*Malaysia@50: Economic Development, Distribution, Disparities* Jomo Kwame Sundaram, Chong Hui Wee, 2013-09-16

Malaysia has grown and changed a great deal since it was formed on 16 September 1963. It was then seen as an unlikely nation hastily put together as a federation of British controlled territories in the region. Brunei's refusal to join at the eleventh hour and Singapore's secession before its second birthday only seemed to confirm such doubts. Yet it has not only survived but even thrived, often cited as a developing country worthy of emulation. Ruled by the same ruling coalition since the mid 1950s, it has been tempting to emphasize continuities and there certainly have been many. Looking back at its last half century, this volume first considers changes in development policy in response to national as well as international developments. The remaining three parts consider how public policy has been influenced by and has in turn influenced economic distribution, public finance and economic federalism. Besides the familiar focus on ethnic disparities, regional and other distribution issues are considered. The discussion of government taxation as well as spending also focuses on distribution implications. Although constitutionally a federation, Malaysia has been more centralized than most federal states. The way forward requires greater sensitivity to the complex political economy of Malaysia's unlikely but nonetheless resilient federation and ruling coalition. This book is published and distributed worldwide by World Scientific Publishing Co Pte Ltd except Malaysia.
