## On Chinese Body Thinking:

On Chinese Body Thinking Kuang Min Wu, 1997 This book uses Western philosophical tradition to make a case for a form of thinking properly associated with ancient China The book s thesis is that Chinese thinking is concrete rather than formal and abstract and this is gathered in a variety of ways under the symbol body thinking The root of the metaphor is that the human body has a kind of intelligence in its most basic functions When hungry the body gets food and eats when tired it sleeps when amused it laughs In free people these things happen instinctively but not automatically The metaphor of body thinking is extended far beyond bodily functions in the ordinary sense to personal and communal life to social functions and to cultivation of the arts of civilization As the metaphor is extended the way to stay concrete in thinking with subtlety becomes a kind of ironic play a natural adeptness at saying things with silences Play and indirection are the roads around formalism and abstraction Western formal thinking it is argued can be sharpened by Chinese body thinking to exhibit spontaneity and to produce healthy human thought in a community of cultural variety On Chinese Body Thinking Wu,2021-11-01 This book uses Western philosophical tradition to make a case for a form of thinking properly associated with ancient China The book s thesis is that Chinese thinking is concrete rather than formal and abstract and this is gathered in a variety of ways under the symbol body thinking The root of the metaphor is that the human body has a kind of intelligence in its most basic functions. When hungry the body gets food and eats when tired it sleeps when amused it laughs. In free people these things happen instinctively but not automatically The metaphor of body thinking is extended far beyond bodily functions in the ordinary sense to personal and communal life to social functions and to cultivation of the arts of civilization As the metaphor is extended the way to stay concrete in thinking with subtlety becomes a kind of ironic play a natural adeptness at saying things with silences Play and indirection are the roads around formalism and abstraction Western formal thinking it is argued can be sharpened by Chinese body thinking to exhibit spontaneity and to produce healthy human thought in a community of cultural variety Thinking through China Jerusha McCormack, John G. Blair, 2015-08-01 In this innovative book Jerusha McCormack and John G Blair introduce China on its own terms By explaining ten key concepts that frame the way most Chinese people think about the world they compare these terms which don't translate readily into English with the ways most of us as Westerners think The book then poses four questions that Westerners routinely ask about China But rather than answer with Western assumptions the authors respond using these ten Chinese key words Not surprisingly the answers differ in startling ways from standard Western responses This intensive bridging work allows those without deep knowledge of China to understand the very different perspectives to be gained by looking at the world through Chinese eyes As each of the ten words maps out new territory the premises of a very dissimilar but equally coherent world view gradually emerge Creating a cultural cartography through both text and image the authors provide readers with a vivid sense of what is uniquely Chinese about China On Metaphoring Wu, 2022-05-20 On Metaphoring engages in a metaphor way to communicate and inter learn among cultures Bundle A describes how metaphor bundles things similar into a group called a notion a category etc How does metaphor bundle things It familiarizes strange things with things that are familiar to enrich old familiar things with new things newly made familiar Such metaphoric bundling creates a new family of knowledge In this order Bundle B characterizes metaphor as the origin of thinking fit as a highway of intercultural communication where there is no shared way of thinking for each culture is a specific way of thinking Bundle C shows how effective metaphor is in interculturally handling various problems of life and thinking How metaphor works to interculture exhibits in fact what metaphor is Such is how cultures understand one another a cultural hermeutic **Landscapes of Memory and Experience** Jan Birksted, 2012-12-06 It has been argued that the history of landscape and of gardens has been marginalized from the mainstream of art history and visual studies because of a lack of engagement with the theories methods and concepts of these disciplines This book explores possible ways out of this impasse in such a way that landscape studies would become pivotal through its theoretical advances since landscape studies would challenge the underlying assumptions of traditional phenomenological theory Thus the history and theory of twentieth century landscape might not only once again share concepts and methods with contemporary art and design history but might in turn influence them A complementary sequel to Relating Architecture to Landscape this volume of essays explores further areas of interest and discussion in the landscape architecture debate and offers contributions from a team of well known researchers teachers and writers The choice of topics is wide ranging and features case studies of modern and contemporary schemes from the USA Far East and Australasia Eastwards Frank Kraushaar, 2010 Eastwards is a collection of essays each of whom focuses on a special aspect or on an episode within the cross cultural narrative that imposes on our minds the terms West and East The volume assembles seventeen essays by eighteen authors divided into three chapters Being the outcome of the first international conference for East Asian studies that was held in the Baltic states in 2008 at the University of Latvia in Riga the volume contains not only contributions by scholars from Vilnius Tallinn and Riga but also rather rare topics like critiques of translation from Japanese and Classical Chinese into Latvian The book contains also an essay on the life and personality of an almost neglected Baltic pioneer in Manchuria **Euro-Asian Encounters on 21st-Century Competency-Based Curriculum Reforms** Weili Zhao, Daniel Tröhler, 2021-07-12 This book offers a geographically unique cultural comparative lens to examine the issue of transnational curriculum knowledge re production Prompted by the ongoing competency based curriculum reforms on a global scale this book examines where global frameworks like the OECD s core competency definitions are rooted and how they are borrowed resisted and or re contextualized in various European states with a Christian foremost Protestant educational cultural heritage and Asian countries with a Confucian educational cultural heritage It highlights the roles that various factors such as history culture religious attitudes ideology and state governance play in nation states re contextualization of global curriculum policies and practices beyond a simplistic and dualistic

