Redesigning Teacher Education Alan R. Tom, 1997-01-01 Explores the shortcomings of teacher education and proposes design principles for rethinking teacher preparation Establishes a reform agenda for teacher education faculties Alan Tom is among the best at relating important issues in teacher education and a critical reading of the literature with his own professional experience This book is ambitious It lives up to the claim of examining political and institutional problems along with conceptual and intellectual ones This is something few teacher educators attempt and is a critical area to open up for sustained analysis Drawing upon events from his career as a teacher educator Alan R Tom candidly analyzes the predominant criticisms of teacher education and rejects the common tendency to infer the teacher education curriculum from such ideas as metaphors for teaching or knowledge He proposes eleven design principles to serve as a reform agenda including creating programs capable of self renewal having faculty model the desired image and skills of teaching and rethinking the sequence of practice and theory Each principle identifies a differing dimension for the conceptual and structural redesign of teacher preparation Four specific change strategies are evaluated as well task force top down piloting and family style The low status of teacher educators and the excessive regulation of teacher education are also examined as is the failure to give adequate attention to the administrative organization for teacher education

Redesigning Teaching William A. Firestone, Beth D. Bader, 1992-01-01 Redesigning Teaching provides concrete case studies of school districts implementing teacher reforms The cases describe the changes give the history and dynamics of each project examine how teachers respond to new policies and procedures and tell how state policy affects local efforts to change teaching The book also suggests that while short term improvements can be accomplished through bureaucracy serious reform requires professionalization The authors identify challenges that state governments school administrators and teachers associations must face if they really want to professionalize teaching

the exercises by yourself but perhaps more importantly with others to stimulate conversations about how you can build upon what you are already doing well to make your program even better

Libraries of The New York Public Library **Subject Guide to Books in Print** ,1993 *American Book Publishing Record* ,2004 Giving Space to African Voices Zehlia Babaci-Wilhite,2014-08-07 This book sets out to bring voices of the South to the debate on localization of education and makes the case that it should be considered a right in education Despite all the scientifically based evidence on the improved quality of education through the use of a local language and local knowledge English as a language of instruction and Western knowledge based curriculum continue to be used at all educational levels in many developing nations This means that in many African countries the goal of rights to education is becoming increasingly remote let alone that of rights in education With this understanding and with the awareness of the education challenges of millions of children throughout Africa the authors argue that local curriculum through local languages needs to be valued and to be preserved and that children need to be prepared for the world in a language that promotes understanding The authors make a clear case that policy makers are in a position to work towards a quality education for all as part of a more comprehensive right based approach We owe it to the children of the South to offer the best quality education possible in order to achieve social justice **The British National Bibliography** Arthur James Wells,2006 *YC Young Children* ,2007
