literature first became a distinct body of writing and publishing in the eighteenth century. Until the seventeenth century, children were usually considered as smaller versions of adults. As the notion of childhood as a distinct part of life emerged, a distinct body of literature emerged as well, designed both to entertain and edify this new class of readers. But for much of its history, books written for children were not seen as worthy of scholarly attention. Recently, this has changed, with everyone from literary critics to psychologists to anthropologists to historians studying this incredibly rich outpouring. The Oxford Encyclopedia of Children's Literature is the first multi-volume set to document and interpret the books read by children in the English-speaking world. It includes brief biographies of every major author and illustrator and features essays on all genres of children's literature, individual works, and prominent trends and themes, as well as general essays on the traditions of children's literature in many countries in the world. **The Power of Animals** Brian Morris, 2020-12-22. The multiple ways in which people relate to animals provide a revealing window through which to examine a culture. Western cultures tend to view animals either as pets or food and often overlook the vast number of roles that they may play within a culture and in social life; more generally, their use in medicine, folk traditions, and rituals. This comprehensive and very readable study focuses on Malawi people and their rich and varied relationship with animals, from hunting through to their use as medicine. More broadly, through a rigorous and detailed study, the author provides insights which show how the people's relationship to their world manifests itself not strictly in social relations but just as tellingly in their relationships with animals that in fact, animals constitute a vital role in social relations. While significantly advancing classic African ethnographic studies, this book also incorporates current debates in a wide range of disciplines from anthropology through to gender studies and ecology.
