The Science of Oneness Malcolm Hollick, 2011-03-16 The Science of Oneness weaves modern science together with experiential spiritual and cultural knowledge It presents a scientifically valid vision of reality that is conscious creative loving and purposeful It balances openness to all sources of knowledge with critical evaluation of their reliability Each chapter offers experiential activities thought provoking questions and guided meditations to stimulate intuitive understanding It provides a coherent world view for cultural creatives and the holism movement [A User's Guide—The Sequel](#) Herb Gruning, 2022-08-30 There is science and there is religion and never the twain shall meet Is that to be the fate of these two disciplines Having one foot in the religious world and the other in the scientific can be as precarious as attempting to remain astride two logs in a river In this sequel to A User's Guide to Our Present World What Everyone Should Know about Religion and Science complexions of what religion and science look like today are investigated It discusses topics from Jesus and family values evangelists who arrive at your door discrimination and racism and the dark side for religion to delicate balances impacting us and the world climate change the pandemic and how ancient structures like Stonehenge and the pyramids could have been built for science The study then turns to theological implications of scientific theories including relativity and quantum Sure to ruffle the feathers of some from both sides the examination focuses on how scientific paradigms fail to cohere with traditional theological doctrines and presents the potentially uncomfortable view that scientific revolutions might warrant a corresponding revolution for theology itself [Looking Glass Sky](#) Deborah Whitaker-Duncklee, 1995 [Feminists and Queer Theorists Debate the Future of Critical Management Studies](#) Alison Pullen, Nancy Harding, Mary Phillips, 2017-04-24 What is CMS and what is its future is a question that has beguiled and frustrated academics within and outside its community Using ideas from feminist and queer theory here authors aim to generate thinking on the future of CMS and ideas of how scholarly communities can engage in working lives differently [Evolutionary Competence](#) M. Montuori, 2023-07-31 [Toward a Dialogue of Understandings](#) Mary Ellen Pitts, 1995 In [Toward a Dialogue of Understandings](#) Mary Ellen Pitts examines scientist Loren Eiseley's unique impact as a thinker and writer [Creativity and the Poetic Mind](#) Jean Tobin, 2004 Creativity and the Poetic Mind mingles the voices of well known writers such as Nikki Giovanni Donald Hall John Koethe Marge Piercy and Robert Pinsky with newer voices and includes engaging excerpts from interviews with thirty eight American poets Within a sustained argument about creative states of mind this book innovatively presents and explores the technique of going to the place as more reliable in writing poetry than waiting for inspiration It explains why poets frequently believe that talking about their own poetry may damage their creativity and why for centuries inspiration has seemed to come from somewhere beyond the poet In addition it discusses the practicality of poets thinking that being creative and writing poetry are two separate skills inspiration is unreliable but experienced poets create daily [Looking Glass Universe](#) John Briggs, F. David Peat, 1986 **The Practice of Constructivism in Science Education**

Kenneth G. Tobin, 2012-11-12 This volume provides a needed elaboration of theories and potential applications of constructivism in science education. Although the term constructivism is used widely, there has been a dearth of materials to guide science educators concerning the potential of constructivism to influence what is done in the field. In fact, there has been a tendency for constructivism to be viewed as a method that can be used in a classroom. This view tends to diminish the power of constructivism as a way of thinking about education and in particular about science education. The chapters in this book address the need to document the theoretical roots of constructivism and to describe how practitioners have applied constructivist oriented beliefs in the practice of K-12 teaching of science and mathematics as well as teacher education. Not only does this book contain different theoretical perspectives on constructivism, but it also features a chapter that critiques constructivism as an epistemology. Specific topics covered include cooperative learning, the negotiation of meaning, problem-centered learning, social construction of knowledge, science in culturally diverse settings, curriculum planning and implementation, and instructional technology. Issues associated with the preparation and enhancement of science teachers and the reform of science education are also explored.

Advances in Drug Research, 1995-09-05 Volume 26 continues the trend of shorter, more frequent volumes. With Volume 25, the series gained a new co-editor, Urs Meyer. While retaining the commitment to publish chapters on therapeutic or chemical classes and on general topics or concepts, the series coverage has expanded to include methodological chapters and new areas of recognized or potential significance to drug research, especially in molecular pharmacology.
