Redistribute Values Not Wealth:

The Political Economy of Fortune and Misfortune Scott Timcke, 2023-03-31 Luck greatly influences a person's quality of life. Yet little of our politics looks at how institutions can amplify good or bad luck that widens social inequality. But societies can change their fortune. Too often debates about inequality focus on the accuracy of data or modelling while missing the greater point about ethics and exploitation. In the wake of growing disparity between the 1% and other classes, this book combines philosophical insights with social theory to offer a much needed political economy of life chances. Timcke advances new thought on the role luck plays in redistributive justice in 21st century capitalism. **Boundaries and Justice** Sohail H. Hashmi, David Miller, 2021-05-11 Despite the supreme political and economic significance of boundaries and ongoing challenges to existing national boundaries, scant attention has been paid to their ethics. This volume explores how diverse ethical traditions understand the political and property rights reflected in territorial and jurisdictional boundaries. It is the first book to bring together thinkers from a range of traditions, both religious and secular, to discuss the ethics of boundaries. Each contributor represents a tradition's views on questions surrounding the use of boundaries to delimit property and political rights. What does it mean to own something? What resources should not be privately owned? What justifies the erection of political boundaries between one people and another? How hard should such boundaries be? What rights extend to minorities within a state? Should territorial boundaries coincide with social ones? Does national autonomy have an ethical basis or is it an aspect of modern power politics? Should we aim for a more inclusive community than that afforded by modern nation states? Cross chapter dialogue and a substantive conclusion draw out similarities and differences among the traditions represented. Traditions that include Christianity, classical liberalism, Confucianism, international law, Islam, Judaism, liberal egalitarianism, and natural law. In addition to the editors, the contributors are Nigel Biggar, Joseph Boyle, Joseph Chan, Russell Hardin, Will Kymlicka, Loren Lomasky, Robert McCorquodale, Richard B. Miller, David Novak, Sulayman Nyang, Michael Nylan, Raul C. Pangalangan, Daniel Philpott, Jeremy Rabkin, Hillel Steiner, M. Raquibuz Zaman, and Noam J. Zohar. **Social Classes and Political Order in the Age of Data** Georges Kotrotsios, 2022-09-28 Our lives are changing today, but what is the single most important factor driving these changes? This question is crucial because attempting to answer it can guide us to an understanding of the processes that are impacting our societies. The answer will, of course, come from the historians of the future, but there is already no doubt that the advent of data is behind a radical shake-up of our way of living. Monetary assets, infrastructure, equipment, and human labor all allow wealth to be created. Data does too, and it is reasonable to consider a new production factor in this regard: data capital. This book argues that this new production factor generates innumerable economic opportunities of a nature unthought of a mere twenty years ago. These opportunities have led to the creation of a new social class composed of two subclasses: data workers and data owners. The emergence of this new class repositions existing classes, including the traditional working class and the capitalist class, creating strong divergences that

threaten social cohesion What can we do to ensure cohesion and the proper functioning of society The book argues for the establishment of a regulatory framework and the institutions necessary if we are to open data up and where appropriate exchange and trade it all on a global scale In this regard the state today still playing its traditional role of framework setter and savior when crises loom can become an active economic player thus creating wealth for communities **Torts, Egalitarianism and Distributive Justice** Tsachi Keren-Paz,2018-12-20 This book argues from a normative perspective for the incorporation of an egalitarian sensitivity into tort law and more generally into private law It shows how an egalitarian sensitivity can reformulate tort doctrine with an emphasis on the tort of negligence Rather than a comprehensive descriptive account of existing tort law this book pro actively searches for new approaches and conceptual tools to meet the challenges faced by egalitarians The understanding of tort law offered in this book will bring about better practical results in specific cases It supports the progressive troops in the ongoing philosophical and social battles that take place in the field of tort law and also adds another voice rich nuanced and sensitive to the chorus that is tort theory **Anthropologies of Value** Luis Fernando Angosto-Ferrandez,Geir Henning Presterudstuen,2016-08-20 Anthropologies of Value analyses the creation of value in a wide range of political and cultural contexts This edited collection includes anthropological case studies from around the globe from the commodification of a Venezuelan waterfall to the relative value of penguins in periods of imperialist expansion Questioning the validity of binary oppositions such as north south core periphery and west the rest as the basis of generalisations about culturally mediated engagements with capitalism this collection leaves no stone unturned in its search to understand and define anthropological value theory It provides much needed controversial new material for students of anthropology and proposes an alternative rarely discussed method of studying the world system which challenges mainstream existing work in the field *Price Theory* Milton Friedman,2021-03-22 No detailed description available for Price Theory **Law Without Values** Albert W. Alschuler,2000 Albert Alschuler s study of Holmes is very different from other books about him in that it is an exercise in debunking him **Problems in Value Theory** Steven B. Cowan,2020-02-06 Problems in Value Theory takes a pro and con approach to central topics in aesthetics ethics and political theory Each chapter begins with a question What Makes Actions Right or Wrong Does Morality Depend on God Do We Need Government Contemporary philosophers with opposing viewpoints are then paired together to argue their position and raise problems with conflicting standpoints Alongside an up to date introduction to a core philosophical stance each contributor provides a critical response to their opponent and clear explanation of their view Discussion questions are included at the end of each chapter to guide further discussion With chapters ranging from why the government should never wage war to what is art and does morality depend on God this introduction covers questions lying at the heart of debates about what does and does not have value *Radical Voices for Democratic Schooling* P.
