

The Nature of Reflexive Paradoxes: Part I

LEONARD GODDARD and MARK JOHNSTON*

It has been widely recognized that Thomson's "small theorem" [5] is of central importance in understanding the reflexive paradoxes. Several authors (e.g., Herzberger [2], Martin [3], and Goldstein [1]) have exploited it and variations in it in different ways. The purpose of this paper, however, is to show that the formal and philosophical consequences of the theorem are so extensive that they force a general reappraisal of the paradoxes as such. The concern here is to bring out some of these consequences. In Part I there is no intention to promote a particular solution, though in Part II a generalization of Frege's solution is developed. Here, however, the interest is in the general conditions which must be satisfied by any reflexive paradox and any proposed solution. Some of the results which are arrived at are already well known, but they are presented here as interconnected conclusions within a general theory of paradoxicality which arises naturally from Thomson's theorem.

The analysis is carried out entirely in terms of classical two-valued logic since part of the purpose is to discover what can and cannot be done to block the occurrence of reflexive contradictions in a language based on standard quantification theory. We do not want to deny that there are other and perhaps better ways of handling the paradoxes than those which are available in standard two-valued logic, and nothing we say is incompatible with, say,

*An early version of this article (Part I), entitled "What paradoxes?," was read to the Australasian Association of Philosophy (Victorian Branch) in July 1980. For many helpful comments on that version and successive drafts, we are much indebted to Ross Brady, Laurence Goldstein, Joan Northrop, Graham Priest, Denis Robinson, Richard Routley, and Barry Taylor.

Reflexive Paradoxes:

Reflexive Paradoxes T. S. Champlin, 1988-01-01 Reflexivity Nicholas Rescher, Patrick Grim, 2013-05-02 The book seeks to characterize reflexive conceptual structures more thoroughly and more precisely than has been done before making explicit the structure of paradox and the clear connections to major logical results The goal is to trace the structure of reflexivity in sentences sets and systems but also as it appears in propositional attitudes mental states perspectives and processes What an understanding of patterns of reflexivity offers is a deeper and de mystified understanding of issues of semantics free will and the nature of consciousness

European Theorizing: Reflexivity in the Archaic Age Barry Sandywell, 2013-08-21 First published in 1995 Routledge is an imprint of Taylor Francis an informa company The Paradox of Self-consciousness José Luis Bermúdez, 2000 In this book Jos Luis Berm dez addresses two fundamental problems in the philosophy and psychology of self consciousness 1 Can we provide a noncircular account of fully fledged self conscious thought and language in terms of more fundamental capacities 2 Can we explain how fully fledged self conscious thought and language can arise in the normal course of human development Berm dez argues that a paradox the paradox of self consciousness arises from the apparent strict interdependence between self conscious thought and linguistic self reference The paradox renders circular all theories that define self consciousness in terms of linguistic mastery of the first person pronoun It seems to follow from the paradox of self consciousness that no such account or explanation can be given Drawing on recent work in empirical psychology and philosophy the author argues that any explanation of fully fledged self consciousness that answers these two questions requires attention to primitive forms of self consciousness that are prelinguistic and preconceptual Such primitive forms of self consciousness are to be found in somatic proprioception the structure of exteroceptive perception and prelinguistic forms of social interaction The author uses these primitive forms of self consciousness to dissolve the paradox of self consciousness and to show how the two questions can be given an affirmative answer **The paradox of freedom in everyday leadership practice** Rikke Horup

Sørensen, 2025-03-26 This thesis is an autoethnographic inquiry into the identity work of leaders working in the public sector in Denmark The research is about how degrees of freedom can be experienced when it is acknowledged that leaders are paradoxically both enabled and constrained through interdependencies with others The main puzzle is about what is involved in the processes of leaders negotiating identity when thinking about the mutual constitution of individuality and sociality This research argues that identity work within leadership is based on contradictions and ambiguities as well as how leaders simultaneously form and are formed by social rules and norms The inquiry illustrates the temporality of leadership identity It emphasizes how the human capacity to adapt to different power relations comes with either the risk of indeterminacy and a

weak sense of self or with the risk of determinacy and a weak sense of the other Losing the paradoxical understanding of these interdependencies might result in either dogmatism or relativism This research provides critical insight into both positions

The Times of Time Luigi Boscolo, Paolo Bertrando, 2019-07-02 This is the most comprehensive study of the role of time in psychotherapy It illustrates how time is experienced in different ways individual time family time and social time and how time can act as an invaluable metaphor in shaping clinical practice within a systemic approach while maintaining connections with other approaches such as psychoanalysis and cognitive therapies A seminal volume on this topic the book looks at issues such as the duration of therapy the relevance of past present and future in therapy and the balance of memory and oblivion It also includes a discussion of how time is framed in other disciplines including sociology history and psychopathology whilst exploring the concept in practical terms through case vignettes and complete case histories including the transcripts of actual sessions The reader is thus given a set of guidelines for dealing with time issues in therapy from a systemic perspective Originally published in 1993 the book has been updated to create a dialogue with contemporary theoretical debates as well as social and technological changes It will fascinate all psychotherapists particularly those interested in a systemic practice

Organizations and Unusual Routines Ronald E. Rice, Stephen D. Cooper, 2010-10-07 Everyone working in and with organizations will from time to time experience frustrations and problems when trying to accomplish tasks that are a required part of their role This is an unusual routine a recurrent interaction pattern in which someone encounters a problem when trying to accomplish normal activities by following standard organizational procedures and then becomes enmeshed in wasteful and even harmful subroutines while trying to resolve the initial problem They are unusual because they are not intended or beneficial and because they are generally pervasive but individually infrequent They are routines because they become systematic as well as embedded in ordinary functions Using a wide range of case studies and interdisciplinary research this book provides researchers and practitioners with a new vocabulary for identifying understanding and dealing with this pervasive organizational phenomenon in order to improve worker and customer satisfaction as well as organizational performance

