Nutrition Bob A. Rashidi, Lukas K. Buehler, 2002 This book is an exploration of both traditional and modern scientific views of the relationship between food and health from ancient medicine to modern food guide pyramids and health risk factors Food is not just about taste and identity but definitely beneficial or detrimental to our health and strength Modern medicine while powerful and exact still lacks many insights about traditional knowledge about the healing power of nutrients and herbs What we eat how we eat and when we eat the W H W of nutrition affects our well being and cultural identity This book has been written with an ever increasing flood of information about nutritional values dietary supplements and medicinal plants in mind and to ease any confusion that might exist in the reader s mind *West Meets East* Leslie Grant, James Stronge, Xianxuan Xu, Patricia Popp, Yaling Sun, 2014-04-03 The United States and China two nations drastically different in demographics history political structures and education systems Despite these differences educators in each country have discovered they have much to learn from one another The United States looks east and is captivated by the high assessment scores that many Chinese students achieve China looks west and is enamored with how the United States fosters innovation and creativity in students Teachers are increasingly looking across borders to expand adapt and offer their students a more balanced education *West Meets East* is based on the fundamental premise that strong teaching is at the heart of educational quality and that we all benefit from understanding the practices and professional thinking of exemplary teachers With this in mind Grant and her colleagues set out to discover which beliefs and strategies of effective teachers can cross the cultural divide and help students in each nation make breakthrough advances As educators it s important to understand that even though we re setting new goals and improving outcomes excellence is a moving target In the globally connected 21st century educational innovations in one country can reset the bar for students around the world Only by learning from one another can we be sure all our students remain competitive and successful *West Meets East*, 1988
