because they told of much that was new much that was curious and much that was interesting So the Crowd learned many strange things that have happened in Number Land but they learned much more than this for the story teller told them much that was interesting about the way in which boys and girls used to write in centuries long past how Ching wrote on palm leaves and Lugal on bricks About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **Number Stories of Long Ago** D. David Eugene Smith,1919 **Number Puzzles Before the Log Fire** David Eugene Smith,2016-12-21 Excerpt from Number Puzzles Before the Log Fire Being Those Given in the Number Stories of Long Ago In the author s Number Stories of Long Ago these number puzzles were given without solutions In prepar ing that little work for the pupils in the elementary school it was felt that much of the interest in the puzzles would be lost if any explanation were given in the text It is evident however that the solutions of all the problems should be made somewhere available and for that reason this pamphlet has been prepared The puzzles which appear in Chapters IX and X of Number Stories are here reproduced but for evident reasons the precise wording has not been retained State ments that are necessarily extended when a story is being told to children may properly be condensed when a mere list of problems and solutions is being prepared It is hardly necessary to say that the puzzles are not original There is a considerable literature on the subject extending back to the Greek mathematicians and from this historical material selections have been made The side references in black relate to the pages in Number Stories About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **Year Book** National Council of Teachers of Mathematics,1926 Yearbook ,1926
