The Human Right to Water and its Application in the Occupied Palestinian Territories Amanda Cahill Ripley, 2011-04-11 The Human Right to Water and Its Application in the Occupied Palestinian Territories provides an overview and examination of the human right to water as determined under international human rights law This is a highly topical issue with the UN General Assembly having passed a resolution which declares access to clean water and sanitation a human right New York Jul 28 2010 the recent appointment of the UN Independent Expert on the issue of human rights obligations related to access to safe drinking water and sanitation and movement within the NGO community for an international water treaty Amanda Cahill Ripley analyses the current legal status substantive content and obligations correlative to the right and examines the relationship between other economic social and cultural rights related to the right to water The book goes on to look more specifically at the application of the human right to water in the Occupied Palestinian Territories Using innovative methodology Cahill Ripley combines legal analysis with a qualitative social science empirical case study to explore the enjoyment of the right on the ground The wider implications of the case study findings are then considered looking at what can be done to strengthen the right legally in terms of its status and codification and what remedy can be found for violations of the right both specifically in the Occupied Palestinian Territories and in a more general context The book will be of interest to students academics and practitioners within the fields of international human rights law and international humanitarian law as well as those concerned with international relations and conflict resolution within Israel Palestine and the wider Middle East region

Water Law, Poverty, and Development Philippe Cullet, 2009-07-16 This monograph comprehensively examines water law regulations and reform in the present decade going beyond a simple analysis of existing water law and regulations to encompass environmental social economic and human rights aspects of water as a natural resource Using the specific case of India and on the related international law and policy framework that directly influences water regulatory developments in India this book offers what will be the first and only analysis of water law reforms taking place at the national level in many developing countries in their domestic and international context On the one hand international freshwater law remains under developed and existing legal instruments such as the 1997 UN Convention only address a limited set of relevant issues Yet the

international law and policy framework concerning freshwater is increasingly important in shaping up law reforms taking place at the national level in particular in developing countries Indeed non binding resolutions such as the Dublin Statement on Water and Sustainable Development 1992 have had an immense influence on water law reforms in most developing countries This book seeks to conceive of and analyse freshwater regulation in a broader context and go beyond a literature that either lauds or criticises ongoing water sector reforms to provide an analytical basis for the reforms which all countries will have to adopt in the near or medium term future The Oxford Handbook of Water Politics and Policy Ken Conca,Erika Weinthal,2018-01-26 Water is a basic human need and a scarce commodity with increasing value to farmers industries and cities in an urbanizing world It is unpredictable in supply and quality difficult to contain or direct and notoriously difficult to manage well Several trends climate change the endurance of widespread global water poverty intensifying competition among rival uses and users and the vulnerability of critical freshwater ecosystems combine to intensify the challenges of governing water wisely fairly and efficiently The twenty seven chapters in The Oxford Handbook of Water Politics and Policy address such issues over the course of seven thematic sections These themes reflect familiar frameworks in the water policy world including water poverty and health water and nature and water equity and justice Other sections look at emergent and contentious policy arenas including the water energy food nexus and management of uncertainty in water supply or connect well established strands in new ways including sections on water tools water price and value supply and demand privatization corporate responsibility and issues surrounding transboundary waters This volume conceives of water as a global issue and gathers a diverse group of leading scholars of water politics and policy A British Anarchist Tradition Carissa Honeywell,2011-05-12 A British Anarchist Tradition focuses on three contemporary British theorists and practitioners Herbert Read Colin Ward and Alex Comfort and looks at their interrelation commonality and collective influence on British radical thought The book aims to foster a greater understanding of anarchism as an intellectual response to 20th century developments and its impact on political thought and movements For the first time the work of these three writers is presented as a tradition highlighting the consistency of their themes and concerns To do so the book shows how they addressed the problems faced by modern British society with clear lines of political literary and intellectual traditions linking them It also focuses on their contribution to the development of anarchist conceptions of freedom in the twentieth century A British Anarchist Tradition identifies an area of anarchism that deserves greater critical scholarly attention Its unique and thorough research will make it a valuable resource for anyone interested in contemporary anarchist thought political theory and political movements Just Water Zenner, Christiana,2018-11-15 Just Water explores the necessity and availability of a supply of fresh water from the perspective of Christian ethics This revised edition includes new data and updates on social developments related to water crises as well as insights from Pope Francis s encyclical Laudato Si and a discussion of water justice from the perspective of the events at Standing Rock Water and Sanitation Services Jose Esteban Castro,2012 I am

most impressed by the range and profile of the topics and contributors There is a growing awareness that solving water and sanitation problems involves more than pipes and valves human behaviour and institutions are important components of the package Sandy Cairncross London School of Hygiene and Tropical Medicine UK This book will be very timely The emphasis of the book is absolutely correct linking the technologies to the sociocultural political economic and planning aspects of water and sanitation services Duncan Mara University of Leeds UK Substantially reducing the number

Water Politics in the Middle East M. Dolatyar,T. Gray,1999-09-21 Most studies of water scarcity in the Middle East conclude that there is a significant risk of imminent conflict even warfare between states in the region This book demonstrates that the evidence does not support this doom laden prediction Indeed the authors show that although water scarcity has occasionally played a role in disputes in the Middle East it has much more often promoted co existence between adversaries The reasoning behind this hypothesis is that water is too critical to be put at risk by warfare *Reflections on Water* Joachim Blatter,Helen M. Ingram,2001 This book offers conceptual and empirical support for the idea that the human relationship with water must move beyond rationalist definitions of water as product property and commodity Democracy and Global Water Politics in Historical Perspective Jose Esteban Castro,2024-12-23 This book addresses water privatization from a historical sociological perspective and argues against the unrelenting imposition of neoprivatist water politics worldwide Water is essential for life but it is also a source of economic and political power Prevailing water politics continues to erode the conditions of dignified living conditions of millions of human beings around the world including many living in Western capitalist democracies The book revisits water related myths fake truths and authoritarian practices promoted or employed by International Financial Institutions governments and other powerful actors to keep enforcing long failed policies grounded on ideological dogmas and short term interests and argues for the substantive democratization of water politics and management It rejects claims of scientific neutrality from academics and other actors across the political spectrum who are co responsible for the perpetuation of these conditions interrogating the ethics of scientific political pragmatism Encyclopedia of Consumer Culture Dale Southerton,2011-09-15 The Encyclopedia of Consumer Culture is the first reference work to outline the parameters of consumer culture and provide a critical scholarly resource on consumption and consumerism *Global Change: Impacts on Water and food Security* Claudia Ringler,Asit K. Biswas,Sarah Cline,2010-01-19 In recent years a greater level of integration of the world economy and an opening of national markets to trade has impacted virtually all areas of society The process of globalization has the potential to generate long term benefits for developing countries including enhanced technology and knowledge transfers and new financial options supporting agricultural and economic development However risks of political and economic instability increased inequality and losses in agricultural income and production for countries that subsidize their agricultural and other economic sectors threaten to offset potential benefits Globalization can also have a profound impact on the water sector in terms of allocation and use of water and thus on food security as well

Other global change processes particularly climate change are also likely to have far reaching impacts on water and food security and societies around the world To discuss these issues in depth the International Food Policy Research Institute the Third World Centre for Water Management Mexico and the Tropical Agricultural Research and Higher Education Center CATIE Costa Rica held a three day International Conference on Globalization and Trade Implications for Water and Food Security at CATIE s Turrialba Costa Rica headquarters under the auspices of the CGIAR Challenge Program on Water and Food in 2005 The workshop set out to identify the major risks and emerging issues facing developing countries related to global economic and environmental change impacts on water and food security
