Continuities in Sociological Human Ecology Michael Micklin, Dudley L. Poston, 2013-11-11 The completion of this volume would not have been possible without the generous and dedicated help of numerous people The book had its genesis in a conference held at Cornell University in the fall of 1990 that was organized by Dudley Poston Paul Eberts and Michael Hannan all professors at the time at Cornell With the very generous financial assistance of David Call then the dean of Cornell's College of Agriculture and Life Sciences Poston Eberts and Hannan put together a two day conference of lectures and papers by human ecologists from Cornell University and elsewhere The conference focused on sociological human ecology and celebrated the fortieth anniversary of the publication of Amos Hawley's *Human Ecology* Ronald Press 1950 Professor Hawley was the keynote speaker at the conference Many of the authors of the chapters in this volume presented earlier versions at the Cornell conference in 1990 Cornell's Departments of Rural Sociology and Sociology also contributed financial assistance however without Dean Call's very generous support the conference would not have been possible A few months after the conference Poston and Michael Micklin discussed the possibility of asking the various authors of the Cornell conference papers to revise them for publication in a volume on sociological human ecology Many opted to do so but others did not because of time and other kinds of commitments and

constraints *Old, Female, and Rural* B Jan McCulloch, 2016-05-23 In reading *Old Female and Rural* you will discover just that the reality concerning the daily living situations of the nation's older female populations in rural places. This scholarly collection will help you and others dispel the romantic frontier myths of the stoic, tenacious and independent rural woman. Instead you will find real direction for change in the statistics that truly reflect the older rural woman's mental, physical, economical and social existence. *Old Female and Rural* will show you stark realities concerning the older rural female's economic well-being, intergenerational family relationships, health care and service delivery availability and long-term care concerns. The candid demographic and epidemiological data you discover in this book will not only expose the myths for what they are but also allow you and others to transform the myths into daily realities of better policies and better living standards for the women who belong to this population subgroup. Specifically you will read about one woman's subjective evaluation of growing old in a rural area, rural women's experiences of accessing health care, the economic well-being of women aging in nonmetro areas, changes in the informal support networks of women aging in the rural southwest, a comprehensive synthesis of the above isolated topics which provides future implications for research, education and policy. While the legends of the old American frontier have died, the older female populations in America's rural areas live on and they deal with some very challenging realities. *Old Female and Rural* takes you into the homes, lives and minds of this complex and unique subgroup of America's elders and points you and public administrators, government officials, educators and civil servants toward the unsettled frontier of real social change.

Raised Up Down Yonder Angela McMillan Howell, 2013-11-01 *Raised Up Down Yonder* attempts to shift focus away from why black youth are problematic to explore what their daily lives actually entail. Howell travels to the small community of Hamilton, Alabama, to investigate what it is like for a young black person to grow up in the contemporary rural South. What she finds is that the young people of Hamilton are neither idly passing their time in a stereotypically languid setting nor are they being corrupted by hip-hop culture and the perils of the urban North as many pundits suggest. Rather, they are dynamic and diverse young people making their way through the structures that define the twenty-first century South. Told through the poignant stories of several high school students, *Raised Up Down Yonder* reveals a group that is often rendered invisible in society. Blended families, football sagas, crunk music, expanding social networks and a nearby segregated prom are just a few of the fascinating juxtapositions.

Rural Dimensions of Welfare Reform Bruce A. Weber, Greg J. Duncan, Leslie A. Whitener, 2002 This volume presents the first comprehensive look at how welfare reforms enacted in 1996 are affecting caseloads employment earnings and family well being in rural areas *New Methods for Measuring and Analyzing Segregation* Mark Fossett, 2017-09-14 This book is open access under a CC BY NC 2.5 license This book introduces new methods for measuring and analyzing residential segregation It begins by placing all popular segregation indices in the difference of group means framework wherein index scores can be obtained as simple differences of group means on individual level residential attainments scored from area racial composition Drawing on the insight that in this framework index scores are additively determined by individual residential attainments the book shows that the level of segregation in a given city can be equated to the effect of group membership e.g. race on individual residential attainments This unifies separate research traditions in the field by joining the analysis of segregation at the aggregate level with the analysis of residential attainments for individuals Next it shows how segregation analysis can be extended by using multivariate attainment models to assess the impact of group membership i.e. the level of segregation for a city while including controls for other relevant individual characteristics e.g. income education

language nativity etc It then illustrates how one can use these models to quantitatively assess the extent to which segregation traces to impacts of group membership on residential attainments versus other factors such as group differences in income The book then shows how micro level attainment models can be used to study macro level variation in segregation specifically by estimating multi level models of individual residential attainments to assess how the effect of group membership i e segregation index scores vary with city characteristics Finally the book introduces refined versions of popular indices that are free of the vexing problem of upward bias This improves the quality of segregation measurement directly at the level of individual cases and expanding the number of cases that can be safely included in empirical studies
