Oerke,H.-W. Dehne,F. Schönbeck,A. Weber,2012-12-02 The objective of this book is to provide information to be used as a basis for evaluating the fragile shaky structure of global food production The volume analyses the data by region and by intensity of cultivation and furnishes information about the yield response giving some indication of the health of the plants It will be invaluable to all plant and crop scientists as well as to agriculturalists CULTIVATED PLANTS, PRIMARILY AS FOOD SOURCES -Volume II Gyorgy Fuleky,2009-02-13 Cultivated

Plants Primarily as Food Sources is a component of Encyclopedia of Food and Agricultural Sciences Engineering and Technology Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias Global food demand is forecast to double and possible triple by the year 2050 when more than 10 billion people will need to be fed worldwide To ensure adequate nutrition for this growing population food production must be expanded faster than the population Following a longer introduction chapter with some information on the history of crop production the land used for agriculture the cropping systems and the future trends comes the knowledge in depth The grain and cereal the edible been plants the vegetables and plants for edible starch oil sugar and beverage production the fruits and nuts the fiber forage and industrial crops Each subject contains glossary and bibliography for better and deeper understanding At each important plant the history the production technology the importance of the crop in nutrition of growing population the feeding value some short case stories and the future trends are discussed When considering plant foods in relation to human health it should be remembered that plant foods may also have health value in addition to their nutritional value It would seem possible to modify the composition of plant foods as to improve human health In developing countries poverty leads to food shortage and under nutrition and many populations survive largely on plant based diets In industrialized countries relative affluence leads to over consumption of food and especially to over consumption of animal foods at the expense of plant foods These two volumes cultivated plants primarily as food sources help to get more detailed knowledge to overcome the mentioned problem of the World These volumes are aimed at the following five major target audiences University and College Students Educators Professional Practitioners Research Personnel and Policy Analysts Managers and Decision Makers NGOs and GOs *Beiträge zur tropischen Landwirtschaft und Veterinärmedizin ,1985*

**Application of Vegetation Science to Grassland Husbandry** W. Krause,2013-11-11 WERNER KRAUSE INTRODUCTION GENERAL COMMENTS ON THIS VOLUME The subject Application of vegetation science to grassland husbandry is not limited by geographical boundaries It is pro posed to cover this subject in an internationally applicable work

of reference However to avoid omissions it would have to embrace all the diversity of grassland from the Arctic to the Equator The term application requires that the papers contained herein take into account both generally relevant scientific knowledge and the special needs of practical farming The latter are not satisfied solely by the laws of vegetation science the changing effects of the market politics the distribution of wealth and poverty highly developed technology and the continued use of archaic farming methods must all be considered To try to cover all this adequately in one volume of approximately 550 pages is a hopeless task The editor and the authors had to limit themselves to presenting a selection of problems and attempts to solve them with the aim that these examples should indicate how much vegetation science can contribute to grassland husbandry and the scope of this contribution is broadened by the references quoted The arrangement of the sections within this volume does not lend itself to specific suggestions for the management of individual systems However grassland husbandry can expect to obtain from this work an insight into some overall general relationships which could assist the adviser in the formulation of more specific improvement plans
