

Textured Modified Diets

"Dysphagia is when an individual has difficulty swallowing making it hard for them to eat and drink. Their food and drink may need to be modified to make it safer and minimising the risk of choking and aspiration."

The Modified Food Groups

Liquidised

All food items should be prepared separately. It should be completely smooth, passed through a sieve and lump free with a moderately thick liquid consistency. No thin liquid should separate.

Pureed

Food should be smooth, without lumps or separated liquid. It should hold its shape on a spoon and be a mousse like consistency. Extra gravy or sauce should not be added.

Minced and Moist

Food particles should be no bigger than 3mm. Tender and moist with a fine minced consistency with no separated liquid. Extra gravy or sauce should not be added.

Soft and -Sized

Food particles should be no bigger than 15mm x 15mm and soft enough to press down with a fork without regaining shape. Gravy or sauce should be bound within the dish and not served separately.

Easy to Chew

Age appropriate foods that are a soft/tender texture that can be cut with a fork or spoon. No hard, tough, stringy textures with pips, seeds bones or grits.

Regular

Everyday foods of different textures. Chewing required, includes mixed consistencies e.g. cereal with milk, soup with vegetables & sandwiches.

Ingredients to avoid in Levels 3-7 Easy to Chew.

Foods with husks, seeds, pips or fibrous textures. No hard, crunchy or sticky textures. If in doubt pass ingredients through a fine sieve and thicken to correct consistency.

Health A. P. Simopoulos, K. N. Pavlou, Berthold Koletzko, 2001-07 This is the first of two volumes containing the proceedings of the Fourth International Conference on Nutrition and Fitness It presents the latest data on the interrelationships of genes nutrients and physical activity as they influence the phenotype throughout development The human genome was shaped by the environment especially diet and physical activity The phenotype is thus the result of continuous gene environment interactions However new data indicate that the environment has changed enormously especially during the last 100 years so that it is no longer in harmony with the human genome A new discipline is evolving called Nutrigenetics which combines concepts and methods from genetics and nutritional sciences and the term refers to individual variability in response to diet The papers presented make it abundantly clear that we must make a conscious effort to develop in all dimensions the environment particularly diet and physical activity in which the human genome finds its optimal expression This approach of individualized environmental modification is called Euphenics and it must evolve simultaneously with Genomics and the use of genotypic analyses to enhance the quality of medical care for the individual The euphenic approach is essential for the prevention and management of chronic disease These proceedings will be of interest to geneticists nutritionists and dietitians exercise physiologists anthropologists psychologists and psychiatrists pediatricians internists general practitioners health care providers scientists in government and industry policymakers and governmental organizations Interdisciplinary Nutritional Management and Care for Older Adults Ólöf G. Geirsdóttir, Jack J. Bell, 2021-09-10 This open access book aims to primarily support nurses as leaders and champions of multimodal Interdisciplinary nutrition care for older adults A structured approach to fundamentals of nutrition care across Interdisciplinary settings is combined with additional short chapters about special topics in geriatric nutrition The book is designed to provide highly accessible information on evidence based management and care for older adults with a focus on practical guidance and advice across acute rehabilitation and primary and secondary malnutrition prevention settings The cost of malnutrition in England alone has been estimated to be 19.6 billion per year or more than 15% of the total public expenditure on health and social care 65 years The importance and benefit of specialised nutrition care delivered by experts in field is well established for those with complex nutrition care needs However despite the substantial adverse impact of malnutrition on patient and healthcare outcomes specialised management of this condition is often under resourced overlooked and under prioritised by both older adults and their treating teams As an alternative timely efficient and effective supportive nutrition care opportunities may be appropriately implemented by nurses and non specialist Interdisciplinary healthcare team members working together with nutrition specialists and the older adults they care for Practical low risk opportunities should be considered across nutrition screening assessment intervention and monitoring domains for many patients with or at risk of malnutrition Whilst a variety of team members may contribute to supportive nutrition care the nursing profession provide a clear focal point Nurses across diverse settings provide the backbone for Interdisciplinary teamwork and essential patient care The nursing profession should

consequently be considered best placed to administer Interdisciplinary multimodal nutrition care wherever specialist nutrition care referrals are unlikely to add value or are simply not available As such the book is a valuable resource for all healthcare providers dedicated to working with older patients to improve nutrition care

Developmental-behavioral Pediatrics Mark Wolraich, 2008-01-01 Based on the Diagnostic and Statistical Manual for Primary Care Child and Adolescent Version DSM PC this state of the art reference expertly guides you through normal and abnormal development and behavior for all pediatric age groups See how neurobiological environmental and human relationship factors all contribute to developmental and behavioral disorders and know how to best diagnose and treat each patient you see Accurately identify developmental and behavioral problems using the Diagnostic and Statistical Manual for Primary Care criteria and evidence based guidelines Gain a clear understanding of the normal boundaries and variations within specific disorders Make informed therapeutic decisions with the integration of basic science and practical information and recommendations from the Society of Developmental and Behavioral Pediatrics and the American Academy of Pediatrics Avoid legal and ethical implications by consulting the Law Policy and Ethics chapter Download the DSM PC criteria from the included CD as well as tables and illustrations for use in electronic presentations
