Hodapp, 1986-08-29 Understanding Mental Retardation draws on our knowledge of normal development to inform their discussion of various aspects of retardation Mental Retardation Mary Beirne-Smith, James R. Patton, Shannon H. Kim, 2006 This book provides educators with the most current information about the many facets of mental retardation and intellectual disabilities from a life cycle perspective The authors also show relationships between theory and practice decode the terminology used in the field and relate these terms and concepts to the reality of the classroom the world of work and the life of the community **What is Mental Retardation?** Harvey N. Switzky, Stephen Greenspan, 2006 What is Mental Retardation is a rare peek into the divergent and at times contentious points of view among the world s leading researchers on what the condition of mental retardation is and how it should be defined measured and implemented in the 21st century This candid and insightful collection of 21 essays features expert opinion on issues ranging from whether mental retardation really is a slowing of mental development and what the disability should be called to how cultural norms affect the definition of the condition worldwide and lessons learned from the Atkins v Virginia case The definitions of mental retardation published from 1921 2002 by the American Association on Intellectual and Developmental Disabilities provide the backdrop for this powerful discussion Mental Retardation: an Educational Viewpoint Oliver P. Kolstoe, 1972 **Embarking on a New Century** Robert L. Schalock, Pamela C. Baker, M. Doreen Croser, 2002 Captures the challenging and controversial era between 1975 2000 that led the field of intellectual disability into an age of community acceptance and inclusion This title includes chapters that focus themes such as public policy and health care Labeling the Mentally Retarded Jane R. Mercer, 2022-04-29 This eight year study of an American city traces the answer to the question Who is retarded by analyzing the labeling process in a large number of community agencies Data for the study are drawn from a representative sample of 7 000 persons under fifty years of age who were tested and screened

for symptoms of mental retardation The author finds that that schools label more persons as mentally retarded than any other agency and share their labels more widely with others in the community Relying on IQ test scores for diagnosis schools place many persons with scores above 70 and with no physical disabilities in the role of retardate The author contends that both the statistical model of normal and the uncultural viewpoint of educators and clinicians work to the disadvantage of the poor and the ethnic minorities Given the opportunity many persons demonstrate by their ability to cope with the problems in other areas of life that they are not comprehensively incompetent The author makes several policy recommendations First she suggests lowering the IQ score cutoff point used by schools in determining who shall be labeled as retarded Second she recommends that the clinicians use the two dimensional definition of retardation proposed by the American Association of Mental Deficiency subnormality in both intellectual performance and adaptive behavior Third she concludes that pluralistic assessment procedures must be employed to take into account cultural biases in IQ tests designed to measure cognitive skills This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1973 Mental Retardation United States. Mental Retardation, what is That?. Texas. Department of Mental Health and Mental Retardation, 1976 **Mental Retardation**, 1970 Handbook of Autism and Pervasive Developmental Disorders, Diagnosis, Development, Neurobiology, and Behavior Fred R. Volkmar, Rhea Paul, Ami Klin, Donald J. Cohen, 2005-04-29 Now expanded to two volumes this invaluable reference work provides a comprehensive review of all information presently available about these disorders drawing on findings and clinical experience from a number of related disciplines such as psychiatry psychology neurobiology pediatrics etc The Handbook covers descriptive and diagnostic characteristics biological contributions intervention techniques legal and social issues The Third Edition is updated to include the newest work in animal models genetics neuropsychological processes screening and assessment methods **Mental Retardation** Jerome H. Rothstein, 1971 *Inside Out* Robert Bogdan, Steven J. Taylor, 1982-12-15 We have to assume that the mind is working no matter what it looks like on the outside We can't just judge by appearance If you take away the label they are human beings Ed Murphy What does it mean to be mentally retarded Professors Bogdan and Taylor have interviewed two experts Ed Murphy and Pattie Burt for answers Ed and Pattie former inmates of institutions for the retarded tell us in their own words Their autobiographies are not always pleasant reading They describe the physical mental and emotional abuses heaped upon them throughout their youth and young adulthood being spurned neglected and ultimately abandoned by family and friends being labelled and stigmatized by social service professionals armed with tests and preconceptions being incarcerated and depersonalized by the state Ed and Pattie survived these experiences evidence perhaps of the indefatigable will of the human spirit to assert its essential

