Money in Imperial Rome Merav Haklai, 2025-05-31 Money in Imperial Rome offers an in depth examination of the institutional framework within which money operated as an economic agent in the Roman empire emphasising its systemic complexity Analyses focus on classical Roman law as reflected in the writings of Roman jurists from the second and early third centuries AD The legal sources are augmented with documentary materials which give independent evidence of actual practice and with Jewish legal sources which give evidence of a separate contemporary legal tradition The work promotes Keynesian claims for the endogenous nature of money and adopts approaches advanced by new institutional economics NIE while its innovative contribution is in suggesting a complexity oriented approach to understanding the conceptual framework that dictated the use of money in private transactions Money is a complex phenomenon in the sense that it allows for new patterns of activity to be created by individuals who adjust their use of it to the continuously evolving system in which they operate The book is divided into four parts The first part is introductory The second part traces a line of thought consistent in legal developments that regulated exchange which perceived money as a unique phenomenon different from all other items therefore specific rules were applied to money and a special role was allocated to it in defining the status of the parties This is detectable for price pretium

in the Roman contract for sale *emptio venditio* remuneration *merces* in the Roman contract for lease and hire *locatio conductio* and Jewish legal rules regarding sales conducted via a mode of acquisition known as acquisition by drawing *qinyan meshikha* The third part examines money as a financial tool It observes the various innovative ways Romans used the instrument of interest Then follows a discussion of regulations regarding interest bearing deposits its flexible application by individuals and the interconnected dynamics within and between three legal traditions operating under Roman regime Roman Jewish and Egyptian Hellenistic laws Investigation then moves to credit money in the Roman world and its capacity to increase the money supply The fourth part offers a summary of the work and some conclusions Money/Space Andrew Leyshon, Nigel Thrift, 2005-06-28 Bringing together in one volume the most important writings of Andrew Leyshon and Nigel Thrift on money and finance including the unpublished classic *Sexy Greedy* this collection examines the economic social and cultural manifestations that go to make up the multiple vision of money Money it seems is the great God of our age It is also an economy a sociology an anthropology and a geography Linking money with the emergent patterns of global spatial order Money Space analyses the restructuring of financial markets in a range of spatial scales global national and local

Understanding Origins Francisco J. Varela, J.P. Dupuy, 2013-03-09 The main intention of this book is to bring together contributions from biology cognitive science and the humanities for a joint exploration of some of the main contemporary notions dealing with the understanding of origins in life mind and society The question of origin is inseparable from a web of hypotheses that both shape and explain us Although origin invites examination it always seems to elude our grasp Notions have always been produced to interpret the genesis of life mind and the social order and these notions have all remained unstable in the face of theoretical and empirical challenges In any given period the central ideas on origin have had a mutual resonance frequently overlooked by specialists engaged in their own particular fields As a consequence this book should be of interest to a wide audience In particular for all those engaged in the social sciences and the philosophy of science it is a unique document since bridges to the natural sciences in a mutually illuminating way are hard to find Whether as a primary source or as inspirational reading we feel this book has a place in every library The material comes from an international meeting held in September 13-16 1987 at Stanford University organized by F Varela and J P Dupuy at the request of the Program of Interdisciplinary Research of Stanford University We are grateful to Rene Girard the Program Director for making it possible with the help of the Mellon Foundation **The Origins of Money in the Iron Age Mediterranean**

World Elon D. Heymans, 2021-08-26 This book reconstructs the origins and spread of precious metal money in the Iron Age eastern Mediterranean 1200-600 BCE In the Active Voice (Routledge Revivals) Mary Douglas, 2013-02-01 First published in 1982 this collection of essays is a reproach to a form of the sociology of religion that treats people as the passive objects of impersonal social influences In opposition to this the author seeks to assert an active voice style of thinking about the relations between individuals and their cultural environment whether in economics history or literary criticism This collection

is assembled with the guiding principle that all the essays touch upon the borderland between economic values and personal judgements of quality Several essays illustrate the theme from the place of economics in anthropology and the place of economic behaviour in sociological and cultural criticism The essay on Cultural bias suggests a systematic method of analysis for investigating social influences on judgement and choice **Money in Motion** Ghislain Deleplace,Edward J.

Nell,2016-07-27 In analyzing money contemporary economics has focused its attention on money s function as a store of value neglecting its role as medium of circulation When circulation is put center stage it becomes apparent that the supply of money does indeed adapt to the needs of trade and does so in many different ways often ways that are difficult for a central bank to control because they reflect the responses of banks and other financial institutions to market incentives But money s role in circulation must be coordinated with its store of value function and both with finance Failure here can lead to instability The essays in this volume by internationally renowned economists cover these issues in original and contrasting analyses presenting the American post Keynesian perspective on the one hand and the point of view of the French Circulation School on the other **The Individual in the Economy** S. Individual in the Economy presents interesting analyses of important human behaviours **Money and the Early Greek Mind** Richard Seaford,2004-03-11 How were the Greeks of the sixth century BC able to invent philosophy and tragedy In this book Richard Seaford argues that a large part of the answer can be found in another momentous development the invention and rapid spread of coinage which produced the first ever thoroughly monetised society By transforming social relations monetisation contributed to the ideas of the universe as an impersonal system fundamental to Presocratic philosophy and of the individual alienated from his own kin and from the gods as found in tragedy
