Reform and Reaction in the Platine Provinces. 1810-1852 David Bushnell.1983 Recollections of a Provincial Past Domingo Faustino Sarmiento, 2005-03-24 Domingo Faustino Sarmiento 1811 1888 was Argentina s leading writer educator and politician of the nineteenth century and served as President from 1868 to 1874 Of his several autobiographies the best known Recollections of a Provincial Past is one of the indisputable classics of Spanish American literature as well as one of the earliest autobiographies written in the Americas in Spanish Written in exile in 1850 the memoirs describe his childhood and adolescence in an Andean province whose customs were still those of a colony Sarmiento presents his life as the triumph of civilization over barbarism looking back on his youth he measures his wealth and strength by the accumulation of enriching personal and political experiences He compares himself to the newly independent Argentina claiming to be a historically representative individual whose trajectory serves to illuminate contemporary South America Creole Revolution Joshua Simon, 2017-06-06 The American and Latin American independence movements emerged from distinctive settings and produced divergent results but they were animated by similar ideas Patriotic political theorists throughout the Americas offered analogous critiques of imperial rule designed comparable constitutions and expressed common ambitions for their new nations future relations with one another and the rest of the world This book adopts a hemispheric perspective on the revolutions that liberated the United States and Spanish America offering a new interpretation of their most important political ideas Simon argues that the many points of agreement among various revolutionary political theorists across the Americas can be attributed to the problems they encountered in common as Creoles that is as the descendants of European settlers born in the Americas He illustrates this by comparing the political thought of three Creole revolutionaries Alexander Hamilton of the United States Sim n Bol var of Venezuela and Lucas Alam Encyclopedia of Historians and Historical Writing Kelly Boyd, 2019-10-09 The Encyclopedia of Historians and n of Mexico Historical Writing contains over 800 entries ranging from Lord Acton and Anna Comnena to Howard Zinn and from Herodotus to Simon Schama Over 300 contributors from around the world have composed critical assessments of historians from the beginning of historical writing to the present day including individuals from related disciplines like I rgen Habermas and Clifford Geertz whose theoretical contributions have informed historical debate Additionally the Encyclopedia includes some 200 essays treating the development of national regional and topical historiographies from the Ancient Near East to the history of sexuality In addition to the Western tradition it includes substantial assessments of African Asian and Latin American historians and debates on gender and subaltern studies The Cambridge History of the Age of Atlantic Revolutions: Volume 3, The Iberian Empires Wim Klooster, 2023-11-09 Volume III covers the Iberian Empires and the important ethnic dimension of the Ibero American independence movements revealing the contrasting dynamics created by the Spanish imperial crisis at home and in the colonies It bears out the experimental nature of political changes the shared

experiences and contrasts across different areas and the connections to the revolutionary French Caribbean The special nature of the emancipatory processes launched in the European metropoles of Spain and Portugal is explored as are the connections between Spanish America and Brazil as well as between Brazil and Portuguese Africa It ends with an assessment of Brazil and how the survival of slavery is shown to have been essential to the new monarchy although simultaneously enslaved people began pressing their own demands just like the indigenous population The Americas in the Age of Revolution, 1750-1850 Lester D. Langley, 1996-01-01 Langley examines the political and social tensions reverberating throughout British French and Spanish America pointing out the characteristics that distinguished each unpheaval from the others the impact of place or location on the course of revolution the dynamics of race and color as well as class the relation between leaders and followers the strength of counterrevolutionary movements and especially the way that militarization of society during war affected the new governments in the postrevolutionary era Langley argues that an understanding of the legacy of the revolutionary age sheds tremendous light on the political condition of the Americas today virtually every modern political issue the relationship of the state to the individual the effectiveness of government the liberal promise for progress and the persistence of color as a critical dynamic in social policy was central to the earlier period Textile Trade in South America in the Nineteenth Century Manuel Llorca-Jaña, 2012-06-18 Covers British trade with the republics of Argentina Chile and Uruguay Las Derechas Sandra McGee Deutsch, 1999 This is the first book explicitly to compare extreme right wing organizations ideas and actions in different national settings in Latin America It shows how extreme rightist class and gender composition motives programs and activities varied over time and between countries It concludes by demonstrating the importance of the analysis for understanding present conditions The New Latin American Mission History Erick Langer, Robert Howard Jackson, 1995-01-01 The subject of missions formal efforts at religious conversion of native peoples of the Americas by colonizing powers is one that renders the modern student a bit uncomfortable Where the mission enterprise was actuated by true belief it strikes the modern sensibility as fanaticism where it sprang from territorial or economic motives it seems the rankest sort of hypocrisy That both elements greed and real faith were usually present at the same time is bewildering In this book seven scholars attempt to create a new mission history that deals honestly with the actions and philosophic motivations of the missionaries both as individuals and organizations and as agents of secular powers and with the experiences and reactions of the indigenous peoples including their strategies of accommodation co optation and resistance The new mission historians examine cases from throughout the hemisphere from the Andes to northern Mexico to California in an effort to find patterns in the contact between the European missionaries and the various societies they encountered Erick Langer is associate professor of history at Carnegie Mellon University He is the author of Economic Change and Rural Resistance in Southern Bolivia 1880 1930 and editor with Zulema Bass Werner de Ruiz of Historia de Tarija Corpus Documental Robert H Jackson is the author of Indian Population Decline The Missions of