Self-Reference S.J. Bartlett, P. Suber, 2012-12-06 Self reference although a topic studied by some philosophers and known to a number of other disciplines has received comparatively little explicit attention For the most part the focus of studies of self reference has been on its logical and linguistic aspects with perhaps disproportionate emphasis placed on the reflexive paradoxes The eight volume Macmillan Encyclopedia of Philosophy for example does not contain a single entry in its index under self reference and in connection with reflexivity mentions only relations classes and sets Yet in this volume the introductory essay identifies some 75 varieties and occurrences of self reference in a wide range of disciplines and the bibliography contains more than 1 200 citations to English language works about reflexivity The contributed papers investigate a number of forms

and applications of self reference and examine some of the challenges posed by its difficult temperament The editors hope that readers of this volume will gain a richer sense of the still largely unexplored frontiers of reflexivity and of the indispensability of reflexive concepts and methods to foundational inquiries in philosophy logic language and into the freedom personality and intelligence of persons **The International Reception of Samuel Beckett** Mark

Nixon, Matthew Feldman, 2011-10-27 Over the last decade Samuel Beckett's popularity has rocketed around the world and he is increasingly recognised as one of the most important and influential writers of the twentieth century but there has been very little scholarly work on Beckett's reception outside Europe This comprehensive volume brings together essays from leading critics on Beckett's international critical reception Due to Beckett's linguistic and artistic abilities he was intimately involved in the translation and production of his writings in German French English and Spanish and consequently countries using these languages have sophisticated critical traditions However many other countries have adopted Beckett as their own from places where he lived for lengthy periods of his life England France Ireland and Germany to those finding directly applicable political messages in his work such as ex Soviet states including the Czech Republic and Romania and those countries whose national literary traditions bear heavily upon his work e g Norway and Italy This fascinating volume reveals Beckett's evolving critical reception from contemporary reviews to the present *Reason, Method, and Value* Dale

Dynamics in Action Alicia Juarrero,2002-01-25 What is the difference between a wink and a blink The answer is important not only to philosophers of mind for significant moral and legal consequences rest on the distinction between voluntary and involuntary behavior However action theory the branch of philosophy that has traditionally articulated the boundaries between action and non action and between voluntary and involuntary behavior has been unable to account for the difference Alicia Juarrero argues that a mistaken 350 year old model of cause and explanation one that takes all causes to be of the push pull efficient cause sort and all explanation to be prooflike underlies contemporary theories of action Juarrero then proposes a new framework for conceptualizing causes based on complex adaptive systems Thinking of causes as dynamical constraints makes bottom up and top down causal relations including those involving intentional causes suddenly tractable A different logic for explaining actions as historical narrative not inference follows if one adopts this novel approach to long standing questions of action and responsibility

Replacing Truth Kevin Scharp,2013-07-11 Kevin Scharp proposes an original theory of the nature and logic of truth on which truth is an inconsistent concept that should be replaced for certain theoretical purposes Replacing Truth opens with an overview of work on the nature of truth e g correspondence theories deflationism work on the liar and related paradoxes and a comprehensive scheme for combining these two literatures into a unified study of the concept truth Scharp argues that truth is best understood as an inconsistent concept and proposes a detailed theory of inconsistent concepts that can be applied to the case of truth Truth also happens to be a useful concept but its inconsistency inhibits its utility as such it should be replaced with consistent concepts that can do truth s job without giving rise to paradoxes To this end Scharp offers a pair of replacements which he dubs ascending truth and descending truth along with an axiomatic theory of them and a new kind of possible worlds semantics for this theory As for the nature of truth he goes on

to develop Davidson's idea that it is best understood as the core of a measurement system for rational phenomena e.g. belief, desire, and meaning. The book finishes with a semantic theory that treats truth predicates as assessment sensitive i.e. their extension is relative to a context of assessment and a demonstration of how this theory solves the problems posed by the liar and other paradoxes.

The Politics of Logic Paul Livingston, 2012-03-22 In this book Livingston develops the political implications of formal results obtained over the course of the twentieth century in set theory, metalogic, and computational theory. He argues that the results achieved by thinkers such as Cantor, Russell, Gödel, Turing, and Cohen, even when they suggest inherent paradoxes and limitations to the structuring capacities of language or symbolic thought, have far-reaching implications for understanding the nature of political communities and their development and transformation. Alain Badiou's analysis of logical/mathematical structures forms the backbone of his comprehensive and provocative theory of ontology, politics, and the possibilities of radical change. Through interpretive readings of Badiou's work as well as the texts of Giorgio Agamben, Jacques Lacan, Jacques Derrida, Gilles Deleuze, and Ludwig Wittgenstein, Livingston develops a formally based taxonomy of critical positions on the nature and structure of political communities. These readings, along with readings of Parmenides and Plato, show how the formal results can transfigure two interrelated and ancient problems: of the One and the Many, the problem of the relationship of a Form or Idea to the many of its participants, and the problem of the relationship of a social whole to its many constituents.

The Rhetoric of the Conscience in Donne, Herbert, and Vaughan Ceri Sullivan, 2008-09-11 In the first book for over a decade to deal with the issue of conscience in metaphysical poetry, Ceri Sullivan draws on theology, poetics, and rhetoric in detailed readings of the works of Donne, Herbert, and Vaughan. She shows that these poets see the conscience as part, theirs, part God's, and respond uncomfortably to failures in its workings.