globalism power and nationalism resistance dynamic In doing so it provides a global context to better understand individual nation state s continuing curriculum reforms and school practices At the same time it situates individual nation state s latest curriculum reforms and practices within an international community for healthy dialogues and mutual sharing By selecting two educational cultural systems and wisdom Christian Protestant and Confucian it also offers a springboard for international curriculum studies beyond the usual confinement of geopolitical nation state constructs It not only sheds new light on each nation state s curriculum policies and practices but also creates new collaboration spaces within similar and across disparate cultural educational regions With its wide geopolitical and educational cultural scope this book appeals to a global market and can be used in a variety of undergraduate and graduate courses in comparative education history of education curriculum theory school and society and curriculum history A Glossary for Doing Postgualitative, New Materialist and Critical Posthumanist Research Across Disciplines Karin Murris, 2021-12-29 A Glossary for Doing Postqualitative New Materialist and Critical Posthumanist Research Across Disciplines gives novices and experienced researchers clear and comprehensible introductions to theories paradigm shifts and key concepts in postqualitative feminist new materialist and critical posthumanist research The ten authors who have a wealth of experience of teaching and conducting postqualitative research have explored 72 key concepts and binaries Supported by links to the series website https postqualitativeresearch com this user friendly glossary contains short entries of the main concepts binaries and verbs in this field of research The series website gives practical provocations that characterize the postqualitative terrain Disrupting the theory practice divide the Glossary provides a postqualitative reimagining of traditional research processes while guiding readers through the contestation of binaries and innovative concepts The Glossary is an accessible and introductory guide for novice qualitative researchers and is of use to established academics already working with postqualitative approaches It is an indispensable companion to the primary texts and original sources by theorists discussed in this and other books in the series

Embodied Modernities Fran Martin,Ari Larissa Heinrich,2006-07-31 From feminist philosophy to genetic science scholarship in recent years has succeeded in challenging many entrenched assumptions about the material and biological status of human bodies Likewise in the study of Chinese cultures accelerating globalization and the resultant hybridity have called into question previous assumptions about the boundaries of Chinese national and ethnic identity The problem of identifying a single or definitive referent for the Chinese body is thornier than ever By facilitating fresh dialogue between fields as diverse as the history of science literary studies diaspora studies cultural anthropology and contemporary Chinese film and cultural studies Embodied Modernities addresses contemporary Chinese embodiments as they are represented textually and as part of everyday life practices The book is divided into two sections each with a dedicated introduction by the editors The first examines Thresholds of Modernity in chapters on Chinese body cultures in the late nineteenth and early twentieth centuries a period of intensive cultural political and social modernization that led to a series of radical

