Longterm Scenario Study Of The World Economy 19902015:

A Long-term Scenario Study of the World Economy, 1990-2015 Netherlands. Centraal Planbureau,1992 Presents four scenarios based on the comparative strength of economic development in particular countries or country groups

Scenario Studies for the Rural Environment Job F.Th. Schoute,Peter A. Finke, Frank R. Veeneklaas, Henk P.

Wolfert,2012-12-06 Rural areas need to fulfil a large variety of functions and to accommodate many activities The complexity of the problems limited funds and the almost irreversible character of some interventions result in a compelling need to evaluate ex ante the effects of alternative solutions for designation of land for measures to develop infrastructure and for soil and water management Scenario studies are undertaken to help manage the complexity to place bounds on uncertainties and to create new visions After an overview of the nature variety and scope of scenario studies the book illuminates various European examples and reviews under the following headings regional soil and water management nature development and landscape quality rural planning and the future of regions **The Future of Global Conflict** Volker

Bornschie,Christopher Chase-Dunn,1999-07-06 This critical analysis of long term trends and recent developments in world systems examines such questions as Will the cycles of boom and bust peace and war of the past 500 years continue Or have either long term trends or recent changes so profoundly altered the structure of world systems that these cycles will end or take on a less destructive form The noted international contributors to this volume examine the question of future dominance of the core global systems and include comprehensive discussions of the economic political and military role of the Pacific Rim Japan and the former Soviet Union Long-term Prospects for the World Economy Organisation for Economic

Co-operation and Development,1992 **Economy—Energy—Environment Simulation** K. Uno,2005-12-08 In the policy arena as well as in the academic world a new challenge is having to deal with the global community We are increasingly aware that the world is linked through economy energy environment interactions We are increasingly aware at the same time that the emergence of the global community does not imply an integrated harmonious world rather it is a community where co tries regions of different interests and values face each other directly Global governance has to be achieved through actions of national governments under different motives and constraints We need to have an analytical tool that is capable of producing a global picture yet with detailed country resolution If the world is a better place now compared to 100 years ago in terms of p capita income this is due to the industrialization that continued throughout the 20th century We entered the 21st century knowing that the human aspiration that translates into ever increasing production may not be tenable in the long run Sustainability of the global community is at stake In contrast to inc mental decision making through the market mechanism that should lead to some optimal state under some assumptions such as perfect knowledge smooth movement of resources no externalities and so forth we need to have an a lytical tool to provide us with details of the future state of the world **European Organised Crime Scenarios for 2015** Tom Vander Beken,2006 Policy makers no longer focus on

repressive aspects of organised crime alone but want to be informed about coming challenges and threats to allow them to take appropriate preventive action and target their reactive response better For that reason there is a growing demand to change the traditional assessments into analyses that include more prospective elements about current and potential future organised crime situations to identify specific risks or threats to society The book outlines a methodology to perform analyses of long term threats of organised crime and scenario studies and applies this on four case studies at two different levels three studies at Member State level Belgium Slovenia and Sweden and one at the European Union level In a last chapter conclusions and recommendations about the method and its applications are presented The developed methodological tool and the scenarios are intended as a guide for action and consideration for all actors involved in the fight against organised crime
