Shrinking Violets and Caspar Milquetoasts Patricia McDaniel, 2003-11 Since World War II Americans attitudes towards shyness have changed The women s movement and the sexual revolution raised questions about communication self expression intimacy and personality leading to new concerns about shyness At the same time the growth of psychotherapy and the mental health industry brought shyness to the attention of professionals who began to regard it as an illness in need of a cure But what is shyness How is it related to gender race and class identities And what does its stigmatization say about our culture In *Shrinking Violets and Caspar Milquetoasts* Patricia McDaniel tells the story of shyness Using popular self help books and magazine articles she shows how prevailing attitudes toward shyness frequently work to disempower women She draws on evidence as diverse as 1950s views of shyness as a womanly virtue to contemporary views of shyness as a barrier to intimacy to highlight how cultural standards governing shyness reproduce and maintain power differences between and among women and men

Yet children presumed to exist outside the professional adult world make their own contributions to it creating and posting unboxing videos for example that provide content for toy marketers. Many adults meanwhile avidly consume entertainment products nominally meant for children. Media industries reincorporate this market disrupting participation into their strategies even turning to adult consumers to pass fandom to the next generation. Derek Johnson presents an innovative perspective that looks beyond the simple category of kids media to consider how entertainment industry strategies invite producers and consumers alike to cross boundaries between adulthood and childhood professional and amateur new media and old. Revealing the social norms reproductive ideals and labor hierarchies on which such transformations depend he identifies the lines of authority and power around which legacy media institutions like television comics and toys imagine their futures in a digital age. Johnson proposes that it is not strategies of media production but of media reproduction that are most essential in this context. To understand these critical intersections he investigates transgenerational industry practice in television co-viewing recruitment of adult comic readers as youth outreach ambassadors media professionals identification with childhood the branded management of adult fans of LEGO and the labor of child YouTube video creators. These dynamic relationships may appear to disrupt generational and industry boundaries alike. However by considering who media industries empower when generating the future in these reproductive terms and who they leave out Johnson ultimately demonstrates how their strategies reinforce existing power structures. This book makes vital contributions to media studies in its fresh approach to the intersections of adulthood and childhood its attention to the relationship between legacy and digital media industries and its advancement of dialogue between media production and consumption researchers. It will interest scholars in media industry studies and across media studies more broadly with particular appeal to those concerned about the current and future reach of media industries into our lives.
