## **Nurses Under Stress:**

**Nurses Under Stress** Sharol F. Jacobson, H. Marie McGrath, 1983      **Stress, Burnout, and Addiction in the Nursing Profession** Herbert R. Warner, 2014-03-19 This book is about the most common issues that confront a nurse on a daily basis. It can cause him or her heartaches, heartbreaks, and heart troubles. Stress is by far, in my opinion, a leading cause of heart problems, sickness, and depression in this country. In this book, I talk about awareness in our hospitals, clinics, and emergency departments. Everyone should feel comfortable and be confident of the nurse treating you or your loved ones. We must also remember that nurses are also human beings with issues and problems like everyone else in this world. This book is also a valuable asset to any nursing student considering going to nursing school or college to study medicine.      Stress and Coping in Nursing Roy D. Bailey, Margaret Clarke, 2013-11-11 Increasingly, stress as a concept is being used as an explanation of a wide variety of negative phenomena which are experienced by all people but which include nurses in particular and their patients. Nursing has been identified as a high stress profession and one can hardly pick up a nursing journal or even read a newspaper article about nursing without finding the word stress used liberally. Examples of its use are found in relation to sickness, absence rates, high level of nursing staff turnover, discontent in nursing, the effects of unemployment, the effects of overwork, having too much responsibility, having too little responsibility or control, the effects of constantly giving emotionally to others, the causes of illness, the effects of going into hospital, delayed healing, anxiety, depression, and alcoholism. Given the heterogeneous nature of these phenomena, some of which are the diametric opposite of others and that they are clearly being attributed to the one concept stress, then that concept must necessarily be of importance within people's lives. Or is it perhaps just a fashionable, global but ultimately empty explanation? Roy Bailey and I believe that stress is an extremely important concept. Indeed, we would argue that it is a meta-concept rather than a concept which does indeed serve to explain many disparate phenomena.      **Stress, Burnout, and Addiction in the Nursing Profession** Herbert R.
