*Visual Literacy* Mark Newman, Donna Ogle, 2019-10-31 *Visual Literacy* examines how teachers can use visuals to improve learning for all students. It provides teachers with a foundation in visual literacy defined as the ability to read, think and communicate with visually presented information. Results of studies of students using visual information indicate that most students are clearly lacking in the tools needed to use visuals effectively. The book orients teachers to visual literacy and the world of visuals. It discusses various classroom tested strategies and activities for all students including second language learners and students with special needs. Stressing visual literacy skills helps students understand a visual more deeply so they can master the content they are learning. Teachers will learn to employ a literacy triad of reading, thinking and communicating to aid students in their study of visuals. First they inquire into the visual reading it for content and context including assessing the authenticity of the document. Second they think about the document by analyzing, interpreting and evaluating it to come up with answers to their inquiry. Graphic organizers help students decipher the content and understand the meaning of the visual document connecting it to prior and future instruction. Third they communicate their findings using visuals.
