**Modern Housing for America** Gail Radford, 2008-10-03 In an era when many decry the failures of federal housing programs this book introduces us to appealing but largely forgotten alternatives that existed when federal policies were first defined in the New Deal Led by Catherine Bauer supporters of the modern housing initiative argued that government should emphasize non commercial development of imaginatively designed compact neighborhoods with extensive parks and social services The book explores the question of how Americans might have responded to this option through case studies of experimental developments in Philadelphia and New York While defeated during the 1930s modern housing ideas suggest a variety of design and financial strategies that could contribute to solving the housing problems of our own time

**Designing the Green Economy** Brian Milani, 2000-09-20 Designing the Green Economy explores realistically and in detail the world s enormous potential for human and ecological regeneration It also explains why this potential has been suppressed or distorted by industrial institutions thus creating economic crisis growing inequality and environmental destruction The first half of the book looks at the challenge ecological change has represented to capitalism as well as capitalism s repressive response the waste economy as expressed in postwar Fordist capitalism and current trends toward a globalized economy But today the great divide between waste and green economies can be narrowed by emerging legal institutional and market approaches to production and environmentalism In Part II Milani explores the practical and theoretical implications of fully unleashing these new productive forces to create community based ecological economies Milani argues that neither sustainability social justice nor economic stability can be secured without comprehensive redesign of the economy along ecological principles It looks at key sectors of the economy including manufacturing energy and money and finance to illustrate how this redesign can and is taking place through both incremental grassroots initiatives and transformative politics

The Informal American City Vinit Mukhija, Anastasia Loukaitou-Sideris, 2014-05-09 Every day in American cities street vendors spread out their wares on sidewalks food trucks serve lunch from the curb and homeowners hold sales in their front yards examples of the wide range of informal activities that take place largely beyond the reach of government regulation This book examines the informal revolution in American urban life exploring a proliferating phenomenon often associated with developing countries rather than industrialized ones and often dismissed by planners and policy makers as marginal or even criminal The case studies and analysis in The Informal City challenge this narrow conception of informal urbanism The chapters look at informal urbanism across the country empirically and theoretically in cities that include Los Angeles Sacramento Seattle Portland Phoenix Kansas City Atlantic City and New York City They cover activities that range from unpermitted in law apartments and ad hoc support for homeless citizens to urban agriculture street
