### Ntshahle Ntshamseleni

There is in the South century that has possibly contributed most significantly to what may either be described as materialist literatures, critical history, and indigenous movements movements in the Middle East. Its capital, Athens, surrounded some one of the military strongholds of the British Empire surrounded by partly British colonies under a British government which, in constant with mainstream Africa, were prisoners of archaic ideas of social and political life. Surprisingly, it was South Africa that was chosen as a laboratory for testing the ability to create power by the Movement of South African Nationalism (MSAN), one of the three groups of post-Apartheid nationalists, along with Inkatha and the ANC. The MSAN created there a strictly clandestine political organisation — the National Front — to trigger and lead a broad popular armed struggle for liberation.

A five-year armed struggle further enhanced the radicalisation of the MSAN that had originated a diverse range of political action inspired by different ideologies and ethnic consciousness — Nasser's Egypt, Khrushchev's China, the USSR, the world war II socialist movements, revolutionary China, and the Algerian war of liberation. In numerous violent clashes with the state the MSAN made the support base, mainly because it had received the most a broad power base in the international, where it had distinguished many white and black members in its various alien quest. The ideological spectrum, a low level of religiosity, the radicalising influence of collective violence, and the political skills of the leaders of the left wing of the MSAN participated a more surprising critical turn of the newly independent state — to liberation.

Professor Fred Machukweli, author of *South without Africa*, has written that 'no one is better qualified to address this issue than Ntshahle Ntshamseleni, a Marxist specialist long resident in South Africa and personally acquainted with many of its key actors. His account of South African politics in the 1960s draws extensively on interviews and South sources, and sets the analysis in its social and regional context.'

Professor Ntshahle Ntshamseleni is a prominent Marxist scholar who worked in education in Africa and in China and has lived for many years in the South Africa. His long conversations with many of the structures described in this book have allowed him great insight into the more surprising period in African history. Inevitably, his analysis

Willis, Rory McCarthy, Timothy Garton Ash, 2016-01-07 Civil resistance especially in the form of massive peaceful demonstrations was at the heart of the Arab Spring the chain of events in the Middle East and North Africa that erupted in December 2010 It won some notable victories popular movements helped to bring about the fall of authoritarian governments in Tunisia Egypt Libya and Yemen Yet these apparent triumphs of non violent action were followed by disasters wars in Syria anarchy in Libya and Yemen reversion to authoritarian rule in Egypt and counter revolution backed by external intervention in Bahrain Looming over these events was the enduring divide between the Sunni and Shi a branches of Islam Why did so much go wrong Was the problem the methods leadership and aims of the popular movements or the conditions of their societies In this book experts on these countries and on the techniques of civil resistance set the events in their historical social and political contexts They describe how governments and outside powers including the US and EU responded how Arab monarchies in Jordan and Morocco undertook to introduce reforms to avert revolution and why the Arab Spring failed to spark a Palestinian one They indicate how and why Tunisia remained precariously the country that experienced the most political change for the lowest cost in bloodshed This book provides a vivid illustrated account and rigorous scholarly analysis of the course and fate the strengths and the weaknesses of the Arab Spring The authors draw clear and challenging conclusions from these tumultuous events Above all they show how civil resistance aiming at regime change is not enough building the institutions and the trust necessary for reforms to be implemented and democracy to develop is a more difficult but equally crucial task      Allies at the End of Empire David M. Anderson, Daniel Branch, 2017-09-05 The wars of decolonization fought by European colonial powers after 1945 had their origins in the fraught history of imperial domination but were framed and shaped by the emerging politics of the Cold War In all the counter insurgencies mounted against armed nationalist risings in this period the European colonial powers employed locally recruited militias styled as loyalists to fight their dirty wars These loyalist histories have been neglected in the nationalist narratives that have dominated the post decolonization landscape and this book offers the first comparative assessment of the role played by these allies at the end of empire Their experience illuminates the deeper ambiguities of the decolonization story some loyalists were subjected to vengeful violence at liberation others actually claimed the victory for themselves and seized control of the emergent state while others still maintained a role as fighting units into the Cold War The overlap between the history of decolonization and the emergence of the Cold War is a central theme in the studies presented here The collection discusses the categorization of these irregular auxiliary forces after 1945 and presents seven case studies from five European colonialisms covering nine former colonies Portugal Angola the Netherlands Indonesia France Algeria Belgium Congo and Britain Cyprus Kenya Aden South Yemen and Oman This book was originally published as a special issue of the International History Review
