Perceptions of Retailing in Early Modern England Nancy Cox, Karin Dannehl, 2017-05-15 Whilst there has been much recent scholarly work on retailing during the early modern period less is known about how people at the time perceived retailing both as onlookers artists and commentators and as participants Centred on the general theme of perceptions the authors address this gap in our knowledge by looking at a different aspect of consumption They focus on two ancillary themes the first is location and how contemporaries perceived the settlements in which there were shops the other is distance Pictures prints novels diaries and promotional literature of the tradespeople themselves provide much of the evidence Many of these sources are not new to historians but they have not been scrutinized and analysed with the questions in mind that are posed here The methodology to be employed has been developed by Nancy Cox over the last decade and is used successfully in her book *The Complete Tradesman* and in the compilation of the forthcoming *Dictionary of Traded Goods and Commodities 1550-1800* This book will find a ready market with scholars concerned with British social and economic history in the early modern period Although it is first and foremost a book written by historians for historians it nevertheless borrows concepts and approaches from various disciplines concerned with theories of consumption material culture and representational art

Why Cities Look the Way They Do Richard J. Williams, 2019-08-08 We tend to think cities look the way they do because of the conscious work of architects planners and builders But what if the look of cities had less to do

with design and more to do with social cultural financial and political processes and the way ordinary citizens interact with them What if the city is a process as much as a design Richard J Williams takes the moment construction is finished as a beginning tracing the myriad processes that produce the look of the contemporary global city This book is the story of dramatic but unforeseen urban sights how financial capital spawns empty towering skyscrapers and hollowed out ghettos how the zoning of once illicit sexual practices in marginal areas of the city results in the reinvention of culturally vibrant gay villages how abandoned factories have been repurposed as creative hubs in a precarious postindustrial economy It is also the story of how popular urban clichés and the fictional portrayal of cities powerfully shape the way we read and see the bricks concrete and glass that surround us Thought provoking and original *Why Cities Look the Way They Do* will appeal to anyone who wants to understand the contemporary city shedding new light on humanity's greatest collective invention Urban Discourses of Crisis, Resilience, and Resistance Eric Prieto, Liam Lanigan, Anni Lappela, 2025-07-11 This volume seeks to address questions of urban crisis from an interdisciplinary perspective that foregrounds the particular roles that literature and the creative arts play in both conceptualizing and addressing the multiple challenges facing cities Noting that the successive crises of recent years from the 2008 recession to COVID 19 seem to have put an end to the triumphalist tone of much urban writing in the 1990s this book argues that the current historical moment calls for a different kind of urban discourse focused on reassessment and regrouping This edited collection features a variety of different approaches including close readings of literary works interviews essays in cultural and architectural history and sociological ethnographic and urban planning studies These chapters explore a range of challenges currently faced by cities and foreground the search for solutions *Looking at Venice* Claudio Pescio, 1972 Creative Economies in Post-Industrial Cities Myrna Margulies Breitbart, 2016-05-13 There has been much written on the new creative economy but most work focuses on the so called creative class with lifestyle preferences that favor trendy new restaurants mountain biking and late night clubbing This creative class flagship cultural destinations and other forms of commodity driven cultural production now occupy a relatively uncritical place in the revitalization schemes of most cities up and down the urban hierarchy In contrast this book focuses on small to medium size post industrial cities in the US Canada and Europe that are trying to redress the effects of deindustrialization and economic decline through cultural economic regeneration It examines how culture infused economic opportunities are being incorporated into planning in distinct ways largely under the radar in many working class communities and considers to what extent places rooted in an industrial past are able to envisage a different economic future for themselves It questions whether these visions replicate strategies employed in larger cities or put forth plans that better suit the unique histories and challenges of places that remain outside the global limelight Exploring the intersection between a cultural and sustainable economy raises issues that are central to how urban regeneration is approached and neighborhood needs and assets are understood Case studies in this book examine spaces and planning processes that hold the possibility of

addressing inequality by forging new economic and social relationships and by embarking on more inclusive and collaborative experiments in culture based economic development These examples often focus on building upon the assets of existing residents and broadly define creativity and talent They also acknowledge both the economic and non monetary value of cultural practices This book maintains a critical edge incorporating left critiques of mainstream creative economy theories and practices into empirical case studies that depart from standard cultural economy discourse Structural barriers and unequal distributions of power make the search for viable urban development alternatives especially difficult for smaller post industrial cities and risk derailing even creative grassroots initiatives While acknowledging these obstacles this book moves beyond critique and focuses on how the growing economy surrounding culture the arts and ecological design can be harnessed and transformed to best benefit such cities and improve the quality of life for its residents The Worshipful Company of Glass Sellers of London William Ramsey, William Ramsey (P.
