**Joy at Birth** Susan Crowther, 2019-09-02 To be at the birth of a baby is special yet there is an increasing secularisation and reliance on technology in contemporary maternity care particularly in the western context Through exploration of experiences at birth this book explores joy at birth which is often ignored and overlooked beyond the activities that help to ensure survival This book draws on a collection of stories of birth from mothers birth partners obstetricians and midwives that demonstrate joy at birth across professional groups and in different types of births and locations with or without technological interventions Each chapter introduces stories of joy that highlight embodied spatial and relational meanings Employing the Heideggerian notion of a human being it sketches out an ontological focus that draws our gaze to the everyday taken for granted ways of being at birth Based on phenomenological experiential data and rigorous interpretive analysis underpinned by seminal philosophical writings this book calls for readers to attend to

the wholeness of birth in all situations and at all births in ways not attempted before It will be of great interest to midwives and those working in and studying maternity obstetrics and neonatology as well as social and medical anthropology sociology cultural organisational and clinical psychology and spirituality

**Evidence Based Midwifery** Helen Spiby, Jane Munro, 2009-10-13 Evidence based practice is now widely accepted as a fundamental tenet of midwifery The importance of evidence in defining midwifery policy and practice in the UK health system and others is acknowledged and enduring While the development and evaluation of research in midwifery is well charted the question of how such evidence is incorporated into practice has to date received less attention and discussion in the midwifery profession Answering this need Evidence Based Midwifery focuses on the dissemination and use of evidence for midwifery practice and explores midwives experiences in using the evidence base to inform policy and enhance clinical practice Written by a highly regarded and diverse group from the UK and international midwifery community Evidence Based Midwifery addresses issues of relevance to all midwives whether clinical practitioners or educators students or supervisors researchers or managers Issues that influence evidence based midwifery are discussed and topics covered include problem based learning implementation of evidence based guidelines and the involvement of service users Edited by founder members of the Evidence Based Midwifery Network International collaboration with contributions from the UK Greece Canada and the Netherlands Primary focus on the incorporation of evidence into midwifery practice Real life examples throughout

Epp,2019-09-01 This edited collection examines conflicting assumptions expectations and perceptions of maternity in artistic cultural and institutional contexts Over the past two decades the maternal body has gained currency in popular culture and the contemporary art world with many books and exhibitions foregrounding artists experiences and art historical explorations of maternity that previously were marginalized or dismissed In too many instances however the maternal potential of female bodies whether realized or not still causes them to be stigmatized censored or otherwise treated as inappropriate cultural expectations of maternity create one set of prejudices against women whose bodies or experiences do align with those same expectations and another set of prejudices against those whose do not Support for mothers in the paid workforce remains woefully inadequate yet in many cultural contexts social norms continue to ask what is wrong with women who do not have children In these essays and conversations artists and writers discuss how maternal expectations shape both creative work and designed environments and highlight alternative ways of existing in relation to those expectations

treated as mute or neutral backdrops to maternal history but as a series of vital entangled atmospheres materials practices and objects that are produced by and in turn produce particular social and political conditions gendered structures and experiences Moving across spaces systems protagonists and their subjectivities the book shows how hospital design and protocol altered ordinary birth at home and continues to shape maternal spatial experience today As such it will be of interest to a wide range of readers from architectural historians theoreticians designers and students to medical humanities historians to English Literature humanities and material studies scholars as well as those interested in creative critical writing
