angeles and Aimee Semple McPherson and countless other colorful figures of the period There are also fascinating sections on the city s architecture the impact of the automobile on city planning the Hollywood film community the L A literati and much more By the end of the decade Los Angeles had tripled in population and become the fifth largest city in the nation In *Material Dreams* Starr captures this explosive growth in a narrative tour de force that combines wide ranging scholarship with captivating prose

Left in the Dust Karen Piper,2015-03-03 An intensely personal story crossed with a political potboiler *Left in the Dust* is a unique and passionate account of the city of Los Angeles s creation cover up and inadequate attempts to repair a major environmental catastrophe Owens River which once fed Owens Lake was diverted away from the lake to supply the faucets and sprinklers of Los Angeles The dry lakebed now contains a dust saturated with toxic heavy metals which are blown from the lake and inhaled by unsuspecting citizens throughout the Midwest causing major health issues Karen Piper one of the victims who grew up breathing that dust reveals the shocking truth behind this tragedy and examines how waste and pollution are often neglected to encourage urban growth while poor non white and rural areas are forgotten or sacrificed

Floodpath Jon Wilkman,2016-01-05 A visionary and controversial search for water made Los Angeles possible But the failure of the St Francis Dam remains an urgent lesson about our human limits all but forgotten today
