Red Figured Vases Of Apulia Vol 2 Late Apulia:

Patterns in the Production of Apulian Red-Figure Pottery Edward Herring, 2018-10-01 Most of the previous scholarship on Apulian red figure pottery has focused on the cataloguing of collections the attribution of vases to painters and workshops iconographic and stylistic matters and individual vessels and vase forms This partly reflects the history of vase painting scholarship which grew out of antiquarian collecting during the eighteenth and nineteenth centuries and the fact that a full archaeological provenance is not preserved for the overwhelming majority of vessels This book takes a different approach by using a database containing in excess of 13 500 vessels and fragments to identify patterns in the production and decoration of Apulian vases that cast light on the choices made by vase producers and the preferences of their customers Individual chapters consider the popularity of different vessel shapes over time the use of highly generic decorative scenes which are characteristic of Apulian red figure as well as the popularity of scenes of myth images of the gods scenes of the life of the non Greek population of ancient Puglia and those showing funerary monuments As virtually all of the vases in the sample derive from tombs the patterns identified provide insights into the ways in which the ancient populations of South East Italy both Greek and indigenous honoured their dead

Patterns in the Production of Paestan Red-Figure Pottery Edward Herring, 2022-05-10 Most of the previous scholarship on Paestan red figure pottery has focused on the cataloguing of collections the attribution of vases to painters and workshops iconographic and stylistic matters and individual vessels and vase forms This partly reflects the history of vase painting scholarship which grew out of antiquarian collecting during 18th and 19th centuries and partly the fact that a full archaeological provenance is not preserved for the majority of vessels This book uses a database containing in excess of 1 800 vessels and fragments to identify patterns in the production and decoration of Paestan vases that cast light on the choices made by vase producers and the preferences of their customers It considers the popularity of different vessel shapes over time the use of highly generic decorative scenes which are characteristic of Paestan red figure as well as the popularity of scenes of myth images of the gods and scenes of nude and half draped women Paestan red figure is compared with the vessels decorated in Applied Red produced at the same site A comparison is also made between the output of the Paestan red figure industry and that of Apulia As the majority of the vases in the sample derive from tombs the patterns identified provide insights into the ways in which the ancient populations of Paestum and South West Italy commemorated the dead

Art and Crime Noah Charney, 2009-05-14 Through the use of case examples and careful examination this book presents the first interdisciplinary essay collection on the study of art crime and its effect on all aspects of the art world Contributors discuss art crime subcategories including vandalism iconoclasm forgery fraud peace time theft war looting archaeological looting smuggling submarine looting and ransom The contributors offer insightful analyses coupled with specific practical suggestions to implement in the future to prevent and address art crime This work is of critical importance to anyone involved in the art world its trade study and security Art crime has

received relatively little attention from those who study art to those who prosecute crimes Indeed the general public is not well aware of the various forms of art crime and its impact on society at large to say nothing of museums history and cultural affairs And yet it involves a multi billion dollar legitimate industry with a conservatively estimated 6 billion annual criminal profit Information about and analysis of art crime is critical to the wide variety of fields involved in the art trade and art preservation from museums to academia from auction houses to galleries from insurance to art law from policing to security Since the Second World War art crime has evolved from a relatively innocuous crime into the third highest grossing annual criminal trade worldwide run primarily by organized crime syndicates and therefore funding their other enterprises from the drug and arms trades to terrorism It is no longer merely the art that is at stake
