But Why? Sean Monroe,2011-10-20 Have you ever wondered why we do certain things in mathematics Why do we count decimal points when multiplying with decimals or why do we invert and multiply when multiplying with fractions Or were you frustrated when you asked for a reason why we convert mixed numbers to improper fractions that way and the teacher simply said That is the way I learned how This book attempts to answer these questions along with dozens more If you have ever wondered why we do something in mathematics this is the book for you Here are a few of the mysteries that are unraveled in this book What can t we divide by zero Why do we move the decimal point when dividing by a decimal Why is a negative times a negative a positive Why is any number raised to the zero power equal to zero

Reading, Writing, and Proving Ulrich Daepf,Pamela Gorkin,2011-06-23 This book which is based on P lya s method of problem solving aids students in their transition from calculus or precalculus to higher level mathematics The book begins by providing a great deal of guidance on how to approach definitions examples and theorems in mathematics and ends with suggested projects for independent study Students will follow P lya s four step approach analyzing the problem devising a plan to solve the problem carrying out that plan and then determining the implication of the result In addition to the P lya approach to proofs this book places special emphasis on reading proofs carefully and writing them well The authors have included a wide variety of problems examples illustrations and exercises some with hints and solutions designed specifically to improve the student s ability to read and write proofs Historical connections are made throughout the text and students are encouraged to use the rather extensive bibliography to begin making connections of their own While standard texts in this area prepare students for future courses in algebra this book also includes chapters on sequences convergence and metric spaces for those wanting to bridge the gap between the standard course in calculus and one in analysis

Young Adult Nonfiction Judith A. Hayn,Jeffrey S. Kaplan,Amanda L. Nolen,Heather A. Olvey,2015-11-19 No matter the location schools are guided by standards including Common Core State Standards This

collection of contributions by some of the country's leading literacy experts offers practical suggestions for implementing young adult literature to meet the demand that standards mandate for focusing on nonfiction in teaching literacy. The challenges to CCSS abound and teachers who are currently seeking avenues to reach their students no matter what content they teach will find the strategies and suggestions useful. The text advocates using young adult literature to accomplish content area literacy and is intended as a primer for those who are building curriculum.

Mathematics, Art, Technology and Cinema MIRELLA MANARESI, 2003-07-21

This book is about mathematics. But also about art, technology and images. And above all about cinema, which in the past years together with theater has discovered mathematics and mathematicians. It was conceived as a contribution to the World Year on Mathematics. The authors argue that the discussion about the differences between the so-called two cultures of science and humanism is a thing of the past. They hold that both cultures are truly linked through ideas and creativity, not only through technology. In doing so, they succeed in reaching out to non-mathematicians and those who are not particularly fond of mathematics. An insightful book for mathematicians, film lovers, those who feel passionate about images and those with a questioning mind.