transformations in how bodies were understood and represented The second section on Contemporary Embodiments explores body representations across the People's Republic of China Taiwan and Hong Kong today Contributors Chris Berry Louise Edwards Maram Epstein Larissa Heinrich Olivia Khoo Fran Martin Jami Proctor Xu Tze lan D Sang Teri Silvio Mark Stevenson Cuncun Wu Angela Zito John Zou China's Education, Curriculum Knowledge and Cultural Inscriptions Weili Zhao, 2018-06-27 With a focus on the role of discourse and language in education this book examines China's educational reform from an original perspective that avoids mapping on Westernized educational sensibilities to a Chinese environment Zhao untangles the tradition modernity division expressed in China's educational language about the body and teacher student difference Exploring the historical and cultural implications of the ways China's schooling is talked about and acted upon Zhao argues that Chinese notion wind feng is a defining aspect of Chinese teaching and learning Incorporating Western and Chinese literature this book explores the language of education curriculum and knowledge on a cross cultural landscape and as cultural inscriptions Merleau-Ponty and Buddhism Gereon Kopf, Jin Y. Park, 2009-08-13 Merleau Ponty and Buddhism explores a new mode of philosophizing through a comparative study of Maurice Merleau Ponty s phenomenology and philosophies of major Buddhist thinkers such as Nagarjuna Chinul Dogen Shinran and Nishida Kitaro Challenging the dualistic paradigm of existing philosophical traditions Merleau Ponty proposes a philosophy in which the traditional opposites are encountered through mutual penetration Likewise a Buddhist worldview is articulated in the theory of dependent co arising or the middle path which comprehends the world and beings in the third space where the subject and the object or eternalism and annihilation exist independent of one another. The thirteen essays in this volume explore this third space in their discussions of Merleau Ponty's concepts of the intentional arc the flesh of the world and the chiasm of visibility in connection with the Buddhist doctrine of no self and the five aggregates the Tiantai Buddhist concept of threefold truth Zen Buddhist huatou meditation the invocation of the Amida Buddha in True Pure Land Buddhism and Nishida s concept of basho In his philosophical project Merleau Ponty makes vigorous efforts to challenge the boundaries that divide philosophy and non philosophy the East and the West experience and concepts the subject and the object and body and mind Combining the Eastern philosophical tradition of Buddhism with Merleau Ponty s phenomenology Merleau Ponty and Buddhism offers an intercultural philosophy in which opposites intermingle in a chiasmic relationship and which brings new understanding regarding the self and the self's relation with others in a globalized and multicultural world Dao Companion to the Philosophy of Mencius Yang Xiao, Kim-chong Chong, 2023-04-11 This book is about the philosophical historical and interpretative aspects of Mencius It explores his influence reception and relevance in China from the third century BCE to the present as well as offers comparative studies of Mencius and major figures in the history of Chinese and Western philosophy With 34 accessible articles written by leading philosophers and scholars the Dao Companion to the Philosophy of Mencius provides both broad pictures and in depth discussions regarding the work of one of the most

important and influential Chinese philosophers It covers his normative ethics meta ethics political philosophy epistemology and moral psychology The last section of the volume Mencius and Western Philosophers Comparative Perspectives explicitly puts him in dialogue with major Western philosophers The Dao Companion to the Philosophy of Mencius serves as an essential volume for college students graduate students and scholars who study and teach Mencius as well as Chinese philosophy and comparative philosophy in general On the "Logic" of Togetherness Kuang-Ming Wu,1998 Building bridges between Asian and Western philosophies Kuang ming Wu provides a novel approach to the self other issue casting it in terms of togetherness It is an essay on a cultural hermeneutics of togetherness and of the homo ecological community of differences cultural and otherwise On the "Logic" of Togetherness Wu,2021-10-25 Building bridges between Asian and Western philosophies Kuang ming Wu provides a novel approach to the self other issue casting it in terms of togetherness On the Logic of Togetherness is a natural sequel to On Chinese Body Thinking Brill 1997 It is an essay on a cultural hermeneutics of togetherness and of the homo ecological community of differences cultural and otherwise Togetherness is the concrete primal that by which we explain and analyze concrete things and situations an intrinsic interactive principle of integrity growth reflection and behavior In five sections this book describes cultural personal argumentative religious and philosophical situations of togetherness thus providing an imaginative examination of its varieties Manifestations Many Robert Cummings Neville, 2016-09-30 Building on his long standing work in metaphysics and Asian philosophy Robert Cummings Neville presents a series of essays that cumulatively articulate a contemporary progressive Confucian position as a global philosophy Through analysis of the metaphysical and moral traditions of Confucianism Neville brings these traditions into the twenty first century According to Confucianism rituals define most of our relations with other individuals social institutions and nature and while rituals make possible the positive institutions of high human civilization they may also lead to harmful behaviors including racism xenophobia and sexism Neville argues that the amendment of rituals that institutionalize oppression is a positive task which should be undertaken from within a skillfully ritualized life rather than in the form of external criticism Confucianism in Neville's hands is a left wing progressive liberal political philosophy one that can address institutionalized oppression and suggest a path for moving forward Comparative Political Theory and Cross-Cultural Philosophy Jin Y. Park, 2009-06-16 Comparative Political Theory and Cross Cultural Philosophy Essays in Honor of Hwa Yol Jung explores new forms of philosophizing in the age of globalization by challenging the conventional border between the East and the West as well as the traditional boundaries among different academic disciplines The essays in this volume examine diverse issues encompassing globalization cosmopolitanism public philosophy political ecology ecocriticism ethics of encounter and aesthetics of caring They examine the philosophical traditions of phenomenology of Hursserl Merleau Ponty and Heidegger the dialogism of Mikhail Bakhtin the philosophy of mestizaje literature and Asian philosophical traditions This rich comparative and cross cultural investigation of philosophy and political