Szuchman, Jonathan Charles Brown, 1994-01-01 The question that still engages the attention of Latin American historians is the amount of real change that occurred with the achievement of political independence from Spain in the early nineteenth century In this collection historians examine the social political and economic history of Argentina from the onset of the Bourbon Imperial reforms of 1776 through formal independence social disorder and dictatorship until the foundation of the modern bourgeois democratic state in 1860 Argentina in this period was particularly influential in shaping broader Latin American political and intellectual currents so that an examination of Argentina's situation has important implications for the Latin American republics Handbook of South American Governance Pia Riggirozzi, Christopher Wylde, 2017-12-14 Governance in South America is signified by strategies pursued by state and non state actors directed to enhancing some aspect of their capabilities and powers of agency It is about the spaces and the practices available demanded or created to make politics happen This framework lends explanatory power to understand how governance has been defined and practiced in South America P a Riggirozzi and Christopher Wylde bring together leading experts to explore what demands and dilemmas have shaped understanding and practice of governance in South America in and across the region The Handbook suggests that governance dilemmas of inequitable and unfulfilled political economic governance in South America have been constant historical features yet addressed and negotiated in different ways Building from an introduction to key issues defining governance in South America this Handbook proceeds to examine institutions actors and practices in governance focusing on three core processes evolution of socio economic and political justice claims as central to the demands of governance governance frameworks foregrounding particular issues and often privileging particular forms of political practice and iterative and cumulative processes leading to new demands of governance addressing recognition and identity politics This Handbook will be a key reference for those concerned with the study of South America South American political economy regional governance and the politics of development Atlantic History Bernard Bailyn, Patricia L. Labour-Intensive Industrialization in Global History Gareth Austin, Kaoru Sugihara, 2013-09-13 The prevailing view of industrialization has focussed on technology capital entrepreneurship and the institutions that enabled them to be deployed Labour was often equated with other factors of production and assigned a relatively passive role Yet it was labour absorption and the improvement of the quality of labour over the course of several centuries that underscored the timing pace and quality of global industrialization While science and technology developed in the West and whereas the use of fossil fuels especially coal and oil were vital to this process the more recent history has been underpinned by the development of comparatively resource and energy saving technology without which the diffusion of industrialization would not have been possible The labour intensive resource saving path which emerged in East Asia under the influence of Western technology and institutions and is diffusing across the world suggests the most realistic route humans could take for a further diffusion of industrialization which might respond to the rising expectations of living standards without catastrophic environmental degradation Race, State, and Armed Forces in Independence-Era Brazil Hendrik Kraay, 2004-08-01 Focusing on the military institutions army militia and National Guard of Bahia Brazil this book analyzes the region s transition from Portuguese colony to province of the Brazilian Empire It examines the social racial and cultural dimensions of post independence state building in one of the principal slave plantation regions of the Americas Contrary to those who stress the autonomy of the Brazilian state this book documents the close connections between the locally organized armed forces and society in the late colonial period Racially segregated and mirroring the class hierarchies of the larger society these military institutions were profoundly transformed by the war for independence in the early 1820s In its aftermath the new Brazilian state gradually built a national army breaking the local orientation of the Bahian regulars by the 1840s The National Guard locally oriented and democratic in its 1831 organization was turned into a state controlled corporation in the 1840s These developments deeply affected the lives of the men and women involved in the armed forces and a main aim of this book is to examine their participation in the complex and convoluted process of state building The liberalism used to justify independence and the creation of an imperial state resonated among ordinary soldiers and officers as it provided an ideology and language with which to challenge important features of late colonial military organization such as racial segregation and corporal punishment Racial discrimination formally eliminated in the 1830s shaped racial politics in the military while the construction of a national army undermined the previously close connections of officers and soldiers to the mainstream of Bahian society The Political Economy of Spanish America in the Age of Revolution, 1750-1850 Kenneth J. Andrien, Lyman L. Johnson, 1994 A New History of Modern Latin America Lawrence A. Clayton, Michael L. Conniff, Susan M. Gauss, 2017-08-01 A New History of Modern Latin America provides an engaging and readable narrative history of the nations of Latin America from the Wars of Independence in the nineteenth century to the democratic turn in the twenty first This new edition of a well known text has been revised and updated to include the most recent interpretations of major themes in the economic social and cultural history of the region to show the unity of the Latin America experience while exploring the diversity of the region's geography peoples and cultures It also presents substantial new material on women gender and race in the region Each chapter begins with primary documents offering glimpses into moments in history and setting the scene for the chapter and concludes with timelines and key words to reinforce content Discussion questions are included to help students with research assignments and papers Both professors and students will find its narrative chronological approach a useful guide to the history of this important area of the world Latin American Research Review ,1998
