Capturing Digital Media Thomas J. Connelly, 2019-04-18 Why are filmmakers such as J J Abrams Christopher Nolan and Quentin Tarantino continuing to shoot their movies on celluloid in the digital age of cinema Are these filmmakers choosing the photochemical process of celluloid images purely for aesthetics purposes Or could their preference for celluloid have something to do with analogue s intimate connection to the subject of lack and desire

Hollywood Outsiders Anne Morey,2003 An innovative approach to the relationship between filmmaking and society during Hollywood s golden age The 1910s and 1920s witnessed the inception of a particular brand of negotiation between filmdom and its public in the United States Hollywood its proponents and its critics sought to establish new connections between audience and industry suggesting means by which Hollywood outsiders could become insiders *Hollywood Outsiders* looks at how four disparate entities the Palmer Photoplay correspondence school of screenwriting juvenile series fiction about youngsters involved in the film industry film appreciation and character education programs for high school students and Catholic and Protestant efforts to use and influence filmmaking conceived of these connections and thus of the relationship of Hollywood to the individual and society

Anne Morey's exploration of the diverse discourses generated by these different conjunctions leads to a fresh and compelling interpretation of Hollywood's place in American cultural history. In its analysis of how four distinct groups each addressing constituencies of various ages and degrees of social authority defined their interest in the film industry, *Hollywood Outsiders* combines concrete discussions of cultural politics with a broader argument about how outsiders viewed the film industry as a vehicle of self-validation and of democratic ideals.

Portable Moving Images Ricardo Cedeño Montaña, 2017-08-21 This media history explores a series of portable small cameras, playback devices and storage units that have made the production of film and video available to everyone. Covering several storage formats from 8mm films of the 1900s through the analogue videotapes of the 1970s to the compression algorithms of the 2000s, this work examines the effects that the shrinkage of complex machines, media formats and processing operations has had on the dissemination of moving images. Using an archaeological approach to technical standards of media, the author provides a genealogy of portable storage formats for film, analog video and digitally encoded video. This book is a step forward in decoding the storage media formats which up to now have been the domain of highly specialised technicians.

New Perspectives on Early Cinema History Mario Sluġan, Daniël Biltreyst, 2022-06-02 In this book, editors Mario Sluġan and Daniël Biltreyst present a theoretical reconceptualization of early cinema. To do so, they highlight the latest methods and tools for analysis and cast new light on the experience of early cinema through the application of these concepts and methods. The international host of contributors evaluates examples of early cinema across the globe, including *The May Irwin Kiss* (1896), *Un homme de têtes* (1900), *The Terrible Turkish Executioner* (1904) and *Tom Tom the Piper's Son* (1905). In doing so, they address the periodization of the era, emphasizing the recent boon in the availability of primary materials, the rise of digital technologies, the developments in new cinema history and the persistence of some conceptualizations as key incentives for rethinking early cinema in theoretical and methodological terms. They go on to highlight cutting-edge approaches to the study of early cinema, including the use of the Mediathread Platform, the formation of new datasets with the help of digital technologies and exploring the early era in non-western cultures. Finally, the contributors revisit early cinema audiences and exhibition contexts by investigating some of the earliest screenings in Denmark and the US, exploring the details of black cinema going in Harlem and examining exhibition practices in Germany.

From Printing to Streaming Michael Chanan, 2022-10-20 For mainstream economics, cultural production raises no special questions: creative expression is to be harvested for wealth creation like any other form of labour. As Karl Marx saw it, however, capital is hostile to the arts because it cannot fully control the process of creativity. But while he saw the arts as marginal to capital accumulation, that was before the birth of the mass media. Engaging with the major issues in Marxist theory around art and capitalism, *From Printing to Streaming* traces how the logic of cultural capitalism evolved from the print age to digital times, tracking the development of printing, photography, sound recording, newsprint, advertising, film and broadcasting, exploring the peculiarities of each as commodities and their recent transformation by digital technology where

everything melts into computer code Showing how these developments have had profound implications for both cultural creation and consumption Chanan offers a radical and comprehensive analysis of the commodification of artistic creation and the struggle to realise its potential in the digital age