humanity but the wounds they have suffered and the scars they bear have not been overcome. They are now contributing independent members of society but the stigma of mental retardation remains. Their stories are both true and representative powerful indictments of our knowledge of our thinking about and our ministrations to the mentally handicapped. The interviewers argue that Ed and Pattie challenge the very concept of mental retardation. Retardation they assert is an imaginary disease; our attempts to cure it are a hoax. Read Ed's and Pattie's accounts and judge for yourself. *Mental Retardation* National Research Council, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on Disability Determination for Mental Retardation, 2002-07-09. Current estimates suggest that between one and three percent of people living in the United States will receive a diagnosis of mental retardation. Mental retardation, a condition characterized by deficits in intellectual capabilities and adaptive behavior, can be particularly hard to diagnose in the mild range of the disability. The U.S. Social Security Administration (SSA) provides income support and medical benefits to individuals with cognitive limitations who experience significant problems in their ability to perform work and may therefore be in need of governmental support. Addressing the concern that SSA's current procedures are consistent with current scientific and professional practices, this book evaluates the process used by SSA to determine eligibility for these benefits. It examines the adequacy of the SSA definition of mental retardation and its current procedures for assessing intellectual capabilities, discusses adaptive behavior and its assessment, and advises on ways to combine intellectual and adaptive assessment to provide a complete profile of an individual's capabilities and clarifies ways to differentiate mental retardation from other conditions. Understanding Mental Retardation Patricia Ainsworth (M.D.), Pamela C. Baker, 2004. CONSUMER HEALTH: What measures can parents and advocates take to insure that people who have mental retardation live full, rewarding lives from infancy to old age? Understanding Mental Retardation explores a diverse group of disorders from their biological roots to the everyday challenges faced by this special population and their families. With parents and those who care for people who have mental retardation in mind, Patricia Ainsworth and Pamela C. Baker write in a style that is at once accessible, informative, and sympathetic to the concerns of those affected. The authors provide practical information that will assist families and other advocates in obtaining needed services. They discuss assessment and treatment, education and employment, social and sexual adjustment, as well as regulatory and legal issues. This book covers the causes of mental retardation, the signs and symptoms of the most common forms of these disorders, and issues of prevention. For the sake of comparison, the book describes basic concepts of normal human development and references the history of Western civilization's responses to those with mental retardation. Understanding Mental Retardation sheds new light on mental illnesses that can complicate the lives of those with mental retardation and the way symptoms of mental illness may appear confused or masked in a patient with mental retardation. Along with information on treatments and diagnoses, the book offers contact information for governmental resources as well as a brief summary of the legal issues pertaining to mental

retardation in America Patricia Ainsworth is an assistant professor of psychiatry and human behavior at the University of Mississippi Medical Center and has a private practice in Ridgeland Mississippi She is the author of *Understanding Depression* University Press of Mississippi Pamela C Baker is director of the South Mississippi Regional Center in Long Beach Mississippi She is also an independent consultant in management and disabilities administration and co editor of *Embarking on a New Century Mental Retardation at the End of the 20th Century*

Equal Treatment for People with Mental Retardation Martha A. Field, Valerie A. Sanchez, 2009-07-01 Engaging in sex becoming parents raising children these are among the most personal decisions we make and for people with mental retardation these decisions are consistently challenged regulated and outlawed This book is a comprehensive study of the American legal doctrines and social policies past and present that have governed procreation and parenting by persons with mental retardation It argues persuasively that people with retardation should have legal authority to make their own decisions Despite the progress of the normalization movement which has moved so many people with mental retardation into the mainstream since the 1960s negative myths about reproduction and child rearing among this population persist Martha Field and Valerie Sanchez trace these prejudices to the eugenics movement of the late nineteenth and early twentieth centuries They show how misperceptions have led to inconsistent and discriminatory outcomes when third parties seek to make birth control or parenting decisions for people with mental retardation They also explore the effect of these decisions on those they purport to protect Detailed thorough and just their book is a sustained argument for reform of the legal practices and social policies it describes

Inventing the Feeble Mind James W. Trent Jr., 1994-03-16 James W Trent uses public documents private letters investigative reports and rare photographs to explore our changing perceptions of mental retardation over the past 150 years He contends that the economic vulnerability of mentally retarded people and their families more than the claims made for their intellectual or social limitations has determined their institutional treatment

Issues in the Developmental Approach to Mental Retardation Robert M. Hodapp, Jacob A. Burack, Edward Zigler, 1995-01-27 Issues in the Developmental Approach to Mental Retardation is one of the first books exclusively devoted to applying the theories findings and approaches used in work with nonretarded children to several types of retarded individuals The editors and contributors define the developmental approach and explore theoretical issues as they relate to retarded populations Problems involving similar sequences of development cross domain relations the environment and motivation are all discussed as is the importance of separating the various etiological groups for research and intervention purposes The contributors also examine the nature of development in specific etiological groups types of retardation that are addressed include cultural familial retardation Down syndrome fragile X syndrome autism and children with sensory and motor handicaps This significant volume demonstrates how data from nonretarded development can inform work with retarded populations and how findings from children with mental retardation enrich developmental theory
