Selected Papers Of Wang Yuan Yuan Wang, 2005-06-07 This volume presents a comprehensive collection of Wang Yuan's original important papers which are not available elsewhere since the majority of the papers were published in China. Covering both pure number theory and applied mathematics, this book is important for understanding Wang Yuan's academic career and also the development of Chinese mathematics in recent years since Wang Yuan's work has a wide ranging influence in China. Wang Yuan is a professor and academician of the Chinese Academy of Sciences. He received his honorable Doctorship from Hong Kong Baptist University. He has published 70 papers and ten books. My Mathematical Life Yuan Wang, 2024-03-21 This book is an autobiographical interview with Chinese Academician Yuan Wang on his experience in mathematical research. The book looks back on Wang's collaboration with his teacher Hua Loo Keng and younger scholars offering insights into fruitful cooperation in mathematical research. In this book Yuan Wang's path of studying Goldbach conjecture is revealed in detail from motivation to method. Then his work on algebraic number theory is traced back in a separate chapter. The book ends with two chapters which introduce Wang's interest in history of mathematics and his hobbies outside of mathematical research. Wang shows how a mathematician can in the same time be a historical and popular science writer and in particular a well received calligrapher. The book is intended for undergraduate and graduate students studying number theory. Researchers who are willing to learn from the experience of an established mathematician as well as math amateurs and general audience who are interested in Yuan Wang's life story might also find this book appealing. *Acta Scientiarum Mathematicarum*, 1983 *Popularizing Mathematical Methods in the People's Republic of China* L.K. Hua, Wang, 2012-12-06 Professor Hua Loo Keng is the first person to have undertaken the task of popularizing mathematical methods in China. As early as 1958 he proposed that the application of operations research methods be initiated in industrial production. With his students Yu Ming I Wan Zhe Xian and Wang Yuan Professor Hua visited various transportation departments to promote mathematical methods for dealing with transportation problems and a mass campaign was organized by them and other mathematicians to advance and apply linear programming methods to industrial production in Beijing and in Shandong province. However due to the fact that these methods have limited applications and their computation is rather complex their popularization and utilization in China have so far been restricted to a small number of sectors such as the above mentioned transportation departments. In 1958 Hua Loo Keng proposed the

use of Input Output methods in the formulation of national economic plans Apart from publicizing this method he carried out in depth research on the subject He also gave lectures on related non negative matrix theory pointing out the economic significance of various theoretical results *Hua Loo-Keng* Yuan Wang,1999 The distinguished mathematician Hua Loo Keng led an eventful and interesting life through a particularly difficult period in China This biography originally published in Chinese in 1995 looks in detail at the transformation of Hua from a self taught individual into a world renown mathematician Hua held a prominent position in the contemporary mathematics circle in China and thus this account of his life can be read as an invaluable historical evaluation of the development of mathematics in China especially during tumultuous events such as the Cultural Revolution and the Great Leap Forward Besides giving a vivid illustration of Hua's research work in number theory and of his attitude towards and philosophy behind the learning and teaching of mathematics the author a student and close friend of Hua's delves into the latter's tireless efforts in popularizing mathematics in China until his death in 1985
