Herodotean Inquiries S. Benardete, 2012-12-06 Herodotus has so often been called since ancient times the father of history that this title has blinded us to the question Was the father of history an historian Everyone knows that the Greek word from which history is derived always means inquiry in Herodotus His so called Histories are inquiries and by that name I have preferred to call them His inquiries partly result in the presentation of events that are now called historical but other parts of his inquiry would now belong to the province of the anthropologist or geographer Herodotus does not recognize these fields as distinct they all belong equally to the subject of his inquiry but it is not self evident what he understands to be his subject the notorious difficulties in the proemium are enough to indicate this If his work presents us with so strange a mixture of different fields we are entitled to ask Did Herodotus understand even its historical element as we understand it Without any proof everyone as far as I am aware who has studied him has assumed this to be so **The Collected Works**

National Role Conception and Neoclassical Realism Guangyi Pan, 2025-06-27 Despite China's alignment with Russia being one of the most significant factors shaping the international order, the dynamics of their historic relationships and, more importantly, the sources of China's alignment policy remain underexplored. In this book, *National Role Conception and Neoclassical Realism*, a synthetic exploration into the Sino-Soviet alignment, Guangyi Pan investigates this question by analysing the changes in China's national role conception from a cross-level perspective. Adding value to existing scholarly works on China's decision-making logic, he examines two critical and dramatic moments in the history of Beijing's alignment policy towards Moscow: the Sino-Soviet split in the 1960s and the normalisation in the 1980s. Based on massive historic documents and archives, he argues that the evolution of Beijing's approach to aligning with Moscow results from its changing perception of China's role in the world platform, especially its role relationship with the Soviet Union. The fundamental logic lies in how China positions itself with the Soviet Union, long serving as a mirror reflecting Beijing's desired roles during pivotal transformations. By developing a more rigorous and coherent framework to analyse role conceptions, Guangyi Pan explores unit-level factors including leader images, elite cohesion, and political culture alongside the impact of systemic stimuli. This approach constructs the complex process of role formation, evolution, performance, and policy outcomes, offering a comprehensive understanding of China's alignment with Russia throughout modern history. Aimed primarily at scholars whose research fields include international

relations theory the Cold War history and politics of China National Role Conception and Neoclassical Realism may also be of interest to foreign policymakers students and political history enthusiasts Sport, Revolution and the Beijing Olympics
