Totalitarianism, Globalization, Colonialism Harry Redner, 2017-07-05 The century that began in 1914 with the outbreak of the First World War was catastrophic Over the course of that one hundred year span civilizations were destroyed in the Old World the New World and the Third World the latter represented by China India and Islam In Europe the main agent of destruction was totalitarianism in America it was globalization ushered in by modernity and in the non Western world it was colonialism followed later by totalitarianism and globalization Harry Redner examines each of these processes providing theoretical and historical accounts of their emergence He considers the effects of Nazism and Bolshevism on the morale and morals of Europe studies the effects on the United States of the nation's emergence as a major world power and describes the impact of modernization on China India and Islam as they underwent Europeanization Sovietization and Americanization Redner confronts us with a paradox in the midst of unprecedented material affluence and organizational efficiency one that uses advanced technologies and cutting edge scientific knowledge we are also sinking into an unprecedented cultural moral intellectual and spiritual decline He locates the origins of this condition in the violently contradictory processes of the twentieth century **Human and Divine Agency** F Michael McLain, W Mark

Henten, 2002-10-01 The format of the new The Bible in the 21st Century series reflects an international dialogue between experts and graduate students In this book experts on Bible translations present essays on the practices of translating the Bible for the present and the future through Christian and Jewish approaches in Western Europe and North America as well as in the former Eastern Bloc and in Africa Each paper is paired with a response The international contributors here include Adele Berlin John Rogerson Robert Carroll Mary Phil Korsak Everett Fox Jeremy Punt and Athalya Brenner and the debate is prefaced with an introduction by the Editors *J. Roth,2019-08-14 What are the unconscious processes involved in reading literature How does literature influence our psychological development and existential challenges A Psychoanalytic Perspective on Reading Literature offers a unique glimpse into the unconscious psychic processes and development involved in reading The author listens to the free associations of various literary characters in numerous scenarios where the characters are themselves reading literature thus revealing the mysterious ways in which reading literature helps us and contributes to our development The book offers an introduction both to classic literature Poe Proust Sartre Sempr n Pessoa Agnon and more and to the major psychoanalytic concepts that can be used in reading it all described and widely explained before being used as tools for interpreting the literary illustrations The book thus offers a rich lexical psychoanalytic source alongside its main aim in analysing the reader s psychological mechanisms and development Psychoanalytic interpretation of those literary readers opens three main avenues to the reader s experience the transference relations toward the literary characters the literary work as means to transcend beyond the reader s self identity and existential boundaries and mobilization of internal dialectic tensions towards new integration and psychic equilibrium An Epilogue concludes by emphasising the transformational power embedded in reading literature The fascinating dialogue between literature and psychoanalysis illuminates hitherto concealed aspects of each discipline and contributes to new insights in both fields A Psychoanalytic Perspective on Reading Literature will be of great interest not only to psychoanalytic psychotherapists and literature scholars but also to a wider readership beyond these areas of study

Reconsidering Evil Petruschka Schaafsma,2006 The notion of evil is not undisputed in contemporary philosophy and theology The reasons for this vary from aversion to the use of a vague comprehensive term like evil to hesitation at the suggestion of an uncontrollable non human power of force that seems to cling to the idea of evil On the other hand in popular discourse speaking of evil prevails one almost keeps stumbling over allusions to it However such language often seems to be incidental and not a natural part of a whole way of thinking Thus the present situation demands a regauging of the notion of evil Reconsidering Evil attempts this regauging by comparing the nature and status of the theme of evil in four different approaches Paul Ricoeur s approach via symbols and myths of evil provides a focus that enables an analysis and comparison of the highly reflective views of Immanuel Kant Karl Jaspers and Karl Barth who represent an ethical tragic and a non theodician theological view respectively This book sets out to determine whether one can claim that speaking of evil is most at home in a specific way of thinking In the final chapter the notion of the end of evil turns out to be very important for understanding the specific character of a religious view of evil In comparison with Kant s ethical view and Jaspers tragic one the broadest or richest understanding of evil is to be found in a religious context However the comparison of the different approaches also shows the possible dangers of this religious view Thus by means of an in depth analysis and comparison of these thinkers the relevance of the theme of evil for present day philosophy of religion is critically examined

en el peor de los casos ignorarlo es un trabajo vano que nos aleja de lo que somos y desfigura las posibilidades sinceras de nuestra existencia. No afrontar el sufrimiento es no aceptar el mundo. Este libro busca ante todo mostrar la pertinencia filosófica de la problemática general del Mal con preguntas sobre su origen, naturaleza y responsabilidad. Examina además el camino de la consolación, reflexiona la posibilidad real del Mal de un modo dialéctico y analiza la necesidad de pensar de un modo ontológico nuestro presente histórico. Para abordar esta problemática general del Mal se debe esclarecer el rol fundamental del sufrimiento humano y orientar las consideraciones filosóficas de este en la evolución del despliegue histórico del nihilismo occidental.