theory demonstrates the importance of cultural and cross cultural understanding in our reading of philosophical texts exploring how cross cultural thinking transforms our understanding of the traditional philosophical paradigm and political theory. This volume honors the scholarship and philosophy of Hwa Yol Jung who has been a pioneer in the field of comparative political theory cross cultural philosophy and interdisciplinary scholarship. In one of his earliest publications. The Crisis of Political Understanding 1979 Jung described the urgency and necessity of breakthrough in political thinking as a crisis and he followed up on this issue for his half century of scholarship by introducing Asian philosophy and political thought to Western scholarship demonstrating the possibility of cross cultural philosophical thinking. In his most recent publications Jung refers to this possibility as transversality or trans uni versality a concept which should replace the outmoded Eurocentric universality of modernist philosophy Jung expounds that in transversality differences are negotiated and compromised rather than effaced and absorbed into sameness. This volume is a testimony to the very possibility of

Harmony in Chinese Thought Chenyang Li, Dascha Düring, Sai Hang Kwok, 2021-03-10 He or harmony has traditionally been a central concept in Chinese thought and to this day continues to shape the way in which people in China and East Asia think about ethics and politics Yet there is no systematic and comprehensive introduction of harmony as has been variously articulated in different Chinese schools This edited volume aims to fill this gap The individual contributions elaborate the conceptions of harmony as these were exemplified in central Chinese schools of thought including Daoism Confucianism Legalism Mohism Buddhism and trace their impact on contemporary Chinese philosophy The volume explores the various meanings and implications of harmony so as to consider its relevance as a value and virtue in the modern world It provides an accessible but substantial introductory work for readers interested in learning about pertinent core concepts and theories in Chinese thought as well as engages specialists in Chinese philosophy by explicating its implications for ethical political epistemological and metaphysical reflection as the basic point of reference Curriculum Challenges and Opportunities in a Changing World Bill Green, Philip Roberts, Marie Brennan, 2021-03-18 This book brings together voices and perspectives from across the world and draws in a new generation of curriculum scholars to provide fresh insight into the contemporary field By opening up Curriculum Studies with contributions from twelve countries including every continent the book outlines and exemplifies the challenges and opportunities for transnational curriculum inquiry While curriculum remains largely shaped and enabled nationally global policy borrowing and scholarly exchange continue to influence local practice Contributors explore major shared debates and future implications through four key sections Decolonising the Curriculum Knowledge Questions and Curriculum Dilemmas Nation History Curriculum and Curriculum Challenges for the Future Daoist Phenomenology Jay Goulding, 2025-05-01 Jay Goulding's Daoist Phenomenology represents a lifelong project of interpolating the works of Martin Heidegger with the interweavings of Daoism and Zen Illustrating styles of reading complex texts from Europe and East Asia Goulding moves away from horizontal reading of simple comparisons on a single plain to vertical

reading as a deep dive of ideas into ancient worlds Vertical Reading is hermeneutic strategy that captures the depth of connection between phenomenology and Daoism especially Heidegger and classical Daoists Laozi and Zhuangzi His method reveals Daoist implications of Dogen's Zen and draws on writing and ideas from popular culture including Jules Verne H P Lovecraft Philip K Dick George Lucas Star Wars universe and martial artist Bruce Lee Original and wide ranging Goulding's interconnected approach to phenomenology and Daoism enhances and promotes further intercultural dialogues between two great traditions in world philosophies 

Ritual and Deference Robert Cummings Neville, 2008-06-13 Ritual and Deference develops Robert Cummings Neville s thesis that contemporary philosophy has much to gain by shaping itself through important themes of the Chinese philosophical traditions especially the themes of ritual and deference Neville here offers a broad and detailed interpretation of the relevance of Confucianism and Daoism to contemporary issues The discussion includes analyses of classical Confucian and Daoist texts especially those of Xunzi and Laozi and of the current scene of English speaking philosophy advancing Chinese themes The book also reflects on the nature of comparative philosophy as such and the role that comparative philosophy has in the ongoing contemporary engagement with globalization the clash of cultures and scientific transformations of the worldviews of diverse civilizations Neville stresses the importance of deferring to the integrity of cultures while still submitting them to normative analysis and criticism
