underlying concepts rather than relying on a set rule for solving problems Now in this first companion volume *Developing Mathematical Reasoning The Strategies Models and Lessons to Teach the Big Ideas in Grades K 2* she demonstrates how counting and additive strategies serve as the foundation for creating efficient accurate and flexible thinkers Everyone is capable of understanding and doing real math This book Gives step by step guidance on how to teach the strategies models and big ideas that foster confidence and long term success preparing students for increasingly complex mathematical challenges Offers the what to do to teach counting addition and subtraction in ways that promote reasoning over rote memorization Provides practical tools such as problem strings models classroom routines and discussion questions designed to implement reasoning based practices Includes supporting resources for creating a classroom culture where students see math as figure out able and gain confidence as mathematical thinkers By addressing common misconceptions about math and providing practical strategies for teaching real math this book shows that everyone can use the mathematical relationships they already know to reason about new relationships In other words everyone can math even the very youngest students Census Reports United States.
