Longenecker, David Kritchevsky, Marc K. Drezner, 2012-12-06 There is a unique nutritional commonality developing in research relating to coronary heart disease and cancer The primary aim of this conference was to provide a forum for the leading researchers clinicians educators and administrators in these two fields to present a program on heart disease and cancer which included a the major historical milestones b the present areas of greatest interest in research and therapy c the latest nutritional molecular and biotechnological advances and d a perspective on the most promising areas for future research and therapy Scientists have long contended that research marches on the feet of methodology Thus there are numerous examples of research fields opening secondary to methodological advances Some examples are 1 thin layer and gas liquid chromatography which along with high pressure liquid chromatography have broadened the line of advances in lipid research and 2 peR and the resultant impact on molecular biological approaches to several fields of science The organizers of this conference thought the time was propitious for bringing together knowledge on newer aspects of molecular biological research with current advances in the two major areas of degenerative disease coronary heart disease and cancer Our knowledge of these killer diseases has expanded greatly in the past few years and the advance has been catalyzed by use of an array of molecular biological techniques Thanks to these medical thinking in these areas is changing from considerations of treatment to strategies for prevention     Multidisciplinary Approach to the Management of Obesity Lalita Kaul, PhD RDN, 2023-11-30 There is an obesity crisis in America It is also becoming a global problem with increased

prosperity enjoyed by many developing countries Because of this many books have been written on this topic But none presents a nice concise multidisciplinary approach to the problem as this book by Dr Lalita Kaul Author has been able to convey the basic information in a simple manner useful for both medical personnel and lay public The clinical consequences of obesity are profound and far reaching Beginning with prevalence in various ethnic groups successive chapters deal with causes health risks and the management of obesity Chapter 13 summarizes the treatment for quick reference The appendices contain valuable information including the caloric content of many commonly used foods nutritional assessment forms food diary ways to measure your servings and behavior modification strategies The appendix on calories in fast foods is a true eye opener Did you know a Big Mac has 570 calories and 35 gm of saturated fat only beaten by the Burger King Whopper with 640 calories and 41 gm of fat No wonder they are called the coronary diet Finally there are healthy delectable low fat recipes for your daily use including a variety of delicious Indian recipes All chapters are well written fully researched and clearly organized with a lot of practical information on how to handle the problem from infancy to old age The many tables and diagrams are useful adjuncts And there is an extensive list of references at the end The chapters dealing with obesity in children are particularly informative since therein lies the root of the problem Also there is an ample discussion on the biology of obesity genes hormones metabolic pathways etc Bariatric surgery now gaining momentum in the United States of America has been given some importance Book also discusses obesity in getting COVID and vitamin D deficiency In short this book answers some of the questions we always ask Why we eat what we eat What happens to all that we eat and What can we do to end this epidemic and more Overall this is a very useful handbook for medical students residents nurses practicing physicians and the lay public
